COUNCIL MEETING

MAY 18, 2021

NOTE: Due to COVID-19, this meeting was held virtually (via ZOOM), and was live streamed on the City's website

Mayor Casavant called the meeting to order at 6:00 p.m.

Roll Call: William Emhiser, John McCurry, Jr., Stephen St. Cyr, Robert Quattrone, Jr., Norman Belanger, Doris Ortiz, Marc Lessard

Amy Clearwater and Michael Ready were excused.

Adjustments to the Agenda:

Councilor Robert Quattrone, Jr. publicly resigned his position as Ward 4 City Councilor. He thanked his constituents, City Staff and his fellow Councilors. His resignation was effective immediately.

Add: Proclamation – Emergency Medical Services (EMS) Week

Proclamation: PTSD Awareness Month – June 2021

Mayor Casavant read the proclamation.

Presentation: Parking Garage and Parking Lots – Technology and Transition Plan

Ben Montgomery of *Premier Parking* gave a PowerPoint presentation. The plan is to use gateless, digital parking. There is an app available for folks to pay through their phone. The idea is to provide fast, seamless access for every type of parker – daily parker, trip planners, guests/visitors, events attendees, etc. Different payment options will be available to accommodate all the different types of parkers and their comfort level in paying for parking. Clear and concise signage will be constructed to instruct parkers where to park and how to pay.

Proclamation: Emergency Medical Services (EMS) Week – May 16 through May 22, 2021

Mayor Casavant read the proclamation.

Consideration of Minutes: May 4, 2021; May 11, 2021

Motion by Councilor McCurry, seconded by Councilor Ortiz to accept the May 4, 2021 minutes as printed.

Vote: Unanimous.

Motion by Councilor McCurry, seconded by Councilor Ortiz to accept the May 11, 2021 minutes as printed.

Vote: Unanimous.

Second Readings:

{For a copy of the Orders and first readings, see the Council Meeting minutes of May 4, 2021 and May 11, 2021}

2021.37) Amendment/Land Development Regulations/Attachment A-Fees and Charges/Various Amendments

Motion by Councilor McCurry, seconded by Councilor Lessard to grant the second reading of the ordinance amendment.

Vote: Unanimous.

FY22 SCHOOL DEPARTMENT BUDGET:

Essential Programs & Services Funding Act

Motion by Councilor McCurry, seconded by Councilor Lessard to grant the second reading of the order.

Vote: Unanimous.

School Construction Projects – Local Share

Motion by Councilor McCurry, seconded by Councilor Lessard to grant the second reading of the order.

Vote: Unanimous.

Food Service

Motion by Councilor McCurry, seconded by Councilor Lessard to grant the second reading of the order.

Vote: Unanimous.

School Department Estimated Revenues

Motion by Councilor McCurry, seconded by Councilor Lessard to grant the second reading of the order.

Vote: Unanimous.

Orders of the Day:

2021.43

IN BOARD OF CITY COUNCIL..MAY 18, 2021

BE IT ORDAINED, by the City Council of Biddeford, Maine to amend the Code of Ordinances of the City of Biddeford as follows:

Part III (Land Development Regulations), Article V (Establishment of Zones), Section 2 (General description of zones and allowed uses):

The following section provides a brief general description and philosophy for each specific zone or district.

b. Coastal Residential Zone (CR): This zone was created to identify coastal areas with significant environmental or visual significance. The area is limited to single-family residential uses, ~~accessory dwelling units~~ in close proximity to Route 9/Pool Road, and some home offices under special circumstances. The zone is characterized by varying lot sizes dependent upon soils types.

c. Residential Zones:

R-1-A: These areas are limited to single-family and duplex/two-family residential usesThese areas are served by water and sewer. These districts are best characterized as in-town single-family and duplex/two-family neighborhoods.

R-1-B: These areas are limited to single-family and duplex/two-family residential uses. These areas are served by water and sewer. These districts are best characterized as in-town single-family and duplex/two-family neighborhoods.

Part III (Land Development Regulations), Article V (Establishment of Zones), Table A (Table of Land Uses):

Add “Duplex/2-Family” as a Permitted Use (“P”) in the R-1-A and R-1-B zones.
Add “Accessory dwelling units* 27)” as a Permitted Use (“P”) in the C-R Zone and amend Footnote 27 for Table A as follows:

27. ~~Accessory dwelling units are only permitted in the C-R Zone within five hundred feet (500') of the edge of right of way of Route 9/Pool Road.~~ Accessory dwelling units may also be permitted in nonresidential zones where there exists a nonconforming (as to use) single-family dwelling on a lot that was in existence as of January 1, 2017. See Article VI, Section 78.

Part III (Land Development Regulations), Article V (Establishment of Zones), Table B (Dimensional Requirements):

Zoning District	Minimum Lot Size, Square Feet Per Unit A			
	Water and Sewer	Water, No Sewer	Sewer, No Water	Neither Water Nor Sewer
R-1-A	10,000 B	20,000	10,000	20,000
R-1-B	5,000 B	20,000	5,000	20,000
R-2	4,500 B	N/A	N/A	N/A
R-3, duplex	7,500 B	30,000	N/A	N/A
MSRD-2	2,000 B	N/A	N/A	N/A

Zoning District	Minimum Lot Size, Square Feet Per Unit A				Frontage			Minimum Setback, Feet**				Maximum Heights+	
	Water and Sewer	Water, No Sewer	Sewer, No Water	Neither Water Nor Sewer	Water and Sewer	Water or Sewer	Neither Water Nor Sewer	From Major R.O. W.	From other R.O. W.	Side	Rear	Stories	Feet
OR	4,500 B	N/A	N/A	N/A	75	N/A	N/A	10	10	10	10	3	35

- B. In order to promote condominium forms of housing and affordable housing in close proximity to downtown and services, in the R-1-A, R-1-B, R-2, R-3, OR, and MSRD-2 Zoning Districts the density requirements may be relaxed as follows:
- Redevelopment of existing structures:
 - The Planning Board, or other appropriate approval authority, shall consider granting a density bonus of one residential unit for every 650 square feet of living space within an existing structure, provided the applicant present redevelopment/renovation plans to the Code Enforcement Officer demonstrating how the redevelopment project will result in the number of residential units with two or more bedrooms being at least, if not more than, the number of units with two or more bedrooms before the density bonus was granted.
 - If the project is provided a density bonus, the Code Enforcement Officer shall document the allowable density and number of units, in writing, for the Code Enforcement Office files.
 - An applicant provided a density bonus for rental housing shall enter into a contractual agreement with the City of Biddeford requiring that at least thirty percent (30%) of the additional units created shall be leased such that they do not exceed eighty percent (80%) of the Fair Market Rent (FMR) per bedroom size, as established annually by the U.S. Department of Housing and Urban Development (HUD). The contractual agreement shall be recorded at the York County Registry of Deeds, a copy of which provided

to the Code Enforcement Office, prior to the issuance of any building permits. Rent restricted units will be annually monitored by the Planning and Development Department for contract compliance.

2. Condominium conversions/development:

a. A property may be proposed for redevelopment/renovation from apartments into condominiums in accordance with 1. above.

b. An applicant provided a density bonus for condominiums shall enter into a contractual agreement with the City of Biddeford obligating them to complete the project as condominiums to be offered for sale upon or before completion of the project in return for receiving the density bonus. The contractual agreement shall be recorded at the York County Registry of Deeds, a copy of which provided to the Code Enforcement Office, prior to the issuance of any building permits.

c. The applicant agrees that if the project is converted to condominiums said units shall not be sold for a price that exceeds 125% of the York County median home price affordable to median income households as set annually by HUD for the City of Biddeford.

Q. Existing non-conforming lots or structures may be considered for conversion to nonresidential uses allowed in the OR Zone, provided that neither structure nor lot are made more nonconforming as a result of the conversion.

Part III (Land Development Regulations), Article VI (Performance Standards), Section 78 (Accessory dwelling units (ADUs):

B. Procedural requirements.

1. Review procedure:

a. One ADU is permitted per residentially zoned parcel identified in Article V, Table A, Table of Land Uses, except within the RP and LR shoreland zoning districts, where ADUs are not permitted. ADUs are also permitted on nonresidentially zoned parcels containing a single nonconforming (as to use) dwelling unit which was in existence as of January 1, 2017. A permit for an ADU may be issued by the Code Enforcement Office so long as all of the standards in this section are met.

Motion by Councilor Lessard, seconded by Councilor McCurry to grant the first reading of the ordinance amendment.

{NOTE: Councilor McCurry left the meeting}

Motion by Councilor Belanger, seconded by Councilor Lessard to amend by removing all references to ADU (Accessory Dwelling Units) from the ordinance amendment.

Vote: 3/2; Councilors Lessard and Emhiser opposed.

Councilors St. Cyr, Belanger and Ortiz in favor.

Amendment carries.

Motion by Councilor Lessard, seconded by Councilor Belanger to amend page 3, Section B. paragraph c. by adding, “or in the case that one unit is added to the property.”

Vote: 2/3; Councilors Lessard and Ortiz in favor.

Councilors Emhiser, St. Cyr and Belanger opposed.

Amendment fails.

Motion by Belanger, seconded by Councilor Lessard to amend page 3, Section B. paragraph c. by adding the word “additional units created”....

Vote: Unanimous.

Vote on ordinance as amended: Unanimous.

Appointment:

IN BOARD OF CITY COUNCIL..MAY 18, 2021

ORDERED, that I, Alan M. Casavant, Mayor of the City of Biddeford, do hereby appoint:

**Renee DesRoberts
290 Hill Street
Ward 4**

to the *Solid Waste Management Commission*, for a term to expire in December 2024.

Motion by Councilor Belanger, seconded by Councilor Lessard to confirm the appointment.
Vote: Unanimous.

Public Addressing the Council...(5 minute limit per speaker; 30 minute total time limit):
One citizen addressed his comments to the Council.

City Manager Report:

City Manager James Bennett had the following items:

- He announced that starting June 1st, all City public meetings will be conducted in a hybrid model of in-person and via electronically. Folks who are uncomfortable with meeting in-person will have the option to electronically join and participate in public meetings.
- He informed the Council that the City has received notice from the Auditors, Runyon Kersteen Ouellette that they will no longer be working with the City of Biddeford. Upon notification, Jim reached out to RKO in an effort to persuade them to reconsider and RKO has agreed to keep the City on as a client; however, RKO has asked that the City agree to push the audit out to between November and January. With Council agreement, Jim will accept RKO's terms.

There was no *Other Business*.

Mayor Addressing the Council: Mayor Casavant noted that with Robert Quattrone's resignation from the Council, the Mayor will be making an appointment to fill the Ward 4 Council seat within 30 days.

Motion by Councilor Belanger, seconded by Councilor Lessard to adjourn.

Vote: Unanimous.

Time: 7:42 p.m.

Attest by: _____
Carmen J. Morris, City Clerk

**SPECIAL COUNCIL MEETING
MAY 24, 2021**

*NOTE: Due to COVID-19, this meeting was held virtually (via ZOOM),
and was live streamed on the City's website*

Mayor Casavant called the meeting to order at 6:01 p.m.

Roll Call: William Emhiser, John McCurry, Jr., Stephen St. Cyr, Norman Belanger, Doris Ortiz (arrived at 6:10 p.m.), Marc Lessard

Amy Clearwater and Michael Ready were excused.

There were no adjustments to the agenda.

Orders of the Day:

2021.44

IN BOARD OF CITY COUNCIL..MAY 24, 2021

BE IT ORDERED, that the City Council of the City of Biddeford does hereby authorize the City Manager, or his designee, to enter into a lease agreement with Hyundai Finance for the lease of the following two electric vehicles:

2021 Hyundai Ionics, vin# KMHC85LJ2MU080385

2021 Hyundai Kona, vin# KM8K33AG4MU132668

Note: The vehicles are funded through Efficiency Maine enhanced rebates and the EV Accelerator Program, which covers the cost of the lease for three years. At lease termination, the City is obligated to pay a nominal turn-in fee of \$400/vehicle plus mileage in excess of 10,000 miles per year (prorated) at \$0.20/mile, plus any excess wear and tear as per a typical lease.

Motion by Councilor McCurry, seconded by Councilor Belanger to grant the order.

Vote: Unanimous.

2021.45

IN BOARD OF CITY COUNCIL..MAY 24, 2021

BE IT ORDERED, that the City Council of the City of Biddeford does hereby form a Council Ad Hoc Committee for the purpose of finalizing the FY22 City Government Budget. The Ad Hoc Committee shall be composed of the members of the City Council.

Motion by Councilor Belanger, seconded by Councilor McCurry to grant the order.

Vote: Unanimous.

The Council transitioned into the Council Ad Hoc Committee at 6:07 p.m.

Finalization of FY22 City Government Budget:

New budget changes as proposed by City Manager:

- | | |
|---------------------------------------|-------------|
| ➤ Revenue Sharing | (\$375,000) |
| ➤ Communications (Cable TV) | (\$237,435) |
| ➤ Finance Revenue (Cable TV) | \$290,000 |
| ➤ Fringe Benefits (AllegiantCare) | \$28,935 |
| ➤ Hydrant Rental Increase | \$25,000 |
| ➤ Reduce CSO Borrowing by \$5 million | (\$138,333) |
| ➤ New Property Value - \$2.5 million | (\$50,000) |
| ➤ New State Funding to Schools | (\$494,265) |

Motion by Councilor Emhiser, seconded by Councilor Belanger to adjust the budgeted amount for State Revenue Sharing by increasing by \$375,000.

Vote: 5/1; Councilor Lessard opposed.

Councilors Emhiser, McCurry, St. Cyr, Belanger and Ortiz in favor.

Motion carries.

Motion by Councilor McCurry, seconded by Councilor Belanger to adjust the budget to reflect the borrowing of \$5 million (instead of the full \$10 million) for the CSO Bond, which reflects an increase of \$138,333.

Vote: Unanimous.

Motion by Councilor Belanger, seconded by Councilor McCurry to reduce the School Budget by \$494,265 to reflect new State Funding to the Schools.

Vote: 5/1; Councilor Lessard opposed.

Councilors Emhiser, McCurry, St. Cyr, Belanger and Ortiz in favor.

Motion carries.

Motion by Councilor McCurry, seconded by Councilor Belanger to increase the Fringe Benefits budget line by \$28,935 to reflect the increase in Allegiant Care costs.

Vote: Unanimous.

Motion by Councilor McCurry, seconded by Councilor Belanger to increase the Hydrant Rental budget line by \$25,000.

Vote: 5/1; Councilor Lessard opposed.

Councilors Emhiser, McCurry, St. Cyr, Belanger and Ortiz in favor.

Motion carries.

The Committee then considered the remaining General Fund Budgets:

- ❖ Computer Services – no change recommended
- ❖ Planning/Economic Dev. – no change recommended
- ❖ Code Enforcement/Inspections – no change recommended
- ❖ General Administration – no change recommended
- ❖ Community Center – no change recommended
- ❖ Recreation – no change recommended
- ❖ Social Services – no change recommended
- ❖ Municipal Services (fully funded would be \$951,206)

Motion by Councilor Belanger to amend this budget line by deleting those agencies that were not funded in the prior fiscal year; to reduce the Biddeford Conservation Commission request to \$3,500; to reduce the Downtown Development Commission request to \$500; and leave all other requests as is. This ultimately reflects an increase of \$36,738.

Motion fails due to lack of second.

Motion by Councilor McCurry, seconded by Councilor St. Cyr to use the Municipal Service amounts from the FY20 Budget and add the requested increase for Transit, making the budget line \$878,128.

Motion was withdrawn.

- ❖ Communication – no change recommended
- ❖ Fire Dept

Motion by Councilor Emhiser, seconded by Councilor Ortiz to accept the City Manager recommendation.

Motion by Councilor McCurry, seconded by Councilor Lessard to move the increase in this line item to Contingency.

Vote: 3/3; Councilors McCurry, St. Cyr and Lessard in favor.

Councilors Emhiser, Belanger and Ortiz opposed.

Mayor Casavant voted in opposition to break the tie.

Motion fails.

Motion by Councilor Belanger, seconded by Councilor Ortiz to increase the amount in this line item to fund four new positions instead of two new positions.

Vote: 2/4; Councilors Belanger and Ortiz in favor.

Councilors Emhiser, McCurry, St. Cyr and Lessard opposed.

Motion fails.

Vote on Emhiser/Ortiz original motion: 3/3; Councilors Emhiser, Belanger and Ortiz in favor.
Councilors McCurry, St. Cyr and Lessard opposed.
Mayor Casavant voted in favor to break the tie.
Motion carries.

- ❖ Hydrant Rental – no change recommended
- ❖ Police Dept. – no change recommended
- ❖ Solid Waste Management – no change recommended
- ❖ Parks Maintenance – no change recommended
- ❖ Fringe Benefits – no change recommended
- ❖ County Tax – no change recommended
- ❖ Debt Service – Principal – no change recommended
- ❖ Debt Service – Interest – no change recommended
- ❖ Transfers Out – no change recommended
- ❖ Capital Improvement CIP – no change recommended

Other Budget Amendments:

Motion by Councilor Lessard, seconded by Councilor Belanger to increase the **Municipal Service** budget line by \$61,000 for a total of **\$950,000**; with the stipulation that a sub-committee of Councilors be formed to appropriate the funds.

Vote: 4/2; Councilors McCurry and St. Cyr opposed.
Councilors Emhiser, Belanger, Ortiz and Lessard in favor.
Motion carries.

Motion by Councilor Lessard, seconded by Councilor Belanger to increase the Public Works Parks budget line by \$100,000 for (1) to hire seasonal help for the maintenance of City parks; and (2) with whatever funds are left, to improve the trail system at Clifford Park.

Motion by Councilor Lessard, seconded by Councilor Belanger to amend the prior motion that the funding come from the current fiscal year budget operational surplus.
Vote: Unanimous.

Vote on original motion, as amended: Unanimous.

With budget work being completed for the time being, the budget sits at a \$.15 or .74% reduction.

Motion by Councilor McCurry, seconded by Councilor Lessard to adjourn.

Vote: Unanimous.

Time: 8:30 p.m.

2021.43

IN BOARD OF CITY COUNCIL..MAY 18, 2021

BE IT ORDAINED by the City Council of Biddeford, Maine to amend the Code of Ordinances of the City of Biddeford as follows:

Part III (Land Development Regulations), Article V (Establishment of Zones), Section 2 (General description of zones and allowed uses):

The following section provides a brief general description and philosophy for each specific zone or district.

- b. Coastal Residential Zone (CR): This zone was created to identify coastal areas with significant environmental or visual significance. The area is limited to single-family residential uses, [accessory dwelling units in close proximity to Route 9/Pool Road](#), and some home offices under special circumstances. The zone is characterized by varying lot sizes dependent upon soils types.
- c. Residential Zones:
 - R-1-A: These areas are limited to single-family [and duplex/two-family](#) residential uses ~~similar to the SR-1 Zone. The lot size is smaller.~~ These areas are served by water and sewer. These districts are best characterized as in-town single-family [and duplex/two-family](#) neighborhoods.
 - R-1-B: These areas are limited to single-family [and duplex/two-family](#) residential uses ~~similar to the R-1 A Zone. The lot size and setbacks are generally smaller.~~ These areas are served by water and sewer. These districts are best characterized as in-town single-family [and duplex/two-family](#) neighborhoods.

Part III (Land Development Regulations), Article V (Establishment of Zones), Table A (Table of Land Uses):

- Add “Duplex/2-Family” as a Permitted Use (“P”) in the R-1-A and R-1-B zones.
- Add “Accessory dwelling units* 27)” as a Permitted Use (“P”) in the C-R Zone and amend Footnote 27 for Table A as follows:

27. Accessory dwelling units are only permitted in the C-R Zone within five hundred feet (500’) of the edge of right-of-way of Route 9/Pool Road. Accessory dwelling units may also be permitted in nonresidential zones where there exists a nonconforming (as to use) single-family dwelling on a lot that was in existence as of January 1, 2017. See Article VI, Section 78.

Part III (Land Development Regulations), Article V (Establishment of Zones), Table B (Dimensional Requirements):

Zoning District	Minimum Lot Size, Square Feet Per Unit A			
	Water and Sewer	Water, No Sewer	Sewer, No Water	Neither Water Nor Sewer
R-1-A, <u>single family</u>	10,000 <u>B</u>	20,000	10,000	20,000
R-1-B, <u>single family</u>	5,000 <u>B</u>	20,000	5,000	20,000
R-2	4,500 <u>B</u>	N/A	N/A	N/A
R-3, duplex	7,500 <u>B</u>	30,000	N/A	N/A
MSRD-2	2,000 B	N/A	N/A	N/A

Zoning District	Minimum Lot Size, Square Feet Per Unit A	Frontage	Minimum Setback, Feet**	Maximum Heights+
-----------------	--	----------	-------------------------	------------------

	Water and Sewer	Water, No Sewer	Sewer, No Water	Neither Water Nor Sewer	Water and Sewer	Water or Sewer	Neither Water Nor Sewer	Frm Major R.O.W.	From other R.O.W.	Side	Rear	Stories	Feet
OR	See Note Q				See Note Q			See Note Q			See Note Q		
OR	<u>4,500 B</u>	<u>N/A</u>	<u>N/A</u>	<u>N/A</u>	<u>75</u>	<u>N/A</u>	<u>N/A</u>	<u>10</u>	<u>10</u>	<u>10</u>	<u>10</u>	<u>3</u>	<u>35</u>

B. In order to promote ~~higher quality housing facilities~~, condominium forms of housing, and affordable housing in close proximity to downtown and services, in the R-1-A, R-1-B, R-2, R-3, OR, and MSRD-2 Zoning Districts the ~~minimum~~ density requirements may be relaxed as follows:

1. Redevelopment of existing structures:

- a. The Planning Board, or other appropriate approval authority, shall consider granting a density bonus of one residential unit for every 650 square feet of living space within an existing structure, provided the applicant present redevelopment/renovation plans to the Code Enforcement Officer demonstrating how the redevelopment project will result in the number of residential units with two or more bedrooms being at least, if not more than, the number of units with two or more bedrooms before the density bonus was granted.
- b. If the project is provided a density bonus, the Code Enforcement Officer shall document the allowable density and number of units, in writing, for the Code Enforcement Office files.
- c. An applicant provided a density bonus for rental housing shall enter into a contractual agreement with the City of Biddeford requiring obligating that at least thirty percent (30%) of the additional units created shall be leased such that they do not exceed eighty percent (80%) of the Fair Market Rent (FMR) per bedroom size, as established annually by the U.S. Department of Housing and Urban Development (HUD). ~~them to complete the project in accordance with Maine housing quality standards and that those units are certified as such prior to granting an occupancy permit.~~ The contractual agreement shall be recorded at the York County Registry of Deeds, a copy of which provided to the Code Enforcement Office, prior to the issuance of any building permits. Rent restricted units will be annually monitored by the Planning and Development Department for contract compliance.

2. Condominium conversions/development:

- a. A property may be proposed for redevelopment/renovation from apartments into condominiums in accordance with 1. above.
- b. An applicant provided a density bonus for condominiums shall enter into a contractual agreement with the City of Biddeford obligating them to complete the project as condominiums to be offered for sale upon or before completion of the project in return for receiving the density bonus. The contractual agreement shall be recorded at the York County Registry of Deeds, a copy of which provided to the Code Enforcement Office, prior to the issuance of any building permits.
- c. The applicant agrees that if the project is converted to condominiums said units shall not be sold for a price that exceeds 125% of the York County median home price affordable to median income households as set annually by HUD for the City of Biddeford.

Q. ~~Lots in existence prior to the effective date of this ordinance are regarded as existing lots of record. In many cases, minimum lot size, road frontage and setbacks are not consistent with current standards. It is the intent of this section that properties in the OR Zone for which non-residential conversion is proposed shall not be handicapped by the nonconforming nature of such a lot or structure. Therefore, existing lots or structures that are nonconforming under the provisions of, Article IV-Exisitng non-conforming lots or structures~~ may be considered for conversion to nonresidential uses allowed in the OR Zone, provided that neither structure nor lot are made more nonconforming as a result of the conversion.

~~The following minimum standards shall apply for newly created lots within the OR Zone~~

- ~~1. Minimum lot size: 10,000 square feet.~~
- ~~2. Minimum frontage: 75 feet.~~
- ~~3. Minimum setbacks:~~
~~Front: 10 feet.~~
~~Side: 10 feet.~~
~~Rear: 10 feet.~~
~~From other streets: 15 feet.~~
- ~~4. Maximum setbacks: Front: 25 feet.~~
- ~~5. Maximum height: 35 feet~~

Part III (Land Development Regulations), Article VI (Performance Standards), Section 78 (Accessory dwelling units (ADUs):

B. Procedural requirements.

1. Review procedure:

- a. One ADU is permitted per residentially zoned parcel identified in (See Article V, Table A, Table of Land Uses.), except within the Coastal Residential (CR) Zone, including the RP and LR shoreland zoning overlay districts ~~within the CR Zone~~, where ADUs are not permitted. ADUs are also permitted on nonresidentially zoned parcels containing a single nonconforming (as to use) dwelling unit which was in existence as of January 1, 2017. A permit for an ADU may be issued by the Code Enforcement Office so long as all of the standards in this section are met.

May 18, 2021

Motion by Councilor Lessard, seconded by Councilor McCurry to grant the first reading of the ordinance amendment.

{NOTE: Councilor McCurry left the meeting}

Motion by Councilor Belanger, seconded by Councilor Lessard to amend by removing all references to ADU (Accessory Dwelling Units) from the ordinance amendment.

Vote: 3/2; Councilors Lessard and Emhiser opposed.

Councilors St. Cyr, Belanger and Ortiz in favor.

Amendment carries.

Motion by Councilor Lessard, seconded by Councilor Belanger to amend page 3, Section B. paragraph c. by adding, “or in the case that one unit is added to the property.”

Vote: 2/3; Councilors Lessard and Ortiz in favor.

Councilors Emhiser, St. Cyr and Belanger opposed.

Amendment fails.

Motion by Belanger, seconded by Councilor Lessard to amend page 3, Section B. paragraph c. by adding the word “additional units created”....

Vote: Unanimous.

Vote on first reading of ordinance as amended: Unanimous.

Biddeford City Council

Meeting Date: May 18, 2021

Meeting Time: 6:00 PM

Agenda Item No: 2021.43

Item Description: Amendments Related to Residential Uses

Submitted by: Mathew Eddy, Planning and Development Director
Greg Tansley, A.I.C.P., City Planner

Supporting Information/Documentation:

- See Attached Council Order
- See Attached Reference Map for Proposed Note B

Key Terms:

None

Executive Summary:

In summary, the amendments presented to the City Council, and supported by a majority of the Planning Board, provide the following:

- 1) Encourages additional residential units in Biddeford between West Brook and Interstate-95, from Downtown to the Industrial Parks. See Note B in the DRAFT amendments. The focus has now been transitioned into affordability and would apply to the R-1-A, R-1-B, R-2, R-3, MSRD-2, and OR Zones. To make this approach work for the R-1-A and R-1-B, need to allow duplex/two-family which they currently do not.
- 2) Relaxes (and clarifies) the dimensional requirements in the OR Zone along Route 1 between Downtown and Five-Points. This is an issue Code Enforcement and Planning have dealt with for some time, and we believe that the amendments will create an OR more reflective of its intent and the intent of the City Council with respect to housing.
- 3) Allow ADU's in the CR Zone ONLY along Route 9/Pool Road.

Detailed Review:

The City Council (Order 2021.9) had requested the Board revisit the Density Bonus provisions for the MSRD-2 Zone with a specific desire to incorporate affordability into the program as well to look for other zones it could be expanded to. Recommendations on expanding the Density Bonus provisions and changing the requirements to reflect affordability rather than quality (which now is being handled by the market and basic codes adherence) is presented in the amendments before you.

Further, the City Council (Order 2021.10) asked that we explore allowing additional unit(s) in other areas surrounding the Downtown, suggesting that lots within 90% of the required lot size be provided an additional unit for being “close” so long as the new units are kept affordable. Staff have been unable to find a way to address Council Order 2021.10 in a *practical* and a *legal* sense, but believe that this proposal largely accomplishes the same in that it encourages greater housing densities in the more urbanized areas of Biddeford. Adjusting to 90% as was suggested is a larger question that should follow the Comprehensive Planning process through an evaluation of the rural and growth areas of Biddeford. Creating a waiver if the lot size is “close” renders the underlying zoning district decisions somewhat irrelevant.

Not specifically requested by the City Council, but supported by Staff who feel this is consistent with the Council goals for housing, are also amendments to clarify and refine the OR zone requirements, and to expand Accessory Dwelling Units (ADUs) to those areas in the CR Zone along Route 9/Pool Road.

There was also some discussion regarding a recommendation from Staff that was not supported by the Planning Board. Not supported or included in these amendments was to change Duplex/Two-family uses in the RF and SR-1 Zones from Conditional Uses (“C”) to Permitted Uses (“P”). The Board indicated that it felt this should be something discussed following the Comprehensive Planning process.

We believe that the proposal before you generally represents a move forward towards the goals of the City Council with respect to Housing, while at the same time addressing some specific issues with the OR Zone requirements and a request raised by a constituent regarding ADU’s along Pool Road.

Funding Source:

- N/A

PlanningBoard/Staff Recommendation:

On May 5, 2021, following a Public Hearing, the Planning Board voted 3-1 (Benway, Tarpey, and Cantara in favor, Droggitis against) to recommend the attached Ordinance Amendments pass at the City Council.

The Planning Board included the following as their rationale for recommending this amendment be approved by the City Council, in that this proposal:

- 1) Addresses Council Order 2021.09 and 2021.10 by encouraging additional residential units in the built areas of Biddeford (not just the in the MSRD-2 Zone) and changes the focus for the density bonus provisions from quality (still achieved through the code compliance and the market) to affordability;

- 2) Relaxes (and clarifies) the dimensional requirements in the OR Zone along Route 1 between Downtown and Five-Points to better reflect the goals of the City Council with respect to housing; and
- 3) Expands the Accessory Dwelling Unit Ordinance to allow ADU's in the CR Zone along Route 9/Pool Road (only).

Proposed Zones for Note B:
Affordable Housing Bonus
Density

2021.46

IN BOARD OF CITY COUNCIL...JUNE 1, 2021

BE IT ORDAINED, by the City Council of the City of Biddeford that the Code of Ordinances, Chapter 42, Motor Vehicles and Traffic, Article IV Specific Street Regulations, **Section 42-59 Snow Emergency Parking Ban; Section 42-62 Identification and use of Municipal Parking Lots**, be amended by adding or deleting to read as follows, and to be effective on July 1, 2021:

Sec. 42-59 Snow emergency parking ban.

The following provisions shall apply during snow emergencies as declared by the Director of Public Works:

(1) When the Director of Public Works deems it necessary to allow for the safe and efficient removal of snow and ice from the public ways within the City, the Director may declare that a snow emergency exists. The Director of Public Works will announce the snow emergency by notifying the local radio and television media, and request that they make periodic announcements of the parking ban. The Director will state in his notice that during the hours of the emergency, parking of motor vehicles is prohibited on any way or municipal parking lot within the jurisdiction of the City, except that the municipal parking lots at the Community Center (Myrtle Street side only), Clifford Park East Biddeford Little League parking lot (on Hill Street), Public Access parking lot (on Pool Street) and Sullivan Street parking lot are open for parking during the period of the emergency at no fee, ~~and the Foss Street Parking Lot, Washington Street Parking Lot, Gas House Parking Lot, and the Water Street Parking Lot are open for parking during the period of the emergency on a pay-per-use permit only basis.~~

[Amended 12-18-2018 by Ord. No. 2018.149]

~~**(2)** For permit only lots, a permit may be obtained through self-service kiosks, mobile app when available or through the City Clerk's office. The form of permit to be displayed shall be the license plate referenced on the valid vehicle registration, appropriately recorded during the permitting process, and properly attached to the vehicle. Municipal parking permit holders must comply with all snow emergency parking ban notices and instructions regardless of the nature of the parking permit.~~

[Amended 12-18-2018 by Ord. No. 2018.149]

~~**(3)**~~ **(2)** A vehicle parked in violation of the declared snow emergency shall be towed at the owner's expense.

~~**(4)**~~ **(3)** Vehicles parked in the ~~Foss Street and Washington Street~~, Clifford Park, Community Center, ~~Gas House and Water Street~~ municipal parking lots as authorized by this section must be removed prior to 7:00 a.m. on the day of the end of the snow

emergency, and these municipal parking lots may not be used until they have been cleared of snow.

Sec. 42-62 Identification and use of municipal parking lots.

The following is a list of the municipal parking lots along with a description of their location and authorized use. For the purposes of this chapter, all municipal parking lots are considered as public ways as defined in M.R.S.A. § 29-A. No vehicle shall remain parked in a municipal public parking lot for more than 48 consecutive hours. A vehicle parked in violation of this section may be towed at the owner's expense.

~~Alfred Street Parking Lot, also known as the Blue Lot, refers to the City municipal parking lot that is adjacent to the 39 Alfred Street Police Station, and is bordered by Alfred Street, Foss Street, and the property line at 1 Pool Street and further described as Map 38, Lot 404.~~
[Amended 10-8-2019 by Ord. No. DC2019.14]

Row 1, which is adjacent to, and is parallel to, the police station, is reserved for police parking only. The first two spaces in Row 1 are reserved for, and shall be posted and clearly marked as, handicap parking.

~~The first two spaces in Row 2 are reserved for thirty minute police business.~~

~~A portion of Rows 2, 3 and 4 shall be reserved for permit parking available for monthly (Monday through Friday) permits, monthly (24/7) permits and monthly (nights and weekend) permits. The remaining spaces shall be available for short term parking on a rolling basis, with the first two hours for any vehicle of any calendar day at no charge.~~

City Hall Parking Lot shall be designated as the ways and parking spaces bordered by City Hall from Adams Street thence southerly along City Hall, thence westerly along the rear of City Hall and City Theater, thence westerly along properties identified as Map 38, Lots 134 and 134-1, thence easterly along property identified as Map 38, Lot 194, thence easterly along South Street to the Civil War Memorial traffic island, thence easterly on the northerly edge of the Civil War Memorial traffic island, thence northerly on the westerly edge of the Civil War Memorial traffic island, thence northerly along Adams Street to City Hall.

- (1) No vehicle shall be parked in the area designated as the City Hall parking lot between the hours of 8:00 a.m. and 5:00 p.m., unless such vehicle displays an official parking pass issued by the City Clerk, and displayed in a manner determined by the Clerk.
- (2) The City Clerk may issue official parking passes to municipal officials and employees.

- (3) Two spaces shall be posted and clearly marked and reserved for disability parking. One of the spaces shall be van accessible.
- (4) The area of the City Hall parking lot that is immediately adjacent to the Civil War Memorial, and is bordered by South Street, shall have one space marked and reserved for the City Clerk; one space marked and reserved for the City Manager; one space marked and reserved for the Mayor; with the remaining parking spaces reserved for use by municipal vehicles only between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday.
- (5) The area of the City Hall parking lot that is immediately adjacent to the City Hall building, and that is bordered by Adams Street, shall be designated and marked as follows: two spaces reserved for use by municipal vehicles only between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday, with the remaining spaces as one-hour parking for use by the general public to conduct business at City Hall.
- (6) The three parking stalls in the area of the City Hall parking lot that is closest to the rear entrance to City Hall building, and to City Theater, shall be limited to one-hour parking and reserved for City business only between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday.

Clifford Park Parking Lot is a City public parking lot that is located on Pool Street and is further identified as Map 39, Lot 334, with a physical address of 130 Pool Street.

One space shall be posted and clearly marked as reserved for disability parking.

No vehicle shall remain parked in this parking lot longer than 24 consecutive hours.

Community Center Parking Lots refers to the City public parking lots at the J. Richard Martin Community Center, located at 189 Alfred Street as identified on Map 34, Lot 228, and further described as the parking lot which is adjacent and parallel to the Community Center, and Myrtle Street on the east side; and the parking lot which is adjacent and parallel to the Community Center, and Clark Street on the west side.

Two spaces which shall be posted and clearly marked as handicap parking, located on the Clark Street side, at or near the handicap ramp, which is located at the northwest corner of the Community Center building.

Two spaces which shall be posted and clearly marked as handicap parking, located on the Myrtle Street side, at or near the rear of the Community Center building on the southeast corner.

Two spaces which shall be posted and clearly marked as ten-minute limited parking from 6:00 a.m. to 6:30 p.m., Monday through Friday, for YMCA Daycare, one located on left side of the main entrance to the Daycare 10 feet from the concrete curb and one located on right side of the main entrance to the Daycare.

~~Downtown Parking Lot, also known as the Yellow Lot, refers to the City public parking lot located at 17—21 Franklin Street and further described as Map 38, Lots 389 and 390.~~

~~The lot shall be reserved for hourly permit-only parking with the first two hours for any vehicle of any calendar day at no charge.~~

Two spaces which shall be posted and clearly marked as handicap parking.

Federal Street Parking Lot, also known as the Green Lot, is located on the corner of Franklin Street and Federal Street behind 25–27 Washington Street, and is exclusive of a strip of land located between 5–13 Washington Street and 25–27 Washington Street, and further described as Map 38, Lot 353-1.

The lot shall be reserved for long term permit only parking available for monthly (Monday through Friday) permits, monthly (24/7) permits, monthly (nights and weekend) permits, with the remainder available for short term parking on a rolling basis, except that eight spaces located adjacent to 5 Washington Street and further described as Map 38, Lot 352, shall be available as dedicated parking spaces.

Foss Street Parking Lot, also known as the Purple Lot, refers to the City public parking lot located at the formerly known street address numbers 5, 7, and 15 to 21 Foss Street, and as further described on City Tax Map 39, Lots 80 and 84.

The lot shall be designated for long term and short term permit only parking. Long term parking shall include availability for monthly (Monday through Friday) permits, monthly (24/7) permits, and monthly (nights and weekend) permits. The remaining spaces shall be available for short term parking on a rolling basis, with the first two hours for any vehicle of any calendar day at no charge. [Amended 10-8-2019 by Ord. No. DC2019.14]

No vehicle shall remain parked in this parking lot longer than 24 consecutive hours without a valid permit.

Franklin Street Parking Lot, also known as the Green Lot, refers to the City public parking lot located in the area of Franklin Street, Washington Street and parallel to Jefferson Street, and further described as Map 38, Lots 354, 355 and 360.

[Amended 8-27-2019 by Ord. No. DC2019.10]

The lot shall be designated as permit only parking available for monthly (Monday through Friday) permits, monthly (24/7) permits and the remainder available for short term and monthly (nights and weekend) permits, with the remainder available for short term parking on a rolling basis, except that the last six spaces beginning at a point approximately 20 feet south-southwesterly from the intersection of the north corner of 42 Franklin Street, and further described as Map 38, Lot 364, and extending approximately 141 feet southerly shall be available as two-hour parking with the remaining spaces available as thirty-minute parking spaces.

Ten spaces shall be posted and clearly marked as reserved for use by courthouse employees on scheduled court days, Monday through Friday from 7:00 a.m. to 5:00 p.m.

No vehicle shall remain parked in this parking lot longer than 24 consecutive hours without a valid permit.

Gas House Parking Lot, also known as the Maroon Lot, is a City public parking lot that is located on Water

~~Street and is situated between Mechanic's Park and the Waste Water Treatment Facility, and further described as Map 41, Lot 16.~~

~~The lot shall be designated as permit-only parking available for monthly (Monday through Friday) permits, monthly (24/7) permits, monthly (nights and weekend) permits, with the remainder available for short-term parking on a rolling basis. One space shall be posted and clearly marked as reserved for disability parking.~~

~~No vehicle shall remain parked in this parking lot longer than 24 consecutive hours without a valid permit.~~

Lincoln Street Parking Lot, a parcel of land, located at the northeast section of the intersection with Pearl Street, and further described as the former Maine Energy Executive Parking Lot at 3-11 Lincoln Street, having the dimensions of 74 feet $\pm$ in width (measured west to east) and 180 feet $\pm$ in length (measured south to north) [Added 11-21-2019 by Ord. No. DC2019.16]

~~Washington Street Parking Lot, also known as the Red Lot, refers to the City public parking lot located at 75 Washington Street and is more specifically identified as Map 38, Lot 312.~~

~~The lot shall be designated as permit-only parking available for monthly (Monday through Friday) permits, monthly (24/7) permits, monthly (nights and weekend) permits, with the remainder available for short-term parking on a rolling basis.~~

~~No vehicle shall remain parked in this parking lot longer than 24 consecutive hours without a valid permit.~~

~~Wastewater Treatment Facility Parking Lot, also known as the Brown Lot, refers to the City public parking lot located at the intersection of Water Street and Pike Street, and is more specifically identified as Map 41, Lot 1.~~

~~The lot shall be designated as permit-only parking available for monthly (Monday through Friday) permits, monthly (24/7) permits, monthly (nights and weekend) permits, with the remainder available for short-term parking on a rolling basis.~~

~~No vehicle shall remain parked in this parking lot longer than 24 consecutive hours without a valid permit.~~

~~Parking spaces marked and dedicated to short-term parking of 30 minutes or less shall be so marked and shall not require a permit within the designated permit-only parking lots.~~

~~For permit-only lots, a permit may be obtained through self-service kiosks, a mobile app when available or through the City Clerk's office. The form of permit to be displayed shall be the license plate referenced on the valid vehicle registration, appropriately recorded during the permitting process, and properly attached to the vehicle.~~

City Council

Meeting Date: June 1, 2021

Meeting Time: 6:00 p.m.

Agenda Item No: 6 a

Item Description: (2021.46) Amendment/Ch. 42, Motor Vehicles & Traffic/Sec. 42-59-Snow emergency parking ban; Sec. 42-62-Identification and use of municipal parking lots/Remove References to Paid/Color-Coordinated Parking Lots

Submitted by: Chief Roger P. Beaupre

Supporting Information/Documentation:

The list of items attached to Order is to delete existing language to coincide with the take-over of the Surface Parking Lots

Key Terms:

N/A

Executive Summary:

Control and management of the surface parking lots will be taken over by a Private Concern on July 1, 2021 as part of a signed agreement between the City and the Parking Garage management group. Therefore, existing parking ordinances that currently regulate enforcement and fees for using these lots must be deleted in order to avoid conflicting ordinance language

Detailed Review:

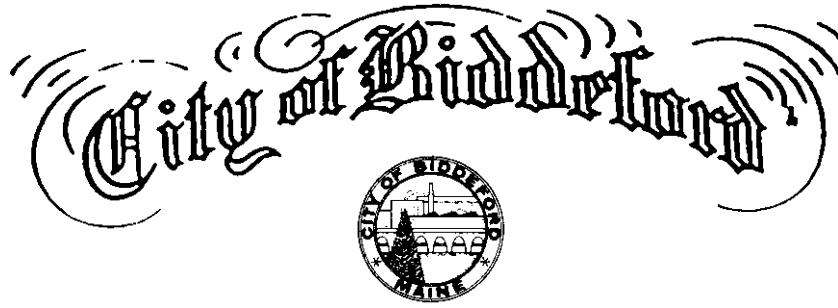

Included above

N/A

Staff Recommendation:

Make recommended changes

2021.47

IN BOARD OF CITY COUNCIL...JUNE 1, 2021

BE IT ORDERED, that the City Council of the City of Biddeford does hereby approve the award of the Expansion of Dispatch Console Positions Project at the Biddeford Police Department to *Watson Consoles* in an amount not to exceed **\$21,282.00**, with funds to come from the Unassigned Fund Balance.

NOTE: The Finance Committee will consider this item at their June 1, 2021 meeting and send their recommendation to the City Council.

City Council

Meeting Date: June 1, 2021

Meeting Time: 6:00 p.m.

Agenda Item No:

Item Description: Expansion of Dispatch Console Postions

Submitted by: Chief Roger P. Beaupre

Supporting Information/Documentation:

Attached Bids

Key Terms:

N/A

Executive Summary:

There are currently four (4) dispatch consoles within the Biddeford Communications Center, and we are seeking to expand the number of seats to five (5). In addition to dispatching for Biddeford Fire and Police, the Center also services the communities of Alfred, Arundel, Dayton, Hollis, Lyman, Saco and Waterboro. The Center has sufficient capacity to add a fifth console, but require "moving down" the existing consoles for a proper fit.

Detailed Review:

Biddeford has invested a significant amount of resources in updating its Communication Center radio system to meet increasing demand on services. For years, discussion has centered around a discussion with the City of Saco towards greater consolidation of dispatching services, and other communities have expressed a desire to have the Biddeford Center dispatch for them. Since we are currently upgrading our radio system, it seems appropriate that we add a fifth dispatch position at this time, in order to be in a better position for expansion. Additionally, the fifth position would be utilized by the Center's dispatch supervisor, and would afford greater flexibility to handle serious emergency situations, such as natural disasters or other major events.

Funding Source:

Funding for this project would be from the current Fiscal Year's Unassigned Fund Balance in the amount of \$21,282.00

Staff Recommendation:

Bids were solicited from manufacturer's of Public Safety Consoles. Watson Consoles was the Center's original supplier of the four position we currently have, and their proposal will blend in nicely with

the existing furniture. As it turns out, Watson's bid is at \$21,282.00 and includes moving the existing consoles to accommodate the fifth position. The other bid from XYBIX is for \$26,048.41

					Quote Total:		\$26,048.41	

Note 1:

All quoted taxes are estimated. Any applicable taxes, fees, permits, etc. must be added to this quote.

Note 2:

Where installation is listed on quote it is based in non-union labor and on one trip for installation only. Client is responsible for coordination of Technicians and other Vendors/Contractors. Waiting time will be charged at the rate of \$75 per man hour straight time and \$115 per man hour for OT plus subsistence expenses.

Additionally, this quote is based upon a remodel in an existing space and/or new building - completely finished with a Certificate of Occupancy. Any project where the General Contractor is still on the job is subject to additional charges.

We appreciate this opportunity to provide this quote. Our goal is to substantially improve working conditions for your valuable staff. We look forward to meeting with you to review this proposal in detail. In the meantime please don't hesitate to call us with any questions.

Biddeford City Council Committee of the Whole

Meeting Date: May 4, 1021

Meeting Time: 6:00

Agenda Item No:

Item Description: Parking Space Easements-Access Mobile Food Court at 64 Alfred Street

Submitted by: Mathew Eddy

Supporting Information/Documentation:

Attached Plan from the developer Steven Liautaud; Robert Metcalf designer.

Key Terms:

Mobile food service operations are defined as a subset of restaurants, with further clarifications under the Performance Standards of Article VI, Section 56 of the Land Use Regulations. See Attachment 1

Executive Summary:

This request is specifically to remove for public use and give easement access over two parking spaces currently marked 2 hour parking (free) on the Franklin Street extension that runs between Louis's pizza and Pool/Jefferson Street.

Detailed Review:

Steven Liautaud proposes the development of a "Food Court" at 64 Alfred Street, at the corner of Pool and Alfred. He presently is under contract with Northeast Savings Bank (across the street on Alfred/Pool) to purchase the vacant property at the corner. To move forward, he is required to receive Site Plan Review approval. To begin Site Plan Approval, he must be able to show access to the site. Access from Alfred or Jefferson is not available/recommended because of the intersection alignments and necessary curb cuts required. Access from City property via the parking lot is the only option.

The property has been vacant since a fire destroyed the property. It has been difficult to develop, because of layout and location, as well as the backfill used to fill the foundation. We have mostly discussed proposals for parking, but its configuration and access limits that potential. With activity on the corner, it will create and fill what is otherwise a dead space.

Mr. Liautaud is proposing a mobile food court operation; attached is the plan and a further description. There will be seven food trucks/carts coming in and out of the site each day. Access for food court trailers, which will not be stored on site, will be through the center driveway opening via the two parking spaces. Codes and Planning and Development have had initial

reviews of the project and have scaled the number back to provide adequate distances. The proposal includes the location of a beer tent, an enclosed area for waste storage, and public restrooms.

The developer has been directed to identify off-site parking for the food truck operators/employees; he is aware of the parking garage being available. Parking for customers, per the ordinance, would be provided through on street and off-street parking, similar to other restaurants in the downtown.

The general area of the two spaces are the center access way that on the plan notes show as a “board fence”. The final location of the two spaces will be further designed once the developer is permitted to proceed with formal Site Plan Approval. He cannot proceed until receiving easement access to the site.

The unique part of this proposal is the development of restrooms for the facility (found against the Sheltra building). While intended for the use of the food court, it creates a downtown restroom opportunity where none exists now.

The food court industry is growing in Maine. The opportunity to change over food cart operators daily will provide a mixture of food options for the community. The food court may provide a unique attraction to the downtown food industry and fuel the City’s further redevelopment. The developer has contacted neighbors in the area and has not received any objections, to my knowledge.

Funding Source: N/A

Staff Recommendation: Recommend consideration

Attachment 2

From Section 56 of the Performance Standards: Restaurants

- F. Mobile food service operations shall comply with the State of Maine rules relating to eating and lodging places, as periodically amended, and shall require a victualer's permit from the municipal officers.
- a. Further, mobile food service operations, preparing food on-site, unless permanently connected to public utilities and approved by the Planning Board, shall not be left on-site or displayed, or left in public view, in the location of business during nonbusiness hours, unless otherwise conditioned by the City Council in their specific permit/licensing process.
 - b. The Building Inspector shall review mobile food service operations, preparing food on-site, to ensure, as a minimum, the following:
 1. The placement of the vehicle:
 - a. Shall not hinder vehicular traffic or cause traffic congestion; and
 - b. Shall not hinder, or interfere with, pedestrian traffic; and
 - c. Shall not block or otherwise hinder access to or from private property; and
 - d. Shall not adversely impact on abutting properties in regards to:
 - (1) Noise.
 - (2) Odor, fumes or smoke.
 - (3) Light and glare.
 2. The operator shall have written permission from the property owner to locate the vehicle on said property.
 3. The operator shall have available, and under written agreement, at least three off-street parking spaces. In cases where on-street parking is available immediately in front, the operator must have one off-street parking space for any vehicle belonging to an employee working on a given shift.
 4.
 - a. The operator shall provide at least one fifty-five-gallon covered trash receptacle, or similar sized container, to hold wastes and debris. No paper, food or other wastes shall be allowed to accumulate on-site.
 - b. The waste container shall be emptied at least daily into an approved commercial dumpster (it being emptied by a licensed hauler on a regular basis) or other suitable and approved means of transport away from the site. It shall be the responsibility of the operator to ensure that all wastes are handled and disposed of properly.
 5. The operator shall ensure that there is an adequate supply of potable water for cleaning equipment and the preparation of foods.
 6. The operator shall ensure that there is an adequate and safe source of electrical power.
 7. The operator shall ensure that all storage of food supplies and other business material is within the vehicle or other container secured to the vehicle. No loose material shall be permitted outside of the vehicle.
 8. There shall be no signs placed on sidewalks or other rights-of-way. No temporary or mobile signs shall be allowed.
 9. The trailer, or vehicle, being used shall be in good upkeep and provide a neat appearance.

City of Biddeford, Maine

The Office of
City Manager

James A. Bennett

Email: jbennett@biddefordmaine.org

MEMORANDUM

TO:	Honorable Mayor Casavant Honorable City Council
FROM:	James A. Bennett, City Manager
DATE:	May 27, 2021
RE:	June 1, 2021 Committee of the Whole ARPA Discussion

On your agenda for Tuesday evening is a discussion about the America Rescue Plan Act funds. We are still operating under the assumption that we will receive \$11.7 million divided evenly over the next two years.

Staff and I still in the process of reviewing the interim final rules that have been issued. Included with your agenda package is a copy of those rules. In addition, there are a couple of links to additional resources.

In the April 16, 2021 memo regarding the approach to the budget, I suggest a couple of different uses of ARPA funds. I have provided a copy of that text below (*in italics*). Of significance for your discussion on Tuesday is the \$3.1 million of estimated unallocated funds. The rules clearly contemplate and allow ARPA funds to be transferred to outside agencies (within the given restrictions). The Mayor, staff and I have been receiving inquiries regarding this allowance.

Your discussion on Tuesday should be considered a brainstorming session. I suspect that this will be the first of a couple such sessions. From my perspective, there is not expectation of any clear directive on this issue to staff.

American Recovery Plan Funds

There is a lot that remains unknown about the ARP funds at the time of this memo. Based on the published information, the following key assumptions are made in the preparation of the recommendations made within.

- 1. The City will directly receive approximately \$11.7 million dollars; the first allocation (50% of \$5.8 million) on or before May 11. The second half of the funds will arrive sometime after May 11, 2022.*
- 2. The City has up to December 31, 2024 to use the funds.*
- 3. The funds may not be used to reduce the tax burden in any year that the funds are used. The definition of tax burden remains uncertain.*
- 4. The City may use the funds to recover from any loss revenues directly related to COVID impacts. It may also use the funds to cover any direct costs associated with COVID impacts. These funds, once identified and allocated, become unencumbered by the balance of the rules.*

205 Main Street

Biddeford, ME 04005

Phone: 207.284.9313

Fax 207.571.0678

*The City of Biddeford is an equal opportunity provider. To file a complaint, write to
Diana Depaolo, Human Resource Director, 205 Main Street Biddeford, ME 04005, or call (207) 286-0593.*

5. *There appears to be clear ability to use the funds for sewer expenditures. In the same light, uses for water and broadband/connectivity issues also seem certain.*
6. *There is vague language regarding the ability to use the funds for negative economic impacts that include the ability to make direct assistance to others.*

The current suggested uses of some of the funds include the following:

- a. *Identify the current shortfall in WWTP user fees for the FY20 and FY21. Use those funds to make the WWTP fund whole for the current year and to continue operations at the plant for FY21 without increasing any rate, reducing service levels or capital investment. The combined total is still being calculated. The current estimate is \$1.5 million. Depending on how quickly the WWTP flows return, some funds may be needed in FY23. On the other hand, if the flows return in FY22, the actual ARP funds used would be reduced because of the rules.*
- b. *Identify all lost revenues and expenses (beyond WWTP) in order to allow this funds to become available without the otherwise ARP restrictions. Like the WWTP impacts, staff is still calculating those funds but believes that the total may approach \$1,000,000 for the first allocation.*
- c. *Use \$1.5 million of the funds instead of borrowing the previously approved revenue bond. This will eliminate approximately \$175,000 of debt payments annually in the WWTP fund for the next 10 years that can be otherwise used. In the redrafted FY22 WWTP budget, those funds are being targeted for additional capital.*
- d. *Use approximately \$450,000 to replace the Vactor truck for sewer operations.*
- e. *The balance of the year one funds (\$2.3 million) remain available for further deliberation by the Council after the rules are issued. Further, the expectation is those funds will not have a direct impact on either the general fund or the WWTP fund*
- f. *Strongly consider using up to \$5 million of the year 2 ARP funds for CSO work in order to reduce the approved borrowing of \$10 million. If supported, it would reduce the FY22 new debt payment (interest only) by \$138,333 or another \$0.05. In FY23, the new projected increase in debt payments of \$1,355,000 would be reduced by \$387,143 or \$0.16 on the tax rate. The City should then issue the additional \$5 million in authorized debt in 3 to 4 years. This recommendation also includes factoring in the IRS regulations limiting how long tax exempt funds can remain unspent from the time of borrowing.*
- g. *Combined, there would be a balance of \$3.1 million of ARP funds (over the two years) for further Council deliberations.*

FACT SHEET: The Coronavirus State and Local Fiscal Recovery Funds Will Deliver \$350 Billion for State, Local, Territorial, and Tribal Governments to Respond to the COVID-19 Emergency and Bring Back Jobs

May 10, 2021

Aid to state, local, territorial, and Tribal governments will help turn the tide on the pandemic, address its economic fallout, and lay the foundation for a strong and equitable recovery

Today, the U.S. Department of the Treasury announced the launch of the Coronavirus State and Local Fiscal Recovery Funds, established by the American Rescue Plan Act of 2021, to provide \$350 billion in emergency funding for eligible state, local, territorial, and Tribal governments. Treasury also released details on how these funds can be used to respond to acute pandemic response needs, fill revenue shortfalls among these governments, and support the communities and populations hardest-hit by the COVID-19 crisis. With the launch of the Coronavirus State and Local Fiscal Recovery Funds, eligible jurisdictions will be able to access this funding in the coming days to address these needs.

State, local, territorial, and Tribal governments have been on the frontlines of responding to the immense public health and economic needs created by this crisis – from standing up vaccination sites to supporting small businesses – even as these governments confronted revenue shortfalls during the downturn. As a result, these governments have endured unprecedented strains, forcing many to make untenable choices between laying off educators, firefighters, and other frontline workers or failing to provide other services that communities rely on. Faced with these challenges, state and local governments have cut over 1 million jobs since the beginning of the crisis. The experience of prior economic downturns has shown that budget pressures like these often result in prolonged fiscal austerity that can slow an economic recovery.

To support the immediate pandemic response, bring back jobs, and lay the groundwork for a strong and equitable recovery, the American Rescue Plan Act of 2021 established the Coronavirus State and Local Fiscal Recovery Funds, designed to deliver \$350 billion to state, local, territorial, and Tribal governments to bolster their response to the COVID-19 emergency and its economic impacts. Today, Treasury is launching this much-needed relief to:

- Support urgent COVID-19 response efforts to continue to decrease spread of the virus and bring the pandemic under control;
- Replace lost public sector revenue to strengthen support for vital public services and help retain jobs;
- Support immediate economic stabilization for households and businesses; and,
- Address systemic public health and economic challenges that have contributed to the unequal impact of the pandemic on certain populations.

The Coronavirus State and Local Fiscal Recovery Funds provide substantial flexibility for each jurisdiction to meet local needs—including support for households, small businesses, impacted industries, essential workers, and the communities hardest-hit by the crisis. These funds also deliver resources that recipients can invest in building, maintaining, or upgrading their water, sewer, and broadband infrastructure.

Starting today, eligible state, territorial, metropolitan city, county, and Tribal governments may request Coronavirus State and Local Fiscal Recovery Funds through the Treasury Submission Portal. Concurrent with this program launch, Treasury has published an Interim Final Rule that implements the provisions of this program.

FUNDING AMOUNTS

The American Rescue Plan provides a total of \$350 billion in Coronavirus State and Local Fiscal Recovery Funds to help eligible state, local, territorial, and Tribal governments meet their present needs and build the foundation for a strong recovery. Congress has allocated this funding to tens of thousands of jurisdictions. These allocations include:

Type	Amount (\$ billions)
States & District of Columbia	\$195.3
Counties	\$65.1
Metropolitan Cites	\$45.6
Tribal Governments	\$20.0
Territories	\$4.5
Non-Entitlement Units of Local Government	\$19.5

Treasury expects to distribute these funds directly to each state, territorial, metropolitan city, county, and Tribal government. Local governments that are classified as non-entitlement units will receive this funding through their applicable state government. Treasury expects to provide further guidance on distributions to non-entitlement units next week.

Local governments should expect to receive funds in two tranches, with 50% provided beginning in May 2021 and the balance delivered 12 months later. States that have experienced a net increase in the unemployment rate of more than 2 percentage points from February 2020 to the latest available data as of the date of certification will receive their full allocation of funds in a single payment; other states will receive funds in two equal tranches. Governments of U.S. territories will receive a single payment. Tribal governments will receive two payments, with the first payment available in May and the second payment, based on employment data, to be delivered in June 2021.

USES OF FUNDING

Coronavirus State and Local Fiscal Recovery Funds provide eligible state, local, territorial, and Tribal governments with a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, more equitable economy as the country recovers. Within the categories of eligible uses, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities. Recipients may use Coronavirus State and Local Fiscal Recovery Funds to:

- **Support public health expenditures**, by funding COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff;
- **Address negative economic impacts caused by the public health emergency**, including economic harms to workers, households, small businesses, impacted industries, and the public sector;
- **Replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic;
- **Provide premium pay for essential workers**, offering additional support to those who have borne and will bear the greatest health risks because of their service in critical infrastructure sectors; and,
- **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet.

Within these overall categories, Treasury’s Interim Final Rule provides guidelines and principles for determining the types of programs and services that this funding can support, together with examples of allowable uses that recipients may consider. As described below, Treasury has also designed these provisions to take into consideration the disproportionate impacts of the COVID-19 public health emergency on those hardest-hit by the pandemic.

1. Supporting the public health response

Mitigating the impact of COVID-19 continues to require an unprecedented public health response from state, local, territorial, and Tribal governments. Coronavirus State and Local Fiscal Recovery Funds provide resources to meet these needs through the provision of care for those impacted by the virus and through services that address disparities in public health that have been exacerbated by the pandemic. Recipients may use this funding to address a broad range of public health needs across COVID-19 mitigation, medical expenses, behavioral healthcare, and public health resources. Among other services, these funds can help support:

- **Services and programs to contain and mitigate the spread of COVID-19, including:**
 - ✓ Vaccination programs
 - ✓ Medical expenses
 - ✓ Testing
 - ✓ Contact tracing
 - ✓ Isolation or quarantine
 - ✓ PPE purchases
 - ✓ Support for vulnerable populations to access medical or public health services
 - ✓ Public health surveillance (e.g., monitoring for variants)
 - ✓ Enforcement of public health orders
 - ✓ Public communication efforts
 - ✓ Enhancement of healthcare capacity, including alternative care facilities
 - ✓ Support for prevention, mitigation, or other services in congregate living facilities and schools
 - ✓ Enhancement of public health data systems
 - ✓ Capital investments in public facilities to meet pandemic operational needs
 - ✓ Ventilation improvements in key settings like healthcare facilities

- **Services to address behavioral healthcare needs exacerbated by the pandemic, including:**
 - ✓ Mental health treatment
 - ✓ Substance misuse treatment
 - ✓ Other behavioral health services
 - ✓ Hotlines or warmlines
 - ✓ Crisis intervention
 - ✓ Services or outreach to promote access to health and social services
- **Payroll and covered benefits expenses** for public health, healthcare, human services, public safety and similar employees, to the extent that they work on the COVID-19 response. For public health and safety workers, recipients can use these funds to cover the full payroll and covered benefits costs for employees or operating units or divisions primarily dedicated to the COVID-19 response.

2. **Addressing the negative economic impacts caused by the public health emergency**

The COVID-19 public health emergency resulted in significant economic hardship for many Americans. As businesses closed, consumers stayed home, schools shifted to remote education, and travel declined precipitously, over 20 million jobs were lost between February and April 2020. Although many have since returned to work, as of April 2021, the economy remains more than 8 million jobs below its pre-pandemic peak, and more than 3 million workers have dropped out of the labor market altogether since February 2020.

To help alleviate the economic hardships caused by the pandemic, Coronavirus State and Local Fiscal Recovery Funds enable eligible state, local, territorial, and Tribal governments to provide a wide range of assistance to individuals and households, small businesses, and impacted industries, in addition to enabling governments to rehire public sector staff and rebuild capacity. Among these uses include:

- **Delivering assistance to workers and families**, including aid to unemployed workers and job training, as well as aid to households facing food, housing, or other financial insecurity. In addition, these funds can support survivor's benefits for family members of COVID-19 victims.
- **Supporting small businesses**, helping them to address financial challenges caused by the pandemic and to make investments in COVID-19 prevention and mitigation tactics, as well as to provide technical assistance. To achieve these goals, recipients may employ this funding to execute a broad array of loan, grant, in-kind assistance, and counseling programs to enable small businesses to rebound from the downturn.
- **Speeding the recovery of the tourism, travel, and hospitality sectors**, supporting industries that were particularly hard-hit by the COVID-19 emergency and are just now beginning to mend. Similarly impacted sectors within a local area are also eligible for support.
- **Rebuilding public sector capacity**, by rehiring public sector staff and replenishing unemployment insurance (UI) trust funds, in each case up to pre-pandemic levels. Recipients may also use this funding to build their internal capacity to successfully implement economic relief programs, with investments in data analysis, targeted outreach, technology infrastructure, and impact evaluations.

3. Serving the hardest-hit communities and families

While the pandemic has affected communities across the country, it has disproportionately impacted low-income families and communities of color and has exacerbated systemic health and economic inequities. Low-income and socially vulnerable communities have experienced the most severe health impacts. For example, counties with high poverty rates also have the highest rates of infections and deaths, with 223 deaths per 100,000 compared to the U.S. average of 175 deaths per 100,000.

Coronavirus State and Local Fiscal Recovery Funds allow for a broad range of uses to address the disproportionate public health and economic impacts of the crisis on the hardest-hit communities, populations, and households. Eligible services include:

- **Addressing health disparities and the social determinants of health**, through funding for community health workers, public benefits navigators, remediation of lead hazards, and community violence intervention programs;
- **Investments in housing and neighborhoods**, such as services to address individuals experiencing homelessness, affordable housing development, housing vouchers, and residential counseling and housing navigation assistance to facilitate moves to neighborhoods with high economic opportunity;
- **Addressing educational disparities** through new or expanded early learning services, providing additional resources to high-poverty school districts, and offering educational services like tutoring or afterschool programs as well as services to address social, emotional, and mental health needs; and,
- **Promoting healthy childhood environments**, including new or expanded high quality childcare, home visiting programs for families with young children, and enhanced services for child welfare-involved families and foster youth.

Governments may use Coronavirus State and Local Fiscal Recovery Funds to support these additional services if they are provided:

- within a Qualified Census Tract (a low-income area as designated by the Department of Housing and Urban Development);
- to families living in Qualified Census Tracts;
- by a Tribal government; or,
- to other populations, households, or geographic areas disproportionately impacted by the pandemic.

4. Replacing lost public sector revenue

State, local, territorial, and Tribal governments that are facing budget shortfalls may use Coronavirus State and Local Fiscal Recovery Funds to avoid cuts to government services. With these additional resources, recipients can continue to provide valuable public services and ensure that fiscal austerity measures do not hamper the broader economic recovery.

Many state, local, territorial, and Tribal governments have experienced significant budget shortfalls, which can yield a devastating impact on their respective communities. Faced with budget shortfalls and pandemic-related uncertainty, state and local governments cut staff in all 50 states. These budget shortfalls and staff cuts are particularly problematic at present, as these entities are on the front lines of battling the COVID-19 pandemic and helping citizens weather the economic downturn.

Recipients may use these funds to replace lost revenue. Treasury's Interim Final Rule establishes a methodology that each recipient can use to calculate its reduction in revenue. Specifically, recipients will compute the extent of their reduction in revenue by comparing their actual revenue to an alternative representing what could have been expected to occur in the absence of the pandemic. Analysis of this expected trend begins with the last full fiscal year prior to the public health emergency and projects forward at either (a) the recipient's average annual revenue growth over the three full fiscal years prior to the public health emergency or (b) 4.1%, the national average state and local revenue growth rate from 2015-18 (the latest available data).

For administrative convenience, Treasury's Interim Final Rule allows recipients to presume that any diminution in actual revenue relative to the expected trend is due to the COVID-19 public health emergency. Upon receiving Coronavirus State and Local Fiscal Recovery Funds, recipients may immediately calculate the reduction in revenue that occurred in 2020 and deploy funds to address any shortfall. Recipients will have the opportunity to re-calculate revenue loss at several points through the program, supporting those entities that experience a lagged impact of the crisis on revenues.

Importantly, once a shortfall in revenue is identified, recipients will have broad latitude to use this funding to support government services, up to this amount of lost revenue.

5. Providing premium pay for essential workers

Coronavirus State and Local Fiscal Recovery Funds provide resources for eligible state, local, territorial, and Tribal governments to recognize the heroic contributions of essential workers. Since the start of the public health emergency, essential workers have put their physical well-being at risk to meet the daily needs of their communities and to provide care for others.

Many of these essential workers have not received compensation for the heightened risks they have faced and continue to face. Recipients may use this funding to provide premium pay directly, or through grants to private employers, to a broad range of essential workers who must be physically present at their jobs including, among others:

- | | |
|---|---|
| ✓ Staff at nursing homes, hospitals, and home-care settings | ✓ Truck drivers, transit staff, and warehouse workers |
| ✓ Workers at farms, food production facilities, grocery stores, and restaurants | ✓ Childcare workers, educators, and school staff |
| ✓ Janitors and sanitation workers | ✓ Social service and human services staff |
| ✓ Public health and safety staff | |

Treasury's Interim Final Rule emphasizes the need for recipients to prioritize premium pay for lower income workers. Premium pay that would increase a worker's total pay above 150% of the greater of the state or county average annual wage requires specific justification for how it responds to the needs of these workers.

In addition, employers are both permitted and encouraged to use Coronavirus State and Local Fiscal Recovery Funds to offer retrospective premium pay, recognizing that many essential workers have not yet received additional compensation for work performed. Staff working for third-party contractors in eligible sectors are also eligible for premium pay.

6. Investing in water and sewer infrastructure

Recipients may use Coronavirus State and Local Fiscal Recovery Funds to invest in necessary improvements to their water and sewer infrastructures, including projects that address the impacts of climate change.

Recipients may use this funding to invest in an array of drinking water infrastructure projects, such as building or upgrading facilities and transmission, distribution, and storage systems, including the replacement of lead service lines.

Recipients may also use this funding to invest in wastewater infrastructure projects, including constructing publicly-owned treatment infrastructure, managing and treating stormwater or subsurface drainage water, facilitating water reuse, and securing publicly-owned treatment works.

To help jurisdictions expedite their execution of these essential investments, Treasury's Interim Final Rule aligns types of eligible projects with the wide range of projects that can be supported by the Environmental Protection Agency's Clean Water State Revolving Fund and Drinking Water State Revolving Fund. Recipients retain substantial flexibility to identify those water and sewer infrastructure investments that are of the highest priority for their own communities.

Treasury's Interim Final Rule also encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions.

7. Investing in broadband infrastructure

The pandemic has underscored the importance of access to universal, high-speed, reliable, and affordable broadband coverage. Over the past year, millions of Americans relied on the internet to participate in remote school, healthcare, and work.

Yet, by at least one measure, 30 million Americans live in areas where there is no broadband service or where existing services do not deliver minimally acceptable speeds. For millions of other Americans, the high cost of broadband access may place it out of reach. The American Rescue Plan aims to help remedy these shortfalls, providing recipients with flexibility to use Coronavirus State and Local Fiscal Recovery Funds to invest in broadband infrastructure.

Recognizing the acute need in certain communities, Treasury's Interim Final Rule provides that investments in broadband be made in areas that are currently unserved or underserved—in other words, lacking a wireline connection that reliably delivers minimum speeds of 25 Mbps download and 3 Mbps upload. Recipients are also encouraged to prioritize projects that achieve last-mile connections to households and businesses.

Using these funds, recipients generally should build broadband infrastructure with modern technologies in mind, specifically those projects that deliver services offering reliable 100 Mbps download and 100

Mbps upload speeds, unless impracticable due to topography, geography, or financial cost. In addition, recipients are encouraged to pursue fiber optic investments.

In view of the wide disparities in broadband access, assistance to households to support internet access or digital literacy is an eligible use to respond to the public health and negative economic impacts of the pandemic, as detailed above.

8. Ineligible Uses

Coronavirus State and Local Fiscal Recovery Funds provide substantial resources to help eligible state, local, territorial, and Tribal governments manage the public health and economic consequences of COVID-19. Recipients have considerable flexibility to use these funds to address the diverse needs of their communities.

To ensure that these funds are used for their intended purposes, the American Rescue Plan Act also specifies two ineligible uses of funds:

- **States and territories may not use this funding to directly or indirectly offset a reduction in net tax revenue due to a change in law from March 3, 2021 through the last day of the fiscal year in which the funds provided have been spent.** The American Rescue Plan ensures that funds needed to provide vital services and support public employees, small businesses, and families struggling to make it through the pandemic are not used to fund reductions in net tax revenue. Treasury's Interim Final Rule implements this requirement. If a state or territory cuts taxes, they must demonstrate how they paid for the tax cuts from sources other than Coronavirus State Fiscal Recovery Funds—by enacting policies to raise other sources of revenue, by cutting spending, or through higher revenue due to economic growth. If the funds provided have been used to offset tax cuts, the amount used for this purpose must be paid back to the Treasury.
- **No recipient may use this funding to make a deposit to a pension fund.** Treasury's Interim Final Rule defines a "deposit" as an extraordinary contribution to a pension fund for the purpose of reducing an accrued, unfunded liability. While pension deposits are prohibited, recipients may use funds for routine payroll contributions for employees whose wages and salaries are an eligible use of funds.

Treasury's Interim Final Rule identifies several other ineligible uses, including funding debt service, legal settlements or judgments, and deposits to rainy day funds or financial reserves. Further, general infrastructure spending is not covered as an eligible use outside of water, sewer, and broadband investments or above the amount allocated under the revenue loss provision. While the program offers broad flexibility to recipients to address local conditions, these restrictions will help ensure that funds are used to augment existing activities and address pressing needs.

DEPARTMENT OF THE TREASURY

RIN 1505-AC77

Coronavirus State and Local Fiscal Recovery Funds

AGENCY: Department of the Treasury

ACTION: Interim Final Rule

SUMMARY: The Secretary of the Treasury (Treasury) is issuing this Interim Final Rule to implement the Coronavirus State Fiscal Recovery Fund and the Coronavirus Local Fiscal Recovery Fund established under the American Rescue Plan Act.

DATES: *Effective date:* The provisions in this Interim Final Rule are effective [____], 2021.

Comment date: Comments must be received on or before [____], 2021.

ADDRESSES: Please submit comments electronically through the Federal eRulemaking Portal:

<http://www.regulations.gov> [(if hard copy, preferably an original and two copies to the [Office of the Undersecretary for Domestic Finance], Attention: [Name], Room [#####] MT, Department of the Treasury, 1500 Pennsylvania Avenue, NW, Washington, DC 20220. Because postal mail may be subject to processing delay, it is recommended that comments be submitted electronically.] All comments should be captioned with “Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule Comments.” Please include your name, organization affiliation, address, email address and telephone number in your comment. Where appropriate, a comment should include a short executive summary (no more than [#] single-spaced pages).] In general, comments received will be posted on <http://www.regulations.gov> without change, including any business or personal information provided. Comments received, including attachments and other supporting materials, will be part of the public record and subject to public

disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

SUPPLEMENTARY INFORMATION:

I. Background Information

A. Overview

Since the first case of coronavirus disease 2019 (COVID-19) was discovered in the United States in January 2020, the disease has infected over 32 million and killed over 575,000 Americans.¹ The disease has impacted every part of life: as social distancing became a necessity, businesses closed, schools transitioned to remote education, travel was sharply reduced, and millions of Americans lost their jobs. In April 2020, the national unemployment rate reached its highest level in over seventy years following the most severe month-over-month decline in employment on record.² As of April 2021, there were still 8.2 million fewer jobs than before the pandemic.³ During this time, a significant share of households have faced food and housing insecurity.⁴ Economic disruptions impaired the flow of credit to households, State and

local governments, and businesses of all sizes.⁵ As businesses weathered closures and sharp declines in revenue, many were forced to shut down, especially small businesses.⁶

Amid this once-in-a-century crisis, State, territorial, Tribal, and local governments (State, local, and Tribal governments) have been called on to respond at an immense scale. Governments have faced myriad needs to prevent and address the spread of COVID-19, including testing, contact tracing, isolation and quarantine, public communications, issuance and enforcement of health orders, expansions to health system capacity like alternative care facilities, and in recent months, a massive nationwide mobilization around vaccinations. Governments also have supported major efforts to prevent COVID-19 spread through safety measures in settings like nursing homes, schools, congregate living settings, dense worksites, incarceration settings, and public facilities. The pandemic's impacts on behavioral health, including the toll of pandemic-related stress, have increased the need for behavioral health resources.

At the same time, State, local and Tribal governments launched major efforts to address the economic impacts of the pandemic. These efforts have been tailored to the needs of their communities and have included expanded assistance to unemployed workers; food assistance;

rent, mortgage, and utility support; cash assistance; internet access programs; expanded services to support individuals experiencing homelessness; support for individuals with disabilities and older adults; and assistance to small businesses facing closures or revenue loss or implementing new safety measures.

In responding to the public health emergency and its negative economic impacts, State, local, and Tribal governments have seen substantial increases in costs to provide these services, often amid substantial declines in revenue due to the economic downturn and changing economic patterns during the pandemic.⁷ Facing these budget challenges, many State, local, and Tribal governments have been forced to make cuts to services or their workforces, or delay critical investments. From February to May of 2020, State, local, and Tribal governments reduced their workforces by more than 1.5 million jobs and, in April of 2021, State, local, and Tribal government employment remained nearly 1.3 million jobs below pre-pandemic levels.⁸ These cuts to State, local, and Tribal government workforces come at a time when demand for government services is high, with State, local, and Tribal governments on the frontlines of fighting the pandemic. Furthermore, State, local, and Tribal government austerity measures can hamper overall economic growth, as occurred in the recovery from the Great Recession.⁹

Finally, although the pandemic's impacts have been widespread, both the public health and economic impacts of the pandemic have fallen most severely on communities and populations disadvantaged before it began. Low-income communities, people of color, and Tribal communities have faced higher rates of infection, hospitalization, and death,¹⁰ as well as higher rates of unemployment and lack of basic necessities like food and housing.¹¹ Pre-existing social vulnerabilities magnified the pandemic in these communities, where a reduced ability to work from home and, frequently, denser housing amplified the risk of infection. Higher rates of pre-existing health conditions also may have contributed to more severe COVID-19 health outcomes.¹² Similarly, communities or households facing economic insecurity before the pandemic were less able to weather business closures, job losses, or declines in earnings and were less able to participate in remote work or education due to the inequities in access to reliable and affordable broadband infrastructure.¹³ Finally, though schools in all areas faced challenges, those in high poverty areas had fewer resources to adapt to remote and hybrid

learning models.¹⁴ Unfortunately, the pandemic also has reversed many gains made by communities of color in the prior economic expansion.¹⁵

B. The Statute and Interim Final Rule

On March 11, 2021, the American Rescue Plan Act (ARPA) was signed into law by the President.¹⁶ Section 9901 of ARPA amended Title VI of the Social Security Act¹⁷ (the Act) to add section 602, which establishes the Coronavirus State Fiscal Recovery Fund, and section 603, which establishes the Coronavirus Local Fiscal Recovery Fund (together, the Fiscal Recovery Funds).¹⁸ The Fiscal Recovery Funds are intended to provide support to State, local, and Tribal governments (together, recipients) in responding to the impact of COVID-19 and in their efforts to contain COVID-19 on their communities, residents, and businesses. The Fiscal Recovery Funds build on and expand the support provided to these governments over the last year, including through the Coronavirus Relief Fund (CRF).¹⁹

¹⁶ American Rescue Plan Act of 2021 (ARPA) § 9901, Pub. L. No. 117-2, codified at 42 U.S.C. § 802 *et seq.*

¹⁷ 42 U.S.C. 801 *et seq.*

¹⁸ §§ 602, 603 of the Act.

¹⁹ The CRF was established by the section 601 of the Act as added by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), Pub. L. No. 116-136, 134 Stat. 281 (2020).

Through the Fiscal Recovery Funds, Congress provided State, local, and Tribal governments with significant resources to respond to the COVID-19 public health emergency and its economic impacts through four categories of eligible uses. Section 602 and section 603 contain the same eligible uses; the primary difference between the two sections is that section 602 establishes a fund for States, territories, and Tribal governments and section 603 establishes a fund for metropolitan cities, nonentitlement units of local government, and counties.

Sections 602(c)(1) and 603(c)(1) provide that funds may be used:

- a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;
- b) To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers;
- c) For the provision of government services to the extent of the reduction in revenue due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and
- d) To make necessary investments in water, sewer, or broadband infrastructure.

In addition, Congress clarified two types of uses which do not fall within these four categories. Sections 602(c)(2)(B) and 603(c)(2) provide that these eligible uses do not include, and thus funds may not be used for, depositing funds into any pension fund. Section 602(c)(2)(A) also provides, for States and territories, that the eligible uses do not include:

“directly or indirectly offset[ing] a reduction in the net tax revenue of [the] State or territory resulting from a change in law, regulation, or administrative interpretation.”

The ARPA provides a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, more equitable economy as the country recovers. First, payments from the Fiscal Recovery Funds help to ensure that State, local, and Tribal governments have the resources needed to continue to take actions to decrease the spread of COVID-19 and bring the pandemic under control. Payments from the Fiscal Recovery Funds may also be used by recipients to provide support for costs incurred in addressing public health and economic challenges resulting from the pandemic, including resources to offer premium pay to essential workers, in recognition of their sacrifices over the last year. Recipients may also use payments from the Fiscal Recovery Funds to replace State, local, and Tribal government revenue lost due to COVID-19, helping to ensure that governments can continue to provide needed services and avoid cuts or layoffs. Finally, these resources lay the foundation for a strong, equitable economic recovery, not only by providing immediate economic stabilization for households and businesses, but also by addressing the systemic public health and economic challenges that may have contributed to more severe impacts of the pandemic among low-income communities and people of color.

Within the eligible use categories outlined in the Fiscal Recovery Funds provisions of ARPA, State, local, and Tribal governments have flexibility to determine how best to use payments from the Fiscal Recovery Funds to meet the needs of their communities and populations. The Interim Final Rule facilitates swift and effective implementation by establishing a framework for determining the types of programs and services that are eligible under the ARPA along with examples of uses that State, local, and Tribal governments may consider. These uses build on eligible expenditures under the CRF, including some expansions in eligible uses to respond to the public health emergency, such as vaccination campaigns. They

also reflect changes in the needs of communities, as evidenced by, for example, nationwide data demonstrating disproportionate impacts of the COVID-19 public health emergency on certain populations, geographies, and economic sectors. The Interim Final Rule takes into consideration these disproportionate impacts by recognizing a broad range of eligible uses to help States, local, and Tribal governments support the families, businesses, and communities hardest hit by the COVID-19 public health emergency.

Implementation of the Fiscal Recovery Funds also reflect the importance of public input, transparency, and accountability. Treasury seeks comment on all aspects of the Interim Final Rule and, to better facilitate public comment, has included specific questions throughout this Supplementary Information. Treasury encourages State, local, and Tribal governments in particular to provide feedback and to engage with Treasury regarding issues that may arise regarding all aspects of this Interim Final Rule and Treasury's work in administering the Fiscal Recovery Funds. In addition, the Interim Final Rule establishes certain regular reporting requirements, including by requiring State, local, and Tribal governments to publish information regarding uses of Fiscal Recovery Funds payments in their local jurisdiction. These reporting requirements reflect the need for transparency and accountability, while recognizing and minimizing the burden, particularly for smaller local governments. Treasury urges State, territorial, Tribal, and local governments to engage their constituents and communities in developing plans to use these payments, given the scale of funding and its potential to catalyze broader economic recovery and rebuilding.

II. Eligible Uses

A. Public Health and Economic Impacts

Sections 602(c)(1)(A) and 603(c)(1)(A) provide significant resources for State, territorial, Tribal governments, and counties, metropolitan cities, and nonentitlement units of local governments (each referred to as a recipient) to meet the wide range of public health and economic impacts of the COVID-19 public health emergency.

These provisions authorize the use of payments from the Fiscal Recovery Funds to respond to the public health emergency with respect to COVID-19 or its negative economic impacts. Section 602 and section 603 also describe several types of uses that would be responsive to the impacts of the COVID-19 public health emergency, including assistance to households, small businesses, and nonprofits and aid to impacted industries, such as tourism, travel, and hospitality.²⁰

Accordingly, to assess whether a program or service is included in this category of eligible uses, a recipient should consider whether and how the use would respond to the COVID-19 public health emergency. Assessing whether a program or service “responds to” the COVID-19 public health emergency requires the recipient to, first, identify a need or negative impact of the COVID-19 public health emergency and, second, identify how the program, service, or other intervention addresses the identified need or impact. While the COVID-19 public health emergency affected many aspects of American life, eligible uses under this category must be in response to the disease itself or the harmful consequences of the economic disruptions resulting from or exacerbated by the COVID-19 public health emergency.

²⁰ §§602(c)(1)(A), 603(c)(1)(A) of the Act.

The Interim Final Rule implements these provisions by identifying a non-exclusive list of programs or services that may be funded as responding to COVID-19 or the negative economic impacts of the COVID-19 public health emergency, along with considerations for evaluating other potential uses of the Fiscal Recovery Funds not explicitly listed. The Interim Final Rule also provides flexibility for recipients to use payments from the Fiscal Recovery Funds for programs or services that are not identified on these non-exclusive lists but that fall under the terms of section 602(c)(1)(A) or 603(c)(1)(A) by responding to the COVID-19 public health emergency or its negative economic impacts. As an example, in determining whether a program or service responds to the negative economic impacts of the COVID-19 public health emergency, the Interim Final Rule provides that payments from the Fiscal Recovery Funds should be designed to address an economic harm resulting from or exacerbated by the public health emergency. Recipients should assess the connection between the negative economic harm and the COVID-19 public health emergency, the nature and extent of that harm, and how the use of this funding would address such harm.

As discussed, the pandemic and the necessary actions taken to control the spread had a severe impact on households and small businesses, including in particular low-income workers and communities and people of color. While eligible uses under sections 602(c)(1)(A) and 603(c)(1)(A) provide flexibility to recipients to identify the most pressing local needs, Treasury encourages recipients to provide assistance to those households, businesses, and non-profits in communities most disproportionately impacted by the pandemic.

1. Responding to COVID-19

On January 21, 2020, the Centers for Disease Control and Prevention (CDC) identified the first case of novel coronavirus in the United States.²¹ By late March, the virus had spread to many States and the first wave was growing rapidly, centered in the northeast.²² This wave brought acute strain on health care and public health systems: hospitals and emergency medical services struggled to manage a major influx of patients; response personnel faced shortages of personal protective equipment; testing for the virus was scarce; and congregate living facilities like nursing homes and prisons saw rapid spread. State, local, and Tribal governments mobilized to support the health care system, issue public health orders to mitigate virus spread, and communicate safety measures to the public. The United States has since faced at least two additional COVID-19 waves that brought many similar challenges: the second in the summer, centered in the south and southwest, and a wave throughout the fall and winter, in which the virus reached a point of uncontrolled spread across the country and over 3,000 people died per day.²³ By early May 2021, the United States has experienced over 32 million confirmed COVID-19 cases and over 575,000 deaths.²⁴

²³ Centers for Disease Control and Prevention, COVID Data Tracker: Trends in Number of COVID-19 Cases and Deaths in the US Reported to CDC, by State/Territory, https://covid.cdc.gov/covid-data-tracker/#trends_dailytrendscases (last visited May 8, 2021).

²⁴ *Id.*

Mitigating the impact of COVID-19, including taking actions to control its spread and support hospitals and health care workers caring for the sick, continues to require a major public health response from State, local and Tribal governments. New or heightened public health needs include COVID-19 testing, major expansions in contact tracing, support for individuals in isolation or quarantine, enforcement of public health orders, new public communication efforts, public health surveillance (e.g., monitoring case trends and genomic sequencing for variants), enhancement to health care capacity through alternative care facilities, and enhancement of public health data systems to meet new demands or scaling needs. State, local, and Tribal governments have also supported major efforts to prevent COVID-19 spread through safety measures at key settings like nursing homes, schools, congregate living settings, dense worksites, incarceration settings, and in other public facilities. This has included implementing infection prevention measures or making ventilation improvements in congregate settings, health care settings, or other key locations.

Other response and adaptation costs include capital investments in public facilities to meet pandemic operational needs, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID-19 mitigation tactics. In recent months, State, local, and Tribal governments across the country have mobilized to support the national vaccination campaign, resulting in over 250 million doses administered to date.²⁵

The need for public health measures to respond to COVID-19 will continue in the months and potentially years to come. This includes the continuation of the vaccination campaign for the general public and, if vaccinations are approved for children in the future, eventually for

²⁵ Centers for Disease Control and Prevention, COVID Data Tracker: COVID-19 Vaccinations in the United States, <https://covid.cdc.gov/covid-data-tracker/#vaccinations> (last visited May 8, 2021).

youths. This also includes monitoring the spread of COVID-19 variants, understanding the impact of these variants (especially on vaccination efforts), developing approaches to respond to those variants, and monitoring global COVID-19 trends to understand continued risks to the United States. Finally, the long-term health impacts of COVID-19 will continue to require a public health response, including medical services for individuals with “long COVID,” and research to understand how COVID-19 impacts future health needs and raises risks for the millions of Americans who have been infected.

Other areas of public health have also been negatively impacted by the COVID-19 pandemic. For example, in one survey in January 2021, over 40 percent of American adults reported symptoms of depression or anxiety, up from 11 percent in the first half of 2019.²⁶ The proportion of children’s emergency department visits related to mental health has also risen noticeably.²⁷ Similarly, rates of substance misuse and overdose deaths have spiked: preliminary data from the CDC show a nearly 30 percent increase in drug overdose mortality from September 2019 to September 2020.²⁸ Stay-at-home orders and other pandemic responses may have also reduced the ability of individuals affected by domestic violence to access services.²⁹

²⁶ Panchal, *supra* note 4; Mark É. Czeisler et al., Mental Health, Substance Abuse, and Suicidal Ideation During COVID-19 Pandemic— United States, June 24–30 2020, *Morb. Mortal. Wkly. Rep.* 69(32):1049–57 (Aug. 14, 2020), <https://www.cdc.gov/mmwr/volumes/69/wr/mm6932a1.htm>.

Finally, some preventative public health measures like childhood vaccinations have been deferred and potentially forgone.³⁰

While the pandemic affected communities across the country, it disproportionately impacted some demographic groups and exacerbated health inequities along racial, ethnic, and socioeconomic lines.³¹ The CDC has found that racial and ethnic minorities are at increased risk for infection, hospitalization, and death from COVID-19, with Hispanic or Latino and Native American or Alaska Native patients at highest risk.³²

Similarly, low-income and socially vulnerable communities have seen the most severe health impacts. For example, counties with high poverty rates also have the highest rates of infections and deaths, with 223 deaths per 100,000 compared to the U.S. average of 175 deaths per 100,000, as of May 2021.³³ Counties with high social vulnerability, as measured by factors such as poverty and educational attainment, have also fared more poorly than the national

³² In a study of 13 states from October to December 2020, the CDC found that Hispanic or Latino and Native American or Alaska Native individuals were 1.7 times more likely to visit an emergency room for COVID-19 than White individuals, and Black individuals were 1.4 times more likely to do so than White individuals. *See Romano, supra* note 10.

³³ Centers for Disease Control and Prevention, COVID Data Tracker: Trends in COVID-19 Cases and Deaths in the United States, by County-level Population Factors, https://covid.cdc.gov/covid-data-tracker/#pop-factors_totaldeaths (last visited May 8, 2021).

average, with 211 deaths per 100,000 as of May 2021.³⁴ Over the last year, Native Americans have experienced more than one and a half times the rate of COVID-19 infections, more than triple the rate of hospitalizations, and more than double the death rate compared to White Americans.³⁵ Low-income and minority communities also exhibit higher rates of pre-existing conditions that may contribute to an increased risk of COVID-19 mortality.³⁶

In addition, individuals living in low-income communities may have had more limited ability to socially distance or to self-isolate when ill, resulting in faster spread of the virus, and were over-represented among essential workers, who faced greater risk of exposure.³⁷ Social distancing measures in response to the pandemic may have also exacerbated pre-existing public health challenges. For example, for children living in homes with lead paint, spending substantially more time at home raises the risk of developing elevated blood lead levels, while

³⁴ The CDC's Social Vulnerability Index includes fifteen variables measuring social vulnerability, including unemployment, poverty, education levels, single-parent households, disability status, non-English speaking households, crowded housing, and transportation access.

screenings for elevated blood lead levels declined during the pandemic.³⁸ The combination of these underlying social and health vulnerabilities may have contributed to more severe public health outcomes of the pandemic within these communities, resulting in an exacerbation of pre-existing disparities in health outcomes.³⁹

Eligible Public Health Uses. The Fiscal Recovery Funds provide resources to meet and address these emergent public health needs, including through measures to counter the spread of COVID-19, through the provision of care for those impacted by the virus, and through programs or services that address disparities in public health that have been exacerbated by the pandemic. To facilitate implementation and use of payments from the Fiscal Recovery Funds, the Interim Final Rule identifies a non-exclusive list of eligible uses of funding to respond to the COVID-19 public health emergency. Eligible uses listed under this section build and expand upon permissible expenditures under the CRF, while recognizing the differences between the ARPA and CARES Act, and recognizing that the response to the COVID-19 public health emergency has changed and will continue to change over time. To assess whether additional uses would be eligible under this category, recipients should identify an effect of COVID-19 on public health, including either or both of immediate effects or effects that may manifest over months or years, and assess how the use would respond to or address the identified need.

³⁸ See, e.g., Joseph G. Courtney et al., Decreases in Young Children Who Received Blood Lead Level Testing During COVID-19 – 34 Jurisdictions, January-May 2020, *Morb. Mort. Wkly. Rep.* 70(5):155-61 (Feb. 5, 2021), <https://www.cdc.gov/mmwr/volumes/70/wr/mm7005a2.htm>; Emily A. Benfer & Lindsay F. Wiley, Health Justice Strategies to Combat COVID-19: Protecting Vulnerable Communities During a Pandemic, *Health Affairs Blog* (Mar. 19, 2020), <https://www.healthaffairs.org/doi/10.1377/hblog20200319.757883/full/>.

³⁹ See, e.g., Centers for Disease Control and Prevention, *supra* note 34; Benfer & Wiley, *supra* note 38; Nathaniel M. Lewis et al., Disparities in COVID-19 Incidence, Hospitalizations, and Testing, by Area-Level Deprivation – Utah, March 3-July 9, 2020, *Morb. Mort. Wkly. Rep.* 69(38):1369-73 (Sept. 25, 2020), <https://www.cdc.gov/mmwr/volumes/69/wr/mm6938a4.htm>.

The Interim Final Rule identifies a non-exclusive list of uses that address the effects of the COVID-19 public health emergency, including:

- *COVID-19 Mitigation and Prevention.* A broad range of services and programming are needed to contain COVID-19. Mitigation and prevention efforts for COVID-19 include vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (e.g., monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (e.g., nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools;⁴⁰ ventilation improvements in congregate settings, health care settings, or other key locations; enhancement of public health data systems; and other public health responses.⁴¹ They also include capital investments in public facilities to meet pandemic operational needs, such as physical plant improvements to public hospitals and health clinics or adaptations

⁴⁰ This includes implementing mitigation strategies consistent with the Centers for Disease Control and Prevention's (CDC) Operational Strategy for K-12 Schools through Phased Prevention, *available at* <https://www.cdc.gov/coronavirus/2019-ncov/community/schools-childcare/operation-strategy.html>.

⁴¹ Many of these expenses were also eligible in the CRF. Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID-19 will continue to be eligible under the ARPA, including those not explicitly listed here (e.g., telemedicine costs, costs to facilitate compliance with public health orders, disinfection of public areas, facilitating distance learning, increased solid waste disposal needs related to PPE, paid sick and paid family and medical leave to public employees to enable compliance with COVID-19 public health precautions), with the following two exceptions: 1) the standard for eligibility of public health and safety payrolls has been updated (see details on page 20) and 2) expenses related to the issuance of tax-anticipation notes are no longer an eligible funding use (see discussion of debt service on page 44).

to public buildings to implement COVID-19 mitigation tactics. These COVID-19 prevention and mitigation programs and services, among others, were eligible expenditures under the CRF and are eligible uses under this category of eligible uses for the Fiscal Recovery Funds.⁴²

- *Medical Expenses.* The COVID-19 public health emergency continues to have devastating effects on public health; the United States continues to average hundreds of deaths per day and the spread of new COVID-19 variants has raised new risks and genomic surveillance needs.⁴³ Moreover, our understanding of the potentially serious and long-term effects of the virus is growing, including the potential for symptoms like shortness of breath to continue for weeks or months, for multi-organ impacts from COVID-19, or for post-intensive care syndrome.⁴⁴ State and local governments may need to continue to provide care and services to address these near- and longer-term needs.⁴⁵
- *Behavioral Health Care.* In addition, new or enhanced State, local, and Tribal government services may be needed to meet behavioral health needs exacerbated by the pandemic and respond to other public health impacts. These services include mental health treatment, substance misuse treatment, other behavioral health services, hotlines or

⁴² Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments, 86 Fed. Reg. 4182 (Jan. 15, 2021), *available at* https://home.treasury.gov/system/files/136/CRF-Guidance-Federal-Register_2021-00827.pdf.

⁴³ Centers for Disease Control and Prevention, *supra* note 24.

⁴⁴ Centers for Disease Control and Prevention, Long-Term Effects (Apr. 8, 2021), <https://www.cdc.gov/coronavirus/2019-ncov/long-term-effects.html> (last visited Apr. 26, 2021).

⁴⁵ Pursuant to 42 CFR 433.51 and 45 CFR 75.306, Fiscal Recovery Funds may not serve as a State or locality's contribution of certain Federal funds.

warmlines, crisis intervention, overdose prevention, infectious disease prevention, and services or outreach to promote access to physical or behavioral health primary care and preventative medicine.

- *Public Health and Safety Staff.* Treasury recognizes that responding to the public health and negative economic impacts of the pandemic, including administering the services described above, requires a substantial commitment of State, local, and Tribal government human resources. As a result, the Fiscal Recovery Funds may be used for payroll and covered benefits expenses for public safety, public health, health care, human services, and similar employees, to the extent that their services are devoted to mitigating or responding to the COVID-19 public health emergency.⁴⁶ Accordingly, the Fiscal Recovery Funds may be used to support the payroll and covered benefits for the portion of the employee's time that is dedicated to responding to the COVID-19 public health emergency. For administrative convenience, the recipient may consider public health and safety employees to be entirely devoted to mitigating or responding to the COVID-19 public health emergency, and therefore fully covered, if the employee, or his or her operating unit or division, is primarily dedicated to responding to the COVID-19 public health emergency. Recipients may consider other presumptions for assessing the extent to which an employee, division, or operating unit is engaged in activities that respond to

⁴⁶ In general, if an employee's wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee's covered benefits as an eligible use of Fiscal Recovery Funds. For purposes of the Fiscal Recovery Funds, covered benefits include costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (federal and state), workers compensation insurance, and Federal Insurance Contributions Act (FICA) taxes (which includes Social Security and Medicare taxes).

the COVID-19 public health emergency, provided that the recipient reassesses periodically and maintains records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on the COVID-19 response. Recipients need not routinely track staff hours.

- *Expenses to Improve the Design and Execution of Health and Public Health Programs.* State, local, and Tribal governments may use payments from the Fiscal Recovery Funds to engage in planning and analysis in order to improve programs addressing the COVID-19 pandemic, including through use of targeted consumer outreach, improvements to data or technology infrastructure, impact evaluations, and data analysis.

Eligible Uses to Address Disparities in Public Health Outcomes. In addition, in recognition of the disproportionate impacts of the COVID-19 pandemic on health outcomes in low-income and Native American communities and the importance of mitigating these effects, the Interim Final Rule identifies a broader range of services and programs that will be presumed to be responding to the public health emergency when provided in these communities. Specifically, Treasury will presume that certain types of services, outlined below, are eligible uses when provided in a Qualified Census Tract (QCT),⁴⁷ to families living in QCTs, or when these services are provided

⁴⁷ Qualified Census Tracts are a common, readily-accessible, and geographically granular method of identifying communities with a large proportion of low-income residents. Using an existing measure may speed implementation and decrease administrative burden, while identifying areas of need at a highly-localized level.

While QCTs are an effective tool generally, many tribal communities have households with a wide range of income levels due in part to non-tribal member, high income residents living in the community. Mixed income communities, with a significant share of tribal members at the lowest levels of income, are often not included as eligible QCTs yet tribal residents are experiencing disproportionate impacts due to the pandemic. Therefore, including all services provided by Tribal governments is a more effective means of ensuring that disproportionately impacted Tribal members can receive services.

by Tribal governments.⁴⁸ Recipients may also provide these services to other populations, households, or geographic areas that are disproportionately impacted by the pandemic. In identifying these disproportionately-impacted communities, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the specific populations, households, or geographic areas to be served.

Given the exacerbation of health disparities during the pandemic and the role of pre-existing social vulnerabilities in driving these disparate outcomes, services to address health disparities are presumed to be responsive to the public health impacts of the pandemic. Specifically, recipients may use payments from the Fiscal Recovery Funds to facilitate access to resources that improve health outcomes, including services that connect residents with health care resources and public assistance programs and build healthier environments, such as:

- Funding community health workers to help community members access health services and services to address the social determinants of health;⁴⁹
- Funding public benefits navigators to assist community members with navigating and applying for available Federal, State, and local public benefits or services;

⁴⁸ U.S. Department of Housing and Urban Development (HUD), Qualified Census Tracts and Difficult Development Areas, <https://www.huduser.gov/portal/datasets/qct.html> (last visited Apr. 26, 2021); U.S. Department of the Interior, Bureau of Indian Affairs, Indian Lands of Federally Recognized Tribes of the United States (June 2016), <https://www.bia.gov/sites/bia.gov/files/assets/bia/ots/webteam/pdf/idc1-028635.pdf> (last visited Apr. 26, 2021).

⁴⁹ The social determinants of health are the social and environmental conditions that affect health outcomes, specifically economic stability, health care access, social context, neighborhoods and built environment, and education access. *See, e.g.*, U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion, Healthy People 2030: Social Determinants of Health, <https://health.gov/healthypeople/objectives-and-data/social-determinants-health> (last visited Apr. 26, 2021).

- Housing services to support healthy living environments and neighborhoods conducive to mental and physical wellness;
- Remediation of lead paint or other lead hazards to reduce risk of elevated blood lead levels among children; and
- Evidence-based community violence intervention programs to prevent violence and mitigate the increase in violence during the pandemic.⁵⁰

2. Responding to Negative Economic Impacts

Impacts on Households and Individuals. The public health emergency, including the necessary measures taken to protect public health, resulted in significant economic and financial hardship for many Americans. As businesses closed, consumers stayed home, schools shifted to remote education, and travel declined precipitously, over 20 million jobs were lost in March and April 2020.⁵¹ Although many have returned to work, as of April 2021, the economy remains 8.2 million jobs below its pre-pandemic peak,⁵² and more than 3 million workers have dropped out of the labor market altogether relative to February 2020.⁵³

Rates of unemployment are particularly severe among workers of color and workers with lower levels of educational attainment; for example, the overall unemployment rate in the United

⁵⁰ National Commission on COVID-19 and Criminal Justice, Impact Report: COVID-19 and Crime (Jan. 31, 2021), <https://covid19.counciloncj.org/2021/01/31/impact-report-covid-19-and-crime-3/> (showing a spike in homicide and assaults); Brad Boesrup et al., Alarming Trends in US domestic violence during the COVID-19 pandemic, *Am. States was 6.1 percent in April 2021, but certain groups saw much higher rates: 9.7 percent for Black workers, 7.9 percent for Hispanic or Latino workers, and 9.3 percent for workers without a high school diploma.⁵⁴ Job losses have also been particularly steep among low wage workers, with these workers remaining furthest from recovery as of the end of 2020.⁵⁵ A severe recession—and its concentrated impact among low-income workers—has amplified food and housing insecurity, with an estimated nearly 17 million adults living in households where there is sometimes or often not enough food to eat and an estimated 10.7 million adults living in households that were not current on rent.⁵⁶ Over the course of the pandemic, inequities also manifested along gender lines, as schools closed to in-person activities, leaving many working families without child care during the day.⁵⁷ Women of color have been hit especially hard: the

⁵⁷ Women have carried a larger share of childcare responsibilities than men during the COVID-19 crisis. *See, e.g.*, Gema Zamarró & María J. Prados, Gender differences in couples' division of childcare, work and mental health during COVID-19, *Rev. Econ. Household* 19:11-40 (2021), *available at* <https://link.springer.com/article/10.1007/s11150-020-09534-7>; Titan Alon et al., The Impact of COVID-19 on Gender Equality, National Bureau of Economic Research Working Paper 26947 (April 2020), *available at* <https://www.nber.org/papers/w26947>.

labor force participation rate for Black women has fallen by 3.2 percentage points⁵⁸ during the pandemic as compared to 1.0 percentage points for Black men⁵⁹ and 2.0 percentage points for White women.⁶⁰

As the economy recovers, the effects of the pandemic-related recession may continue to impact households, including a risk of longer-term effects on earnings and economic potential. For example, unemployed workers, especially those who have experienced longer periods of unemployment, earn lower wages over the long term once rehired.⁶¹ In addition to the labor market consequences for unemployed workers, recessions can also cause longer-term economic challenges through, among other factors, damaged consumer credit scores⁶² and reduced familial and childhood wellbeing.⁶³ These potential long-term economic consequences underscore the continued need for robust policy support.

Impacts on Businesses. The pandemic has also severely impacted many businesses, with small businesses hit especially hard. Small businesses make up nearly half of U.S. private-sector employment⁶⁴ and play a key role in supporting the overall economic recovery as they are responsible for two-thirds of net new jobs.⁶⁵ Since the beginning of the pandemic, however, 400,000 small businesses have closed, with many more at risk.⁶⁶ Sectors with a large share of small business employment have been among those with the most drastic drops in employment.⁶⁷ The negative outlook for small businesses has continued: as of April 2021, approximately 70 percent of small businesses reported that the pandemic has had a moderate or large negative effect on their business, and over a third expect that it will take over 6 months for their business to return to their normal level of operations.⁶⁸

This negative outlook is likely the result of many small businesses having faced periods of closure and having seen declining revenues as customers stayed home.⁶⁹ In general, small businesses can face greater hurdles in accessing credit,⁷⁰ and many small businesses were

already financially fragile at the outset of the pandemic.⁷¹ Non-profits, which provide vital services to communities, have similarly faced economic and financial challenges due to the pandemic.⁷²

Impacts to State, Local, and Tribal Governments. State, local, and Tribal governments have felt substantial fiscal pressures. As noted above, State, local, and Tribal governments have faced significant revenue shortfalls and remain over 1 million jobs below their pre-pandemic staffing levels.⁷³ These reductions in staffing may undermine the ability to deliver services effectively, as well as add to the number of unemployed individuals in their jurisdictions.

Exacerbation of Pre-existing Disparities. The COVID-19 public health emergency may have lasting negative effects on economic outcomes, particularly in exacerbating disparities that existed prior to the pandemic.

The negative economic impacts of the COVID-19 pandemic are particularly pronounced in certain communities and families. Low- and moderate-income jobs make up a substantial portion of both total pandemic job losses,⁷⁴ and jobs that require in-person frontline work, which

⁷⁴ Kim Parker et al., Economic Fallout from COVID-19 Continues to Hit Lower-Income Americans the Hardest, Pew Research Center (Sept. 24, 2020), <https://www.pewresearch.org/social-trends/2020/09/24/economic-fallout-from-covid-19-continues-to-hit-lower-income-americans-the-hardest/>; Gould, *supra* note 55.

are exposed to greater risk of contracting COVID-19.⁷⁵ Both factors compound pre-existing vulnerabilities and the likelihood of food, housing, or other financial insecurity in low- and moderate-income families and, given the concentration of low- and moderate-income families within certain communities,⁷⁶ raise a substantial risk that the effects of the COVID-19 public health emergency will be amplified within these communities.

These compounding effect of recessions on concentrated poverty and the long-lasting nature of this effect were observed after the 2007-2009 recession, including a large increase in concentrated poverty with the number of people living in extremely poor neighborhoods more than doubling by 2010-2014 relative to 2000.⁷⁷ Concentrated poverty has a range of deleterious impacts, including additional burdens on families and reduced economic potential and social cohesion.⁷⁸ Given the disproportionate impact of COVID-19 on low-income households discussed above, there is a risk that the current pandemic-induced recession could further increase concentrated poverty and cause long-term damage to economic prospects in neighborhoods of concentrated poverty.

The negative economic impacts of COVID-19 also include significant impacts to children in disproportionately affected families and include impacts to education, health, and welfare, all

⁷⁵ See *infra* Section II.B of this Supplementary Information.

of which contribute to long-term economic outcomes.⁷⁹ Many low-income and minority students, who were disproportionately served by remote or hybrid education during the pandemic, lacked the resources to participate fully in remote schooling or live in households without adults available throughout the day to assist with online coursework.⁸⁰ Given these trends, the pandemic may widen educational disparities and worsen outcomes for low-income students,⁸¹ an effect that would substantially impact their long-term economic outcomes. Increased economic strain or material hardship due to the pandemic could also have a long-term impact on health, educational, and economic outcomes of young children.⁸² Evidence suggests

⁷⁹ Educational quality, as early as Kindergarten, has a long-term impact on children's public health and economic outcomes. *See, e.g.*, Tyler W. Watts et al., The Chicago School Readiness Project: Examining the long-term impacts of an early childhood intervention, PLoS ONE 13(7) (2018), *available at* <https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0200144>; Opportunity Insights, How Can We Amplify Education as an Engine of Mobility? ⁸⁰ *See, e.g.*, Bacher-Hicks, *supra* note 14.

⁸¹ A Department of Education survey found that, as of February 2021, 42 percent of fourth grade students nationwide were offered only remote education, compared to 48 percent of economically disadvantaged students, 54 percent of Black students and 57 percent of Hispanic students. Large districts often disproportionately serve low-income students. *See* Institute of Education Sciences, Monthly School Survey Dashboard, <https://ies.ed.gov/schoolsurvey/> (last visited Apr. 26, 2021). In summer 2020, a review found that 74 percent of the largest 100 districts chose remote learning only. *See* Education Week, School Districts' Reopening Plans: A Snapshot (Jul. 15, 2020), <https://www.edweek.org/leadership/school-districts-reopening-plans-a-snapshot/2020/07> (last visited May 4, 2021).

⁸² HHS, *supra* note 79.

that adverse conditions in early childhood, including exposure to poverty, food insecurity, housing insecurity, or other economic hardships, are particularly impactful.⁸³

The pandemic's disproportionate economic impacts are also seen in Tribal communities across the country—for Tribal governments as well as families and businesses on and off Tribal lands. In the early months of the pandemic, Native American unemployment spiked to 26 percent and, while partially recovered, remains at nearly 11 percent.⁸⁴ Tribal enterprises are a significant source of revenue for Tribal governments to support the provision of government services. These enterprises, notably concentrated in gaming, tourism, and hospitality, frequently closed, significantly reducing both revenues to Tribal governments and employment. As a result, Tribal governments have reduced essential services to their citizens and communities.⁸⁵

Eligible Uses. Sections 602(c)(1)(A) and 603(c)(1)(A) permit use of payments from the Fiscal Recovery Funds to respond to the negative economic impacts of the COVID-19 public health emergency. Eligible uses that respond to the negative economic impacts of the public health emergency must be designed to address an economic harm resulting from or exacerbated by the public health emergency. In considering whether a program or service would be eligible under this category, the recipient should assess whether, and the extent to which, there has been

(Aug. 5, 2020), <https://www.minneapolisfed.org/article/2020/native-employment-during-covid-19-hit-hard-in-april-but-starting-to-rebound>.

⁸⁵ Moreno & Sobrepena, *supra* note 73.

an economic harm, such as loss of earnings or revenue, that resulted from the COVID-19 public health emergency and whether, and the extent to which, the use would respond or address this harm.⁸⁶ A recipient should first consider whether an economic harm exists and whether this harm was caused or made worse by the COVID-19 public health emergency. While economic impacts may either be immediate or delayed, assistance or aid to individuals or businesses that did not experience a negative economic impact from the public health emergency would not be an eligible use under this category.

In addition, the eligible use must “respond to” the identified negative economic impact. Responses must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses. Where there has been a negative economic impact resulting from the public health emergency, States, local, and Tribal governments have broad latitude to choose whether and how to use the Fiscal Recovery Funds to respond to and address the negative economic impact. Sections 602(c)(1)(A) and 603(c)(1)(A) describe several types of uses that would be eligible under this category, including assistance to households, small businesses, and nonprofits and aid to impacted industries such as tourism, travel, and hospitality.

To facilitate implementation and use of payments from the Fiscal Recovery Funds, the Interim Final Rule identifies a non-exclusive list of eligible uses of funding that respond to the negative economic impacts of the public health emergency. Consistent with the discussion above, the eligible uses listed below would respond directly to the economic or financial harms resulting from and or exacerbated by the public health emergency.

⁸⁶ In some cases, a use may be permissible under another eligible use category even if it falls outside the scope of section (c)(1)(A) of the Act.

- *Assistance to Unemployed Workers.* This includes assistance to unemployed workers, including services like job training to accelerate rehiring of unemployed workers; these services may extend to workers unemployed due to the pandemic or the resulting recession, or who were already unemployed when the pandemic began and remain so due to the negative economic impacts of the pandemic.
- *State Unemployment Insurance Trust Funds.* Consistent with the approach taken in the CRF, recipients may make deposits into the state account of the Unemployment Trust Fund established under section 904 of the Social Security Act (42 U.S.C. 1104) up to the level needed to restore the pre-pandemic balances of such account as of January 27, 2020 or to pay back advances received under Title XII of the Social Security Act (42 U.S.C. 1321) for the payment of benefits between January 27, 2020 and [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER], given the close nexus between Unemployment Trust Fund costs, solvency of Unemployment Trust Fund systems, and pandemic economic impacts. Further, Unemployment Trust Fund deposits can decrease fiscal strain on Unemployment Insurance systems impacted by the pandemic. States facing a sharp increase in Unemployment Insurance claims during the pandemic may have drawn down positive Unemployment Trust Fund balances and, after exhausting the balance, required advances to fund continuing obligations to claimants. Because both of these impacts were driven directly by the need for assistance to unemployed workers during the pandemic, replenishing Unemployment Trust Funds up to the pre-pandemic level responds to the pandemic's negative economic impacts on unemployed workers.

- *Assistance to Households.* Assistance to households or populations facing negative economic impacts due to COVID-19 is also an eligible use. This includes: food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; cash assistance (discussed below); emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; or job training to address negative economic or public health impacts experienced due to a worker's occupation or level of training. As discussed above, in considering whether a potential use is eligible under this category, a recipient must consider whether, and the extent to which, the household has experienced a negative economic impact from the pandemic. In assessing whether a household or population experienced economic harm as a result of the pandemic, a recipient may presume that a household or population that experienced unemployment or increased food or housing insecurity or is low- or moderate-income experienced negative economic impacts resulting from the pandemic. For example, a cash transfer program may focus on unemployed workers or low- and moderate-income families, which have faced disproportionate economic harms due to the pandemic. Cash transfers must be reasonably proportional to the negative economic impact they are intended to address. Cash transfers grossly in excess of the amount needed to address the negative economic impact identified by the recipient would not be considered to be a response to the COVID-19 public health emergency or its negative impacts. In particular, when considering the appropriate size of permissible cash transfers made in response to the COVID-19 public health emergency, State, local and

Tribal governments may consider and take guidance from the per person amounts previously provided by the Federal government in response to the COVID-19 crisis. Cash transfers that are grossly in excess of such amounts would be outside the scope of eligible uses under section 602(c)(1)(A) and 603(c)(1)(A) and could be subject to recoupment. In addition, a recipient could provide survivor's benefits to surviving family members of COVID-19 victims, or cash assistance to widows, widowers, and dependents of eligible COVID-19 victims.

- *Expenses to Improve Efficacy of Economic Relief Programs.* State, local, and Tribal governments may use payments from the Fiscal Recovery Funds to improve efficacy of programs addressing negative economic impacts, including through use of data analysis, targeted consumer outreach, improvements to data or technology infrastructure, and impact evaluations.
- *Small Businesses and Non-profits.* As discussed above, small businesses and non-profits faced significant challenges in covering payroll, mortgages or rent, and other operating costs as a result of the public health emergency and measures taken to contain the spread of the virus. State, local, and Tribal governments may provide assistance to small businesses to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID-19 public health emergency, including:
 - Loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;

- Loans, grants, or in-kind assistance to implement COVID-19 prevention or mitigation tactics, such as physical plant changes to enable social distancing, enhanced cleaning efforts, barriers or partitions, or COVID-19 vaccination, testing, or contact tracing programs; and
- Technical assistance, counseling, or other services to assist with business planning needs.

As discussed above, these services should respond to the negative economic impacts of COVID-19. Recipients may consider additional criteria to target assistance to businesses in need, including small businesses. Such criteria may include businesses facing financial insecurity, substantial declines in gross receipts (e.g., comparable to measures used to assess eligibility for the Paycheck Protection Program), or other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving disadvantaged communities. Recipients should consider local economic conditions and business data when establishing such criteria.⁸⁷

- *Rehiring State, Local, and Tribal Government Staff.* State, local, and Tribal governments continue to see pandemic impacts in overall staffing levels: State, local, and Tribal government employment remains more than 1 million jobs lower

⁸⁷ See Federal Reserve Bank of Cleveland, *An Uphill Battle: COVID-19's Outsized Toll on Minority-Owned Firms* (Oct. 8, 2020), <https://www.clevelandfed.org/newsroom-and-events/publications/community-development-briefs/db-20201008-misera-report.aspx> (discussing the impact of COVID-19 on minority owned businesses).

in April 2021 than prior to the pandemic.⁸⁸ Employment losses decrease a state or local government's ability to effectively administer services. Thus, the Interim Final Rule includes as an eligible use payroll, covered benefits, and other costs associated with rehiring public sector staff, up to the pre-pandemic staffing level of the government.

- *Aid to Impacted Industries.* Sections 602(c)(1)(A) and 603(c)(1)(A) recognize that certain industries, such as tourism, travel, and hospitality, were disproportionately and negatively impacted by the COVID-19 public health emergency. Aid provided to tourism, travel, and hospitality industries should respond to the negative economic impacts of the pandemic on those and similarly impacted industries. For example, aid may include assistance to implement COVID-19 mitigation and infection prevention measures to enable safe resumption of tourism, travel, and hospitality services, for example, improvements to ventilation, physical barriers or partitions, signage to facilitate social distancing, provision of masks or personal protective equipment, or consultation with infection prevention professionals to develop safe reopening plans.

Aid may be considered responsive to the negative economic impacts of the pandemic if it supports businesses, attractions, business districts, and Tribal development districts operating prior to the pandemic and affected by required

⁸⁸ U.S. Bureau of Labor Statistics, All Employees, State Government [CES9092000001] and All Employees, Local Government [CES9093000001], retrieved from FRED, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/series/CES9092000001> and <https://fred.stlouisfed.org/series/CES9093000001> (last visited May 8, 2021).

closures and other efforts to contain the pandemic. For example, a recipient may provide aid to support safe reopening of businesses in the tourism, travel, and hospitality industries and to business districts that were closed during the COVID-19 public health emergency, as well as aid for a planned expansion or upgrade of tourism, travel, and hospitality facilities delayed due to the pandemic.

When considering providing aid to industries other than tourism, travel, and hospitality, recipients should consider the extent of the economic impact as compared to tourism, travel, and hospitality, the industries enumerated in the statute. For example, on net, the leisure and hospitality industry has experienced an approximately 24 percent decline in revenue and approximately 17 percent decline in employment nationwide due to the COVID-19 public health emergency.⁸⁹ Recipients should also consider whether impacts were due to the COVID-19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic.

To facilitate transparency and accountability, the Interim Final Rule requires that State, local, and Tribal governments publicly report assistance provided to private-sector businesses under this eligible use, including tourism, travel, hospitality, and other impacted industries, and its connection to negative

⁸⁹ From February 2020 to April 2021, employment in “Leisure and hospitality” has fallen by approximately 17 percent. *See* U.S. Bureau of Labor Statistics, All Employees, Leisure and Hospitality, retrieved from FRED, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/series/USLAH> (last visited May 8, 2021). From 2019Q4 to 2020Q4, gross output (e.g. revenue) in arts, entertainment, recreation, accommodation, and food services has fallen by approximately 24 percent. *See* Bureau of Economic Analysis, News Release: Gross Domestic Product (Third Estimate), Corporate Profits, and GDP by Industry, Fourth Quarter and Year 2020 (Mar. 25, 2021), Table 17, https://www.bea.gov/sites/default/files/2021-03/gdp4q20_3rd.pdf.

economic impacts of the pandemic. Recipients also should maintain records to support their assessment of how businesses or business districts receiving assistance were affected by the negative economic impacts of the pandemic and how the aid provided responds to these impacts.

As discussed above, economic disparities that existed prior to the COVID-19 public health emergency amplified the impact of the pandemic among low-income and minority groups. These families were more likely to face housing, food, and financial insecurity; are over-represented among low-wage workers; and many have seen their livelihoods deteriorate further during the pandemic and economic contraction. In recognition of the disproportionate negative economic impacts on certain communities and populations, the Interim Final Rule identifies services and programs that will be presumed to be responding to the negative economic impacts of the COVID-19 public health emergency when provided in these communities.

Specifically, Treasury will presume that certain types of services, outlined below, are eligible uses when provided in a QCT, to families and individuals living in QCTs, or when these services are provided by Tribal governments.⁹⁰ Recipients may also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. In identifying these disproportionately impacted communities, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the specific populations, households, or geographic areas to be served. The Interim Final Rule identifies a non-exclusive list of uses that address the disproportionate negative economic effects of the COVID-19 public health emergency, including:

⁹⁰ HUD, *supra* note 48.

- *Building Stronger Communities through Investments in Housing and Neighborhoods*. The economic impacts of COVID-19 have likely been most acute in lower-income neighborhoods, including concentrated areas of high unemployment, limited economic opportunity, and housing insecurity.⁹¹ Services in this category alleviate the immediate economic impacts of the COVID-19 pandemic on housing insecurity, while addressing conditions that contributed to poor public health and economic outcomes during the pandemic, namely concentrated areas with limited economic opportunity and inadequate or poor-quality housing.⁹² Eligible services include:
 - Services to address homelessness such as supportive housing, and to improve access to stable, affordable housing among unhoused individuals;
 - Affordable housing development to increase supply of affordable and high-quality living units; and
 - Housing vouchers, residential counseling, or housing navigation assistance to facilitate household moves to neighborhoods with high levels of economic opportunity and mobility for low-income residents, to help residents increase their economic opportunity and reduce concentrated areas of low economic opportunity.⁹³

- *Addressing Educational Disparities.* As outlined above, school closures and the transition to remote education raised particular challenges for lower-income students, potentially exacerbating educational disparities, while increases in economic hardship among families could have long-lasting impacts on children’s educational and economic prospects. Services under this prong would enhance educational supports to help mitigate impacts of the pandemic. Eligible services include:
 - New, expanded, or enhanced early learning services, including pre-kindergarten, Head Start, or partnerships between pre-kindergarten programs and local education authorities, or administration of those services;
 - Providing assistance to high-poverty school districts to advance equitable funding across districts and geographies;
 - Evidence-based educational services and practices to address the academic needs of students, including tutoring, summer, afterschool, and other extended learning and enrichment programs; and
 - Evidence-based practices to address the social, emotional, and mental health needs of students;
- *Promoting Healthy Childhood Environments.* Children’s economic and family circumstances have a long-term impact on their future economic outcomes.⁹⁴ Increases in economic hardship, material insecurity, and parental stress and behavioral health challenges all raise the risk of long-term harms to today’s children due to the pandemic. Eligible services to address this challenge include:

⁹⁴ See supra notes 52 and 84.

- New or expanded high-quality childcare to provide safe and supportive care for children;
- Home visiting programs to provide structured visits from health, parent educators, and social service professionals to pregnant women or families with young children to offer education and assistance navigating resources for economic support, health needs, or child development; and
- Enhanced services for child welfare-involved families and foster youth to provide support and training on child development, positive parenting, coping skills, or recovery for mental health and substance use challenges.

State, local, and Tribal governments are encouraged to use payments from the Fiscal Recovery Funds to respond to the direct and immediate needs of the pandemic and its negative economic impacts and, in particular, the needs of households and businesses that were disproportionately and negatively impacted by the public health emergency. As highlighted above, low-income communities and workers and people of color have faced more severe health and economic outcomes during the pandemic, with pre-existing social vulnerabilities like low-wage or insecure employment, concentrated neighborhoods with less economic opportunity, and pre-existing health disparities likely contributing to the magnified impact of the pandemic. The Fiscal Recovery Funds provide resources to not only respond to the immediate harms of the pandemic but also to mitigate its longer-term impact in compounding the systemic public health and economic challenges of disproportionately impacted populations. Treasury encourages recipients to consider funding uses that foster a strong, inclusive, and equitable recovery, especially uses with long-term benefits for health and economic outcomes.

Uses Outside the Scope of this Category. Certain uses would not be within the scope of this eligible use category, although may be eligible under other eligible use categories. A general infrastructure project, for example, typically would not be included unless the project responded to a specific pandemic public health need (e.g., investments in facilities for the delivery of vaccines) or a specific negative economic impact like those described above (e.g., affordable housing in a QCT). The ARPA explicitly includes infrastructure if it is “necessary” and in water, sewer, or broadband. *See* Section II.D of this Supplementary Information. State, local, and Tribal governments also may use the Fiscal Recovery Funds under sections 602(c)(1)(C) or 603(c)(1)(C) to provide “government services” broadly to the extent of their reduction in revenue. *See* Section II.C of this Supplementary Information.

This category of eligible uses also would not include contributions to rainy day funds, financial reserves, or similar funds. Resources made available under this eligible use category are intended to help meet pandemic response needs and provide relief for households and businesses facing near- and long-term negative economic impacts. Contributions to rainy day funds and similar financial reserves would not address these needs or respond to the COVID-19 public health emergency but would rather constitute savings for future spending needs. Similarly, this eligible use category would not include payment of interest or principal on outstanding debt instruments, including, for example, short-term revenue or tax anticipation notes, or other debt service costs. As discussed below, payments from the Fiscal Recovery Funds are intended to be used prospectively and the Interim Final Rule precludes use of these funds to cover the costs of debt incurred prior to March 3, 2021. Fees or issuance costs associated with the issuance of new debt would also not be covered using payments from the Fiscal Recovery Funds because such costs would not themselves have been incurred to address

the needs of pandemic response or its negative economic impacts. The purpose of the Fiscal Recovery Funds is to provide fiscal relief that will permit State, local, and Tribal governments to continue to respond to the COVID-19 public health emergency.

For the same reasons, this category of eligible uses would not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring plan in a judicial, administrative, or regulatory proceeding, except to the extent the judgment or settlement requires the provision of services that would respond to the COVID-19 public health emergency. That is, satisfaction of a settlement or judgment would not itself respond to COVID-19 with respect to the public health emergency or its negative economic impacts, unless the settlement requires the provision of services or aid that did directly respond to these needs, as described above.

In addition, as described in Section V.III of this Supplementary Information, Treasury will establish reporting and record keeping requirements for uses within this category, including enhanced reporting requirements for certain types of uses.

Question 1: Are there other types of services or costs that Treasury should consider as eligible uses to respond to the public health impacts of COVID-19? Describe how these respond to the COVID-19 public health emergency.

Question 2: The Interim Final Rule permits coverage of payroll and benefits costs of public health and safety staff primarily dedicated to COVID-19 response, as well as rehiring of public sector staff up to pre-pandemic levels. For how long should these measures remain in place? What other measures or presumptions might Treasury consider to assess the extent to which public sector staff are engaged in COVID-19 response, and therefore reimbursable, in an easily-administrable manner?

Question 3: The Interim Final Rule permits rehiring of public sector staff up to the government's pre-pandemic staffing level, which is measured based on employment as of January 27, 2021. Does this approach adequately measure the pre-pandemic staffing level in a manner that is both accurate and easily administrable? Why or why not?

Question 4: The Interim Final Rule permits deposits to Unemployment Insurance Trust Funds, or using funds to pay back advances, up to the pre-pandemic balance. What, if any, conditions should be considered to ensure that funds repair economic impacts of the pandemic and strengthen unemployment insurance systems?

Question 5: Are there other types of services or costs that Treasury should consider as eligible uses to respond to the negative economic impacts of COVID-19? Describe how these respond to the COVID-19 public health emergency.

Question 6: What other measures, presumptions, or considerations could be used to assess "impacted industries" affected by the COVID-19 public health emergency?

Question 7: What are the advantages and disadvantages of using Qualified Census Tracts and services provided by Tribal governments to delineate where a broader range of eligible uses are presumed to be responsive to the public health and economic impacts of COVID-19? What other measures might Treasury consider? Are there other populations or geographic areas that were disproportionately impacted by the pandemic that should be explicitly included?

Question 8: Are there other services or costs that Treasury should consider as eligible uses to respond to the disproportionate impacts of COVID-19 on low-income populations and communities? Describe how these respond to the COVID-19 public health emergency or its negative economic impacts, including its exacerbation of pre-existing challenges in these areas.

Question 9: The Interim Final Rule includes eligible uses to support affordable housing and stronger neighborhoods in disproportionately-impacted communities. Discuss the advantages and disadvantages of explicitly including other uses to support affordable housing and stronger neighborhoods, including rehabilitation of blighted properties or demolition of abandoned or vacant properties. In what ways does, or does not, this potential use address public health or economic impacts of the pandemic? What considerations, if any, could support use of Fiscal Recovery Funds in ways that do not result in resident displacement or loss of affordable housing units?

B. Premium Pay

Fiscal Recovery Funds payments may be used by recipients to provide premium pay to eligible workers performing essential work during the COVID-19 public health emergency or to provide grants to third-party employers with eligible workers performing essential work.⁹⁵ These are workers who have been and continue to be relied on to maintain continuity of operations of essential critical infrastructure sectors, including those who are critical to protecting the health and wellbeing of their communities.

Since the start of the COVID-19 public health emergency in January 2020, essential workers have put their physical wellbeing at risk to meet the daily needs of their communities and to provide care for others. In the course of this work, many essential workers have contracted or died of COVID-19.⁹⁶ Several examples reflect the severity of the health impacts

⁹⁵ §§602(c)(1)(B), 603(c)(1)(B) of the Act.

⁹⁶ See, e.g., Centers for Disease Control and Prevention, COVID Data Tracker: Cases & Death among Healthcare Personnel, <https://covid.cdc.gov/covid-data-tracker/#health-care-personnel> (last visited May 4, 2021); Centers for Disease Control and Prevention, COVID Data Tracker: Confirmed COVID-19 Cases and Deaths among Staff and Rate per 1,000 Resident-Weeks in Nursing Homes, by Week – United States, <https://covid.cdc.gov/covid-data-tracker/#nursing-home-staff> (last visited May 4, 2021).

for essential workers. Meat processing plants became “hotspots” for transmission, with 700 new cases reported at a single plant on a single day in May 2020.⁹⁷ In New York City, 120 employees of the Metropolitan Transit Authority were estimated to have died due to COVID-19 by mid-May 2020, with nearly 4,000 testing positive for the virus.⁹⁸ Furthermore, many essential workers are people of color or low-wage workers.⁹⁹ These workers, in particular, have borne a disproportionate share of the health and economic impacts of the pandemic. Such workers include:

- Staff at nursing homes, hospitals, and home care settings;
- Workers at farms, food production facilities, grocery stores, and restaurants;
- Janitors and sanitation workers;
- Truck drivers, transit staff, and warehouse workers;
- Public health and safety staff;
- Childcare workers, educators, and other school staff; and
- Social service and human services staff.

During the public health emergency, employers’ policies on COVID-19-related hazard pay have varied widely, with many essential workers not yet compensated for the heightened

⁹⁷ See, e.g., The Lancet, The plight of essential workers during the COVID-19 pandemic, Vol. 395, Issue 10237:1587 (May 23, 2020), *available at* <https://www.thelancet.com/journals/lancet/article/PIIS0140-6736%2820%2931200-9/fulltext>.

⁹⁹ Joanna Gaitens et al., Covid-19 and essential workers: A narrative review of health outcomes and moral injury, *Int’l J. of Env’tl. Research and Pub. Health* 18(4):1446 (Feb. 4, 2021), *available at* <https://pubmed.ncbi.nlm.nih.gov/33557075/>; Tiana N. Rogers et al., Racial Disparities in COVID-19 Mortality Among Essential Workers in the United States, *World Med. & Health policy* 12(3):311-27 (Aug. 5, 2020), *available at* <https://onlinelibrary.wiley.com/doi/full/10.1002/wmh3.358> (finding that vulnerability to coronavirus exposure was increased among non-Hispanic blacks, who disproportionately occupied the top nine essential occupations).

risks they have faced and continue to face.¹⁰⁰ Many of these workers earn lower wages on average and live in socioeconomically vulnerable communities as compared to the general population.¹⁰¹ A recent study found that 25 percent of essential workers were estimated to have low household income, with 13 percent in high-risk households.¹⁰² The low pay of many essential workers makes them less able to cope with the financial consequences of the pandemic or their work-related health risks, including working hours lost due to sickness or disruptions to childcare and other daily routines, or the likelihood of COVID-19 spread in their households or communities. Thus, the threats and costs involved with maintaining the ongoing operation of vital facilities and services have been, and continue to be, borne by those that are often the most vulnerable to the pandemic. The added health risk to essential workers is one prominent way in which the pandemic has amplified pre-existing socioeconomic inequities.

The Fiscal Recovery Funds will help respond to the needs of essential workers by allowing recipients to remunerate essential workers for the elevated health risks they have faced and continue to face during the public health emergency. To ensure that premium pay is targeted to workers that faced or face heightened risks due to the character of their work, the Interim Final Rule defines essential work as work involving regular in-person interactions or regular physical handling of items that were also handled by others. A worker would not be engaged in essential work and, accordingly may not receive premium pay, for telework performed from a residence.

¹⁰⁰ Economic Policy Institute, Only 30% of those working outside their home are receiving hazard pay (June 16, 2020), <https://www.epi.org/press/only-30-of-those-working-outside-their-home-are-receiving-hazard-pay-black-and-hispanic-workers-are-most-concerned-about-bringing-the-coronavirus-home/>.

¹⁰¹ McCormack, *supra* note 37.

¹⁰² *Id.*

Sections 602(g)(2) and 603(g)(2) define eligible worker to mean “those workers needed to maintain continuity of operations of essential critical infrastructure sectors and additional sectors as each Governor of a State or territory, or each Tribal government, may designate as critical to protect the health and well-being of the residents of their State, territory, or Tribal government.”¹⁰³ The rule incorporates this definition and provides a list of industries recognized as essential critical infrastructure sectors.¹⁰⁴ These sectors include healthcare, public health and safety, childcare, education, sanitation, transportation, and food production and services, among others as noted above. As provided under sections 602(g)(2) and 603(g)(2), the chief executive of each recipient has discretion to add additional sectors to this list, so long as additional sectors are deemed critical to protect the health and well-being of residents.

In providing premium pay to essential workers or grants to eligible employers, a recipient must consider whether the pay or grant would “respond to” to the worker or workers performing essential work. Premium pay or grants provided under this section respond to workers performing essential work if it addresses the heightened risk to workers who must be physically present at a jobsite and, for many of whom, the costs associated with illness were hardest to bear financially. Many of the workers performing critical essential services are low- or moderate-income workers, such as those described above. The ARPA recognizes this by defining premium pay to mean an amount up to \$13 per hour in addition to wages or remuneration the worker otherwise receives and in an aggregate amount not to exceed \$25,000 per eligible worker. To ensure the provision is implemented in a manner that compensates these workers, the Interim

¹⁰³ §§602(g)(2), 603(g)(2) of the Act.

¹⁰⁴ The list of critical infrastructure sectors provided in the Interim Final Rule is based on the list of essential workers under The Heroes Act, H.R. 6800, 116th Cong. (2020).

Final Rule provides that any premium pay or grants provided using the Fiscal Recovery Funds should prioritize compensation of those lower income eligible workers that perform essential work.

As such, providing premium pay to eligible workers responds to such workers by helping address the disparity between the critical services and risks taken by essential workers and the relatively low compensation they tend to receive in exchange. If premium pay would increase a worker's total pay above 150 percent of their residing state's average annual wage for all occupations, as defined by the Bureau of Labor Statistics' Occupational Employment and Wage Statistics, or their residing county's average annual wage, as defined by the Bureau of Labor Statistics' Occupational Employment and Wage Statistics, whichever is higher, on an annual basis, the State, local, or Tribal government must provide Treasury and make publicly available, whether for themselves or on behalf of a grantee, a written justification of how the premium pay or grant is responsive to workers performing essential worker during the public health emergency.¹⁰⁵

The threshold of 150 percent for requiring additional written justification is based on an analysis of the distribution of labor income for a sample of 20 occupations that generally correspond to the essential workers as defined in the Interim Final Rule.¹⁰⁶ For these

¹⁰⁵ County median annual wage is taken to be that of the metropolitan or nonmetropolitan area that includes the county. See U.S. Bureau of Labor Statistics, State Occupational Employment and Wage Estimates, <https://www.bls.gov/oes/current/oesrcst.htm> (last visited May 1, 2021); U.S. Bureau of Labor Statistics, May 2020 Metropolitan and Nonmetropolitan Area Estimates listed by county or town, https://www.bls.gov/oes/current/county_links.htm (last visited May 1, 2021).

¹⁰⁶ Treasury performed this analysis with data from the U.S. Census Bureau's 2019 Annual Social and Economic Supplement. In determining which occupations to include in this analysis, Treasury excluded management and supervisory positions, as such positions may not necessarily involve regular in-person interactions or physical handling of items to the same extent as non-managerial positions.

occupations, labor income for the vast majority of workers was under 150 percent of average annual labor income across all occupations. Treasury anticipates that the threshold of 150 percent of the annual average wage will be greater than the annual average wage of the vast majority of eligible workers performing essential work. These enhanced reporting requirements help to ensure grants are directed to essential workers in critical infrastructure sectors and responsive to the impacts of the pandemic observed among essential workers, namely the misalignment between health risks and compensation. Enhanced reporting also provides transparency to the public. Finally, using a localized measure reflects differences in wages and cost of living across the country, making this standard administrable and reflective of essential worker incomes across a diverse range of geographic areas.

Furthermore, because premium pay is intended to compensate essential workers for heightened risk due to COVID-19, it must be entirely additive to a worker's regular rate of wages and other remuneration and may not be used to reduce or substitute for a worker's normal earnings. The definition of premium pay also clarifies that premium pay may be provided retrospectively for work performed at any time since the start of the COVID-19 public health emergency, where those workers have yet to be compensated adequately for work previously performed.¹⁰⁷ Treasury encourages recipients to prioritize providing retrospective premium pay where possible, recognizing that many essential workers have not yet received additional compensation for work conducted over the course of many months. Essential workers who have already earned premium pay for essential work performed during the COVID-19 public health

¹⁰⁷ However, such compensation must be "in addition to" remuneration or wages already received. That is, employers may not reduce such workers' current pay and use Fiscal Recovery Funds to compensate themselves for premium pay previously provided to the worker.

emergency remain eligible for additional payments, and an essential worker may receive both retrospective premium pay for prior work as well as prospective premium pay for current or ongoing work.

To ensure any grants respond to the needs of essential workers and are made in a fair and transparent manner, the rule imposes some additional reporting requirements for grants to third-party employers, including the public disclosure of grants provided. *See* Section VIII of this Supplementary Information, discussing reporting requirements. In responding to the needs of essential workers, a grant to an employer may provide premium pay to eligible workers performing essential work, as these terms are defined in the Interim Final Rule and discussed above. A grant provided to an employer may also be for essential work performed by eligible workers pursuant to a contract. For example, if a municipality contracts with a third party to perform sanitation work, the third-party contractor could be eligible to receive a grant to provide premium pay for these eligible workers.

Question 10: Are there additional sectors beyond those listed in the Interim Final Rule that should be considered essential critical infrastructure sectors?

Question 11: What, if any, additional criteria should Treasury consider to ensure that premium pay responds to essential workers?

Question 12: What consideration, if any, should be given to the criteria on salary threshold, including measure and level, for requiring written justification?

C. Revenue Loss

Recipients may use payments from the Fiscal Recovery Funds for the provision of government services to the extent of the reduction in revenue experienced due to the COVID-19

public health emergency.¹⁰⁸ Pursuant to sections 602(c)(1)(C) and 603(c)(1)(C) of the Act, a recipient's reduction in revenue is measured relative to the revenue collected in the most recent full fiscal year prior to the emergency.

Many State, local, and Tribal governments are experiencing significant budget shortfalls, which can have a devastating impact on communities. State government tax revenue from major sources were down 4.3 percent in the six months ended September 2020, relative to the same period 2019.¹⁰⁹ At the local level, nearly 90 percent of cities have reported being less able to meet the fiscal needs of their communities and, on average, cities expect a double-digit decline in general fund revenues in their fiscal year 2021.¹¹⁰ Similarly, surveys of Tribal governments and Tribal enterprises found majorities of respondents reporting substantial cost increases and revenue decreases, with Tribal governments reporting reductions in healthcare, housing, social services, and economic development activities as a result of reduced revenues.¹¹¹ These budget shortfalls are particularly problematic in the current environment, as State, local, and Tribal governments work to mitigate and contain the COVID-19 pandemic and help citizens weather the economic downturn.

¹⁰⁸ ARPA, *supra* note 16.

¹⁰⁹ Major sources include personal income tax, corporate income tax, sales tax, and property tax. *See* Lucy Dadayan., States Reported Revenue Growth in July- – September Quarter, Reflecting Revenue Shifts from the Prior Quarter, State Tax and Econ. Rev. (Q. 3, 2020), *available at* https://www.urban.org/sites/default/files/publication/103938/state-tax-and-economic-review-2020-q3_0.pdf

¹¹⁰ National League of Cities, City Fiscal Conditions (2020), *available at* https://www.nlc.org/wp-content/uploads/2020/08/City_Fiscal_Conditions_2020_FINAL.pdf

¹¹¹ Surveys conducted by the Center for Indian Country Development at the Federal Reserve Bank of Minneapolis in March, April, and September 2020. *See* Moreno & Sobrepena, *supra* note 73.

Further, State, local, and Tribal government budgets affect the broader economic recovery. During the period following the 2007-2009 recession, State and local government budget pressures led to fiscal austerity that was a significant drag on the overall economic recovery.¹¹² Inflation-adjusted State and local government revenue did not return to the previous peak until 2013,¹¹³ while State, local, and Tribal government employment did not recover to its prior peak for over a decade, until August 2019 – just a few months before the COVID-19 public health emergency began.¹¹⁴

Sections 602(c)(1)(C) and 603(c)(1)(C) of the Act allow recipients facing budget shortfalls to use payments from the Fiscal Recovery Funds to avoid cuts to government services and, thus, enable State, local, and Tribal governments to continue to provide valuable services and ensure that fiscal austerity measures do not hamper the broader economic recovery. The Interim Final Rule implements these provisions by establishing a definition of “general revenue” for purposes of calculating a loss in revenue and by providing a methodology for calculating revenue lost due to the COVID-19 public health emergency.

¹¹² See, e.g., Fitzpatrick, Haughwout & Setren, Fiscal Drag from the State and Local Sector?, Liberty Street Economics Blog, Federal Reserve Bank of New York (June 27, 2012), <https://www.libertystreeteconomics.newyorkfed.org/2012/06/fiscal-drag-from-the-state-and-local-sector.html>; Jiri Jonas, Great Recession and Fiscal Squeeze at U.S. Subnational Government Level, IMF Working Paper 12/184, (July 2012), *available at* <https://www.imf.org/external/pubs/ft/wp/2012/wp12184.pdf>; Gordon, *supra* note 9.

¹¹³ State and local government general revenue from own sources, adjusted for inflation using the GDP price index. U.S. Census Bureau, Annual Survey of State Government Finances and U.S. Bureau of Economic Analysis, National Income and Product Accounts,

¹¹⁴ U.S. Bureau of Labor Statistics, All Employees, State Government [CES9092000001] and All Employees, Local Government [CES9093000001], retrieved from FRED, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/series/CES9092000001> and <https://fred.stlouisfed.org/series/CES9093000001> (last visited Apr. 27, 2021).

General Revenue. The Interim Final Rule adopts a definition of “general revenue” based largely on the components reported under “General Revenue from Own Sources” in the Census Bureau’s Annual Survey of State and Local Government Finances, and for purposes of this Interim Final Rule, helps to ensure that the components of general revenue would be calculated in a consistent manner.¹¹⁵ By relying on a methodology that is both familiar and comprehensive, this approach minimizes burden to recipients and provides consistency in the measurement of general revenue across a diverse set of recipients.

The Interim Final Rule defines the term “general revenue” to include revenues collected by a recipient and generated from its underlying economy and would capture a range of different types of tax revenues, as well as other types of revenue that are available to support government services.¹¹⁶ In calculating revenue, recipients should sum across all revenue streams covered as general revenue. This approach minimizes the administrative burden for recipients, provides for greater consistency across recipients, and presents a more accurate representation of the overall impact of the COVID-19 public health emergency on a recipient’s revenue, rather than relying

¹¹⁵ U.S. Census Bureau, Annual Survey of State and Local Government Finances, <https://www.census.gov/programs-surveys/gov-finance.html> (last visited Apr. 30, 2021).

¹¹⁶ The Interim Final Rule would define tax revenue in a manner consistent with the Census Bureau’s definition of tax revenue, with certain changes (i.e., inclusion of revenue from liquor stores and certain intergovernmental transfers). Current charges are defined as “charges imposed for providing current services or for the sale of products in connection with general government activities.” It includes revenues such as public education institution, public hospital, and toll revenues. Miscellaneous general revenue comprises of all other general revenue of governments from their own sources (i.e., other than liquor store, utility, and insurance trust revenue), including rents, royalties, lottery proceeds, and fines.

on financial reporting prepared by each recipient, which vary in methodology used and which generally aggregates revenue by purpose rather than by source.¹¹⁷

Consistent with the Census Bureau’s definition of “general revenue from own sources,” the definition of general revenue in the Interim Final Rule would exclude refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, and agency or private trust transactions. The definition of general revenue also would exclude revenue generated by utilities and insurance trusts. In this way, the definition of general revenue focuses on sources that are generated from economic activity and are available to fund government services, rather than a fund or administrative unit established to account for and control a particular activity.¹¹⁸ For example, public utilities typically require financial support from the State, local, or Tribal government, rather than providing revenue to such government, and any revenue that is generated by public utilities typically is used to support the public utility’s continued operation, rather than being used as a source of revenue to support government services generally.

The definition of general revenue would include all revenue from Tribal enterprises, as this revenue is generated from economic activity and is available to fund government services. Tribes are not able to generate revenue through taxes in the same manner as State and local governments and, as a result, Tribal enterprises are critical sources of revenue for Tribal

¹¹⁷ Fund-oriented reporting, such as what is used under the Governmental Accounting Standards Board (GASB), focuses on the types of uses and activities funded by the revenue, as opposed to the economic activity from which the revenue is sourced. *See* Governmental Accounting Standards Series, Statement No. 54 of the Governmental Accounting Standards Board: Fund Balance Reporting and Governmental Fund Type Definitions, No. 287-B (Feb. 2009).

¹¹⁸ *Supra* note 116.

governments that enable Tribal governments to provide a range of services, including elder care, health clinics, wastewater management, and forestry.

Finally, the term “general revenue” includes intergovernmental transfers between State and local governments, but excludes intergovernmental transfers from the Federal government, including Federal transfers made via a State to a local government pursuant to the CRF or as part of the Fiscal Recovery Funds. States and local governments often share or collect revenue on behalf of one another, which results in intergovernmental transfers. When attributing revenue to a unit of government, the Census Bureau’s methodology considers which unit of government imposes, collects, and retains the revenue and assigns the revenue to the unit of government that meets at least two of those three factors.¹¹⁹ For purposes of measuring loss in general revenue due to the COVID-19 public health emergency and to better allow continued provision of government services, the retention and ability to use the revenue is a more critical factor. Accordingly, and to better measure the funds available for the provision of government services, the definition of general revenue would include intergovernmental transfers from States or local governments other than funds transferred pursuant to ARPA, CRF, or another Federal program. This formulation recognizes the importance of State transfers for local government revenue.¹²⁰

Calculation of Loss. In general, recipients will compute the extent of the reduction in revenue by comparing actual revenue to a counterfactual trend representing what could have been expected to occur in the absence of the pandemic. This approach measures losses in

¹¹⁹ U.S. Census Bureau, Government Finance and Employment Classification Manual (Dec. 2000), <https://www2.census.gov/govs/class/classfull.pdf>

¹²⁰ For example, in 2018, state transfers to localities accounted for approximately 27 percent of local revenues. U.S. Census Bureau, Annual Survey of State and Local Government Finances, Table 1 (2018), <https://www.census.gov/data/datasets/2018/econ/local/public-use-datasets.html>.

revenue relative to the most recent fiscal year prior to the COVID-19 public health emergency by using the most recent pre-pandemic fiscal year as the starting point for estimates of revenue growth absent the pandemic. In other words, the counterfactual trend starts with the last full fiscal year prior to the COVID-19 public health emergency and then assumes growth at a constant rate in the subsequent years. Because recipients can estimate the revenue shortfall at multiple points in time throughout the covered period as revenue is collected, this approach accounts for variation across recipients in the timing of pandemic impacts.¹²¹ Although revenue may decline for reasons unrelated to the COVID-19 public health emergency, to minimize the administrative burden on recipients and taking into consideration the devastating effects of the COVID-19 public health emergency, any diminution in actual revenues relative to the counterfactual pre-pandemic trend would be presumed to have been due to the COVID-19 public health emergency.

For purposes of measuring revenue growth in the counterfactual trend, recipients may use a *growth adjustment* of either 4.1 percent per year or the recipient's average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency, whichever is higher. The option of 4.1 percent represents the average annual growth across all State and local government "General Revenue from Own Sources" in the most recent three years

¹²¹ For example, following the 2007-09 recession, local government property tax collections did not begin to decline until 2011, suggesting that property tax collection declines can lag downturns. See U.S. Bureau of Economic Analysis, Personal current taxes: State and local: Property taxes [S210401A027NBEA], retrieved from Federal Reserve Economic Data, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/graph/?g=r3YI> (last visited Apr. 22, 2021). Estimating the reduction in revenue at points throughout the covered period will allow for this type of lagged effect to be taken into account during the covered period.

of available data.¹²² This approach provides recipients with a standardized growth adjustment when calculating the counterfactual revenue trend and thus minimizes administrative burden, while not disadvantaging recipients with revenue growth that exceeded the national average prior to the COVID-19 public health emergency by permitting these recipients to use their own revenue growth rate over the preceding three years.

Recipients should calculate the extent of the reduction in revenue as of four points in time: December 31, 2020; December 31, 2021; December 31, 2022; and December 31, 2023. To calculate the extent of the reduction in revenue at each of these dates, recipients should follow a four-step process:

- Step 1: Identify revenues collected in the most recent full fiscal year prior to the public health emergency (i.e., last full fiscal year before January 27, 2020), called the *base year revenue*.
- Step 2: Estimate *counterfactual revenue*, which is equal to *base year revenue* * $[(1 + \text{growth adjustment})^{(n/12)}]$, where n is the number of months elapsed since the end of the base year to the calculation date, and *growth adjustment* is the greater of 4.1 percent and the recipient's average annual revenue growth in the three full fiscal years prior to the COVID-19 public health emergency.
- Step 3: Identify *actual revenue*, which equals revenues collected over the past twelve months as of the calculation date.

¹²² Together with revenue from liquor stores from 2015 to 2018. This estimate does not include any intergovernmental transfers. A recipient using the three-year average to calculate their growth adjustment must be based on the definition of general revenue, including treatment of intergovernmental transfers. 2015 – 2018 represents the most recent available data. See U.S. Census Bureau, State & Local Government Finance Historical Datasets and Tables (2018), <https://www.census.gov/programs-surveys/gov-finances/data/datasets.html>.

- Step 4: The extent of the reduction in revenue is equal to *counterfactual revenue* less *actual revenue*. If actual revenue exceeds counterfactual revenue, the extent of the reduction in revenue is set to zero for that calculation date.

For illustration, consider a hypothetical recipient with *base year revenue* equal to 100. In Step 2, the hypothetical recipient finds that 4.1 percent is greater than the recipient's average annual revenue growth in the three full fiscal years prior to the public health emergency. Furthermore, this recipient's base year ends June 30. In this illustration, *n* (months elapsed) and *counterfactual revenue* would be equal to:

As of:	12/31/2020	12/31/2021	12/31/2022	12/31/2023
<i>n</i> (months elapsed)	18	30	42	54
<i>Counterfactual revenue</i> :	106.2	110.6	115.1	119.8

The overall methodology for calculating the reduction in revenue is illustrated in the figure below:

Upon receiving Fiscal Recovery Fund payments, recipients may immediately calculate revenue loss for the period ending December 31, 2020.

Sections 602(c)(1)(C) and 603(c)(1)(C) of the Act provide recipients with broad latitude to use the Fiscal Recovery Funds for the provision of government services. Government services can include, but are not limited to, maintenance or pay-go funded building¹²³ of infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services. However, expenses associated with obligations under instruments evidencing financial indebtedness for borrowed money would not be considered the provision of government services, as these financing expenses do not directly provide services or aid to citizens. Specifically, government services would not include interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or fees or issuance costs associated with the issuance of new debt. For the same reasons, government services would not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding, except if the judgment or settlement required the provision of government services. That is, satisfaction of a settlement or judgment itself is not a government service, unless the settlement required the provision of government services. In addition, replenishing financial reserves (e.g., rainy day or other reserve funds) would not be considered provision of a

¹²³ Pay-go infrastructure funding refers to the practice of funding capital projects with cash-on-hand from taxes, fees, grants, and other sources, rather than with borrowed sums.

government service, since such expenses do not directly relate to the provision of government services.

Question 13: Are there sources of revenue that either should or should not be included in the Interim Final Rule’s measure of “general revenue” for recipients? If so, discuss why these sources either should or should not be included.

Question 14: In the Interim Final Rule, recipients are expected to calculate the reduction in revenue on an aggregate basis. Discuss the advantages and disadvantages of, and any potential concerns with, this approach, including circumstances in which it could be necessary or appropriate to calculate the reduction in revenue by source.

Question 15: Treasury is considering whether to take into account other factors, including actions taken by the recipient as well as the expiration of the COVID-19 public health emergency, in determining whether to presume that revenue losses are “due to” the COVID-19 public health emergency. Discuss the advantages and disadvantages of this presumption, including when, if ever, during the covered period it would be appropriate to reevaluate the presumption that all losses are attributable to the COVID-19 public health emergency.

Question 16: Do recipients anticipate lagged revenue effects of the public health emergency? If so, when would these lagged effects be expected to occur, and what can Treasury to do support these recipients through its implementation of the program?

Question 17: In the Interim Final Rule, paying interest or principal on government debt is not considered provision of a government service. Discuss the advantages and disadvantages of this approach, including circumstances in which paying interest or principal on government debt could be considered provision of a government service.

D. Investments in Infrastructure

To assist in meeting the critical need for investments and improvements to existing infrastructure in water, sewer, and broadband, the Fiscal Recovery Funds provide funds to State, local, and Tribal governments to make necessary investments in these sectors. The Interim Final Rule outlines eligible uses within each category, allowing for a broad range of necessary investments in projects that improve access to clean drinking water, improve wastewater and stormwater infrastructure systems, and provide access to high-quality broadband service. Necessary investments are designed to provide an adequate minimum level of service and are unlikely to be made using private sources of funds. Necessary investments include projects that are required to maintain a level of service that, at least, meets applicable health-based standards, taking into account resilience to climate change, or establishes or improves broadband service to unserved or underserved populations to reach an adequate level to permit a household to work or attend school, and that are unlikely to be met with private sources of funds.¹²⁴

It is important that necessary investments in water, sewer, or broadband infrastructure be carried out in ways that produce high-quality infrastructure, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions, not only to promote effective and efficient delivery of high-quality infrastructure projects but also to support the economic recovery through strong employment opportunities for workers. Using these practices in construction projects may help to ensure a reliable supply of

¹²⁴ Treasury notes that using funds to support or oppose collective bargaining would not be included as part of “necessary investments in water, sewer, or broadband infrastructure.”

skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries.

To provide public transparency on whether projects are using practices that promote on-time and on-budget delivery, Treasury will seek information from recipients on their workforce plans and practices related to water, sewer, and broadband projects undertaken with Fiscal Recovery Funds. Treasury will provide additional guidance and instructions on the reporting requirements at a later date.

1. Water and Sewer Infrastructure

The ARPA provides funds to State, local, and Tribal governments to make necessary investments in water and sewer infrastructure.¹²⁵ By permitting funds to be used for water and sewer infrastructure needs, Congress recognized the critical role that clean drinking water and services for the collection and treatment of wastewater and stormwater play in protecting public health. Understanding that State, local, and Tribal governments have a broad range of water and sewer infrastructure needs, the Interim Final Rule provides these governments with wide latitude to identify investments in water and sewer infrastructure that are of the highest priority for their own communities, which may include projects on privately-owned infrastructure. The Interim Final Rule does this by aligning eligible uses of the Fiscal Recovery Funds with the wide range of types or categories of projects that would be eligible to receive financial assistance through the Environmental Protection Agency's (EPA) Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF).¹²⁶

¹²⁵ §§ 602(c)(1)(D), 603(c)(1)(D) of the Act.

¹²⁶ Environmental Protection Agency, Drinking Water State Revolving fund, <https://www.epa.gov/dwsrf> (last visited Apr. 30, 2021); Environmental Protection Agency, Clean Water State Revolving Fund, <https://www.epa.gov/cwsrf> (last visited Apr. 30, 2021).

Established by the 1987 amendments¹²⁷ to the Clean Water Act (CWA),¹²⁸ the CWSRF provides financial assistance for a wide range of water infrastructure projects to improve water quality and address water pollution in a way that enables each State to address and prioritize the needs of their populations. The types of projects eligible for CWSRF assistance include projects to construct, improve, and repair wastewater treatment plants, control non-point sources of pollution, improve resilience of infrastructure to severe weather events, create green infrastructure, and protect waterbodies from pollution.¹²⁹ Each of the 51 State programs established under the CWSRF have the flexibility to direct funding to their particular environmental needs, and each State may also have its own statutes, rules, and regulations that guide project eligibility.¹³⁰

¹²⁷ Water Quality Act of 1987, P.L. 100-4.

¹²⁸ Federal Water Pollution Control Act as amended, codified at 33 U.S.C. §§ 1251 *et. seq.*, common name (Clean Water Act). In 2009, the American Recovery and Reinvestment Act created the Green Project Reserve, which increased the focus on green infrastructure, water and energy efficient, and environmentally innovative projects. P.L. 111-5. The CWA was amended by the Water Resources Reform and Development Act of 2014 to further expand the CWSRF's eligibilities. P.L. 113-121. The CWSRF's eligibilities were further expanded in 2018 by the America's Water Infrastructure Act of 2018, P.L. 115-270.

¹³⁰ 33 U.S.C. § 1383(c). See also Environmental Protection Agency, Overview of Clean Water State Revolving Fund Eligibilities (May 2016), https://www.epa.gov/sites/production/files/2016-07/documents/overview_of_cwsrf_eligibilities_may_2016.pdf; Claudia Copeland, Clean Water Act: A Summary of the Law, Congressional Research Service (Oct. 18, 2016), <https://fas.org/sgp/crs/misc/RL30030.pdf>; Jonathan L Ramseur, Wastewater Infrastructure: Overview, Funding, and Legislative Developments, Congressional Research Service (May 22, 2018), <https://fas.org/sgp/crs/misc/R44963.pdf>.

The DWSRF was modeled on the CWSRF and created as part of the 1996 amendments to the Safe Drinking Water Act (SDWA),¹³¹ with the principal objective of helping public water systems obtain financing for improvements necessary to protect public health and comply with drinking water regulations.¹³² Like the CWSRF, the DWSRF provides States with the flexibility to meet the needs of their populations.¹³³ The primary use of DWSRF funds is to assist communities in making water infrastructure capital improvements, including the installation and replacement of failing treatment and distribution systems.¹³⁴ In administering these programs, States must give priority to projects that ensure compliance with applicable health and environmental safety requirements; address the most serious risks to human health; and assist systems most in need on a per household basis according to State affordability criteria.¹³⁵

By aligning use of Fiscal Recovery Funds with the categories or types of eligible projects under the existing EPA state revolving fund programs, the Interim Final Rule provides recipients with the flexibility to respond to the needs of their communities while ensuring that investments in water and sewer infrastructure made using Fiscal Recovery Funds are necessary. As discussed above, the CWSRF and DWSRF were designed to provide funding for projects that protect public health and safety by ensuring compliance with wastewater and drinking water health

¹³¹ 42 U.S.C. 300j-12.

¹³² Environmental Protection Agency, Drinking Water State Revolving Fund Eligibility Handbook, (June 2017), https://www.epa.gov/sites/production/files/2017-06/documents/dwsrf_eligibility_handbook_june_13_2017_updated_508_version.pdf; Environmental Protection Agency, Drinking Water Infrastructure Needs Survey and Assessment: Sixth Report to Congress (March 2018), https://www.epa.gov/sites/production/files/2018-10/documents/corrected_sixth_drinking_water_infrastructure_needs_survey_and_assessment.pdf.

¹³³ *Id.*

¹³⁴ *Id.*

¹³⁵ 42 U.S.C. 300j-12(b)(3)(A).

standards.¹³⁶ The need to provide funding through the state revolving funds suggests that these projects are less likely to be addressed with private sources of funding; for example, by remediating failing or inadequate infrastructure, much of which is publicly owned, and by addressing non-point sources of pollution. This approach of aligning with the EPA state revolving fund programs also supports expedited project identification and investment so that needed relief for the people and communities most affected by the pandemic can be deployed expeditiously and have a positive impact on their health and wellbeing as soon as possible. Further, the Interim Final Rule is intended to preserve flexibility for award recipients to direct funding to their own particular needs and priorities and would not preclude recipients from applying their own additional project eligibility criteria.

In addition, responding to the immediate needs of the COVID-19 public health emergency may have diverted both personnel and financial resources from other State, local, and Tribal priorities, including projects to ensure compliance with applicable water health and quality standards and provide safe drinking and usable water.¹³⁷ Through sections 602(c)(1)(D) and 603(c)(1)(D), the ARPA provides resources to address these needs. Moreover, using Fiscal Recovery Funds in accordance with the priorities of the CWA and SWDA to “assist systems most in need on a per household basis according to state affordability criteria” would also have

¹³⁶ Environmental Protection Agency, Learn About the Clean Water State Revolving Fund, <https://www.epa.gov/cwsrf/learn-about-clean-water-state-revolving-fund-cwsrf> (last visited Apr. 30, 2021); 42 U.S.C. 300j-12.

¹³⁷ House Committee on the Budget, State and Local Governments are in Dire Need of Federal Relief (Aug. 19, 2020), <https://budget.house.gov/publications/report/state-and-local-governments-are-dire-need-federal-relief>.

the benefit of providing vulnerable populations with safe drinking water that is critical to their health and, thus, their ability to work and learn.¹³⁸

Recipients may use Fiscal Recovery Funds to invest in a broad range of projects that improve drinking water infrastructure, such as building or upgrading facilities and transmission, distribution, and storage systems, including replacement of lead service lines. Given the lifelong impacts of lead exposure for children, and the widespread nature of lead service lines, Treasury encourages recipients to consider projects to replace lead service lines.

Fiscal Recovery Funds may also be used to support the consolidation or establishment of drinking water systems. With respect to wastewater infrastructure, recipients may use Fiscal Recovery Funds to construct publicly owned treatment infrastructure, manage and treat stormwater or subsurface drainage water, facilitate water reuse, and secure publicly owned treatment works, among other uses. Finally, consistent with the CWSRF and DWSRF, Fiscal Recovery Funds may be used for cybersecurity needs to protect water or sewer infrastructure, such as developing effective cybersecurity practices and measures at drinking water systems and publicly owned treatment works.

Many of the types of projects eligible under either the CWSRF or DWSRF also support efforts to address climate change. For example, by taking steps to manage potential sources of pollution and preventing these sources from reaching sources of drinking water, projects eligible under the DWSRF and the ARPA may reduce energy required to treat drinking water. Similarly,

¹³⁸ Environmental Protection Agency, Drinking Water State Revolving Fund (Nov. 2019), https://www.epa.gov/sites/production/files/2019-11/documents/fact_sheet_-_dwsrf_overview_final_0.pdf; Environmental Protection Agency, National Benefits Analysis for Drinking Water Regulations, <https://www.epa.gov/sdwa/national-benefits-analysis-drinking-water-regulations> (last visited Apr. 30, 2020).

projects eligible under the CWSRF include measures to conserve and reuse water or reduce the energy consumption of public water treatment facilities. Treasury encourages recipients to consider green infrastructure investments and projects to improve resilience to the effects of climate change. For example, more frequent and extreme precipitation events combined with construction and development trends have led to increased instances of stormwater runoff, water pollution, and flooding. Green infrastructure projects that support stormwater system resiliency could include rain gardens that provide water storage and filtration benefits, and green streets, where vegetation, soil, and engineered systems are combined to direct and filter rainwater from impervious surfaces. In cases of a natural disaster, recipients may also use Fiscal Recovery Funds to provide relief, such as interconnecting water systems or rehabilitating existing wells during an extended drought.

Question 18: What are the advantages and disadvantages of aligning eligible uses with the eligible project type requirements of the DWSRF and CWSRF? What other water or sewer project categories, if any, should Treasury consider in addition to DWSRF and CWSRF eligible projects? Should Treasury consider a broader general category of water and sewer projects?

Question 19: What additional water and sewer infrastructure categories, if any, should Treasury consider to address and respond to the needs of unserved, underserved, or rural communities? How do these projects differ from DWSRF and CWSRF eligible projects?

Question 20: What new categories of water and sewer infrastructure, if any, should Treasury consider to support State, local, and Tribal governments in mitigating the negative impacts of climate change? Discuss emerging technologies and processes that support resiliency of water and sewer infrastructure. Discuss any challenges faced by States and local governments when pursuing or implementing climate resilient infrastructure projects.

Question 21: Infrastructure projects related to dams and reservoirs are generally not eligible under the CWSRF and DWSRF categories. Should Treasury consider expanding eligible infrastructure under the Interim Final Rule to include dam and reservoir projects? Discuss public health, environmental, climate, or equity benefits and costs in expanding the eligibility to include these types of projects.

2. Broadband Infrastructure.

The COVID-19 public health emergency has underscored the importance of universally available, high-speed, reliable, and affordable broadband coverage as millions of Americans rely on the internet to participate in, among critical activities, remote school, healthcare, and work. Recognizing the need for such connectivity, the ARPA provides funds to State, territorial, local, and Tribal governments to make necessary investments in broadband infrastructure.

The National Telecommunications and Information Administration (NTIA) highlighted the growing necessity of broadband in daily lives through its analysis of NTIA Internet Use Survey data, noting that Americans turn to broadband Internet access service for every facet of daily life including work, study, and healthcare.¹³⁹ With increased use of technology for daily activities and the movement by many businesses and schools to operating remotely during the pandemic, broadband has become even more critical for people across the country to carry out their daily lives.

¹³⁹ See, e.g., <https://www.ntia.gov/blog/2020/more-half-american-households-used-internet-health-related-activities-2019-ntia-data-show>; <https://www.ntia.gov/blog/2020/nearly-third-american-employees-worked-remotely-2019-ntia-data-show>; and generally, <https://www.ntia.gov/data/digital-nation-data-explorer>.

By at least one measure, however, tens of millions of Americans live in areas where there is no broadband infrastructure that provides download speeds greater than 25 Mbps and upload speeds of 3 Mbps.¹⁴⁰ By contrast, as noted below, many households use upload and download speeds of 100 Mbps to meet their daily needs. Even in areas where broadband infrastructure exists, broadband access may be out of reach for millions of Americans because it is unaffordable, as the United States has some of the highest broadband prices in the Organisation for Economic Co-operation and Development (OECD).¹⁴¹ There are disparities in availability as well; historically, Americans living in territories and Tribal lands as well as rural areas have disproportionately lacked sufficient broadband infrastructure.¹⁴² Moreover, rapidly growing demand has, and will likely continue to, quickly outpace infrastructure capacity, a phenomenon acknowledged by various states around the country that have set scalability requirements to account for this anticipated growth in demand.¹⁴³

¹⁴⁰ As an example, data from the Federal Communications Commission shows that as of June 2020, 9.07 percent of the U.S. population had no available cable or fiber broadband providers providing greater than 25 Mbps download speeds and 3 Mbps upload speeds. Availability was significantly less for rural versus urban populations, with 35.57 percent of the rural population lacking such access, compared with 2.57 percent of the urban population. Availability was also significantly less for tribal versus non-tribal populations, with 35.93 percent of the tribal population lacking such access, compared with 8.74 of the non-tribal population. The Interim Final Rule provides that eligible investments in broadband are those that are designed to provide services meeting adequate speeds and are provided to unserved and underserved households and businesses. Understanding that States, territories, localities, and Tribal governments have a wide range of varied broadband infrastructure needs, the Interim Final Rule provides award recipients with flexibility to identify the specific locations within their communities to be served and to otherwise design the project.

Under the Interim Final Rule, eligible projects are expected to be designed to deliver, upon project completion, service that reliably meets or exceeds symmetrical upload and download speeds of 100 Mbps. There may be instances in which it would not be practicable for a project to deliver such service speeds because of the geography, topography, or excessive costs associated with such a project. In these instances, the affected project would be expected to be designed to deliver, upon project completion, service that reliably meets or exceeds 100 Mbps download and between at least 20 Mbps and 100 Mbps upload speeds and be scalable to a minimum of 100 Mbps symmetrical for download and upload speeds.¹⁴⁴ In setting these standards, Treasury identified speeds necessary to ensure that broadband infrastructure is sufficient to enable users to generally meet household needs, including the ability to support the simultaneous use of work, education, and health applications, and also sufficiently robust to meet increasing household demands for bandwidth. Treasury also recognizes that different communities and their members may have a broad range of internet needs and that those needs may change over time.

¹⁴⁴ This scalability threshold is consistent with scalability requirements used in other jurisdictions. *Id.*

In considering the appropriate speed requirements for eligible projects, Treasury considered estimates of typical households demands during the pandemic. Using the Federal Communication Commission's (FCC) Broadband Speed Guide, for example, a household with two telecommuters and two to three remote learners today are estimated to need 100 Mbps download to work simultaneously.¹⁴⁵ In households with more members, the demands may be greater, and in households with fewer members, the demands may be less.

In considering the appropriate speed requirements for eligible projects, Treasury also considered data usage patterns and how bandwidth needs have changed over time for U.S. households and businesses as people's use of technology in their daily lives has evolved. In the few years preceding the pandemic, market research data showed that average upload speeds in the United States surpassed over 10 Mbps in 2017¹⁴⁶ and continued to increase significantly, with the average upload speed as of November, 2019 increasing to 48.41 Mbps,¹⁴⁷ attributable, in part to a shift to using broadband and the internet by individuals and businesses to create and share content using video sharing, video conferencing, and other applications.¹⁴⁸

The increasing use of data accelerated markedly during the pandemic as households across the country became increasingly reliant on tools and applications that require greater

¹⁴⁸ *Id.*

internet capacity, both to download data but also to upload data. Sending information became as important as receiving it. A video consultation with a healthcare provider or participation by a child in a live classroom with a teacher and fellow students requires video to be sent and received simultaneously.¹⁴⁹ As an example, some video conferencing technology platforms indicate that download and upload speeds should be roughly equal to support two-way, interactive video meetings.¹⁵⁰ For both work and school, client materials or completed school assignments, which may be in the form of PDF files, videos, or graphic files, also need to be shared with others. This is often done by uploading materials to a collaboration site, and the upload speed available to a user can have a significant impact on the time it takes for the content to be shared with others.¹⁵¹ These activities require significant capacity from home internet connections to both download and upload data, especially when there are multiple individuals in one household engaging in these activities simultaneously.

This need for increased broadband capacity during the pandemic was reflected in increased usage patterns seen over the last year. As OpenVault noted in recent advisories, the pandemic significantly increased the amount of data users consume. Among data users observed by OpenVault, per-subscriber average data usage for the fourth quarter of 2020 was 482.6 gigabytes per month, representing a 40 percent increase over the 344 gigabytes consumed in the fourth quarter of 2019 and a 26 percent increase over the third quarter 2020 average of

¹⁴⁹ One high definition Zoom meeting or class requires approximately 3.8 Mbps/3.0 Mbps (up/down).

¹⁵⁰ See, e.g., Zoom, System Requirements for Windows, macOS, and Linux, https://support.zoom.us/hc/en-us/articles/201362023-System-requirements-for-Windows-macOS-and-Linux#h_d278c327-e03d-4896-b19a-96a8f3c0c69c (last visited May 8, 2021).

¹⁵¹ By one estimate, to upload a one gigabit video file to YouTube would take 15 minutes at an upload speed of 10 Mbps compared with 1 minute, 30 seconds at an upload speed of 100 Mbps, and 30 seconds at an upload speed of 300 Mbps. Reviews.org: What is Symmetrical Internet? (March 2020).

383.8 gigabytes.¹⁵² OpenVault also noted significant increases in upstream usage among the data users it observed, with upstream data usage growing 63 percent – from 19 gigabytes to 31 gigabytes – between December, 2019 and December, 2020.¹⁵³ According to an OECD Broadband statistic from June 2020, the largest percentage of U.S. broadband subscribers have services providing speeds between 100 Mbps and 1 Gbps.¹⁵⁴

Jurisdictions and Federal programs are increasingly responding to the growing demands of their communities for both heightened download and upload speeds. For example, Illinois now requires 100 Mbps symmetrical service as the construction standard for its state broadband grant programs. This standard is also consistent with speed levels, particularly download speed levels, prioritized by other Federal programs supporting broadband projects. Bids submitted as part of the FCC in its Rural Digital Opportunity Fund (RDOF), established to support the construction of broadband networks in rural communities across the country, are given priority if they offer faster service, with the service offerings of 100 Mbps download and

¹⁵⁴ Organisation for Economic Co-operation and Development, Fixed broadband subscriptions per 100 inhabitants, per speed tiers (June 2020), <https://www.oecd.org/sti/broadband/5.1-FixedBB-SpeedTiers-2020-06.xls> www.oecd.org/sti/broadband/broadband-statistics.

20 Mbps upload being included in the “above baseline” performance tier set by the FCC.¹⁵⁵ The Broadband Infrastructure Program (BBIP)¹⁵⁶ of the Department of Commerce, which provides Federal funding to deploy broadband infrastructure to eligible service areas of the country also prioritizes projects designed to provide broadband service with a download speed of not less than 100 Mbps and an upload speed of not less than 20 Mbps.¹⁵⁷

The 100 Mbps upload and download speeds will support the increased and growing needs of households and businesses. Recognizing that, in some instances, 100 Mbps upload speed may be impracticable due to geographical, topographical, or financial constraints, the Interim Final Rule permits upload speeds of between at least 20 Mbps and 100 Mbps in such instances. To provide for investments that will accommodate technologies requiring symmetry in download and upload speeds, as noted above, eligible projects that are not designed to deliver, upon project completion, service that reliably meets or exceeds symmetrical speeds of 100 Mbps because it would be impracticable to do so should be designed so that they can be scalable to such speeds. Recipients are also encouraged to prioritize investments in fiber optic infrastructure where feasible, as such advanced technology enables the next generation of application solutions for all communities.

Under the Interim Final Rule, eligible projects are expected to focus on locations that are unserved or underserved. The Interim Final Rule treats users as being unserved or underserved if they lack access to a wireline connection capable of reliably delivering at least minimum speeds

¹⁵⁵ *Rural Digital Opportunity Fund*, Report and Order, 35 FCC Rcd 686, 690, para. 9 (2020), *available at* <https://www.fcc.gov/document/fcc-launches-20-billion-rural-digital-opportunity-fund-0>.

¹⁵⁶ The BBIP was authorized by the Consolidated Appropriations Act, 2021, Section 905, Public Law 116-260, 134 Stat. 1182 (Dec. 27, 2020).

¹⁵⁷ Section 905(d)(4) of the Consolidated Appropriations Act, 2021.

of 25 Mbps download and 3 Mbps upload as households and businesses lacking this level of access are generally not viewed as being able to originate and receive high-quality voice, data, graphics, and video telecommunications. This threshold is consistent with the FCC’s benchmark for an “advanced telecommunications capability.”¹⁵⁸ This threshold is also consistent with thresholds used in other Federal programs to identify eligible areas to be served by programs to improve broadband services. For example, in the FCC’s RDOF program, eligible areas include those without current (or already funded) access to terrestrial broadband service providing 25 Mbps download and 3 Mbps upload speeds.¹⁵⁹ The Department of Commerce’s BBIP also considers households to be “unserved” generally if they lack access to broadband service with a download speed of not less than 25 Mbps download and 3 Mbps upload, among other conditions. In selecting an area to be served by a project, recipients are encouraged to avoid investing in locations that have existing agreements to build reliable wireline service with minimum speeds of 100 Mbps download and 20 Mbps upload by December 31, 2024, in order to avoid duplication of efforts and resources.

Recipients are also encouraged to consider ways to integrate affordability options into their program design. To meet the immediate needs of unserved and underserved households and businesses, recipients are encouraged to focus on projects that deliver a physical broadband connection by prioritizing projects that achieve last mile-connections. Treasury also encourages recipients to prioritize support for broadband networks owned, operated by, or affiliated with

¹⁵⁸ *Deployment Report*, *supra* note 142.

¹⁵⁹ *Rural Digital Opportunity Fund*, *supra* note 156.

local governments, non-profits, and co-operatives—providers with less pressure to turn profits and with a commitment to serving entire communities.

Under sections 602(c)(1)(A) and 603(c)(1)(A), assistance to households facing negative economic impacts due to COVID-19 is also an eligible use, including internet access or digital literacy assistance. As discussed above, in considering whether a potential use is eligible under this category, a recipient must consider whether, and the extent to which, the household has experienced a negative economic impact from the pandemic.

Question 22: What are the advantages and disadvantages of setting minimum symmetrical download and upload speeds of 100 Mbps? What other minimum standards would be appropriate and why?

Question 23: Would setting such a minimum be impractical for particular types of projects? If so, where and on what basis should those projects be identified? How could such a standard be set while also taking into account the practicality of using this standard in particular types of projects? In addition to topography, geography, and financial factors, what other constraints, if any, are relevant to considering whether an investment is impracticable?

Question 24: What are the advantages and disadvantages of setting a minimum level of service at 100 Mbps download and 20 Mbps upload in projects where it is impracticable to set minimum symmetrical download and upload speeds of 100 Mbps? What are the advantages and disadvantages of setting a scalability requirement in these cases? What other minimum standards would be appropriate and why?

Question 25: What are the advantages and disadvantages of focusing these investments on those without access to a wireline connection that reliably delivers 25 Mbps download by 3 Mbps upload? Would another threshold be appropriate and why?

Question 26: What are the advantages and disadvantages of setting any particular threshold for identifying unserved or underserved areas, minimum speed standards or scalability minimum? Are there other standards that should be set (e.g., latency)? If so, why and how? How can such threshold, standards, or minimum be set in a way that balances the public's interest in making sure that reliable broadband services meeting the daily needs of all Americans are available throughout the country with the providing recipients flexibility to meet the varied needs of their communities?

III. Restrictions on Use

As discussed above, recipients have considerable flexibility to use Fiscal Recovery Funds to address the diverse needs of their communities. To ensure that payments from the Fiscal Recovery Funds are used for these congressionally permitted purposes, the ARPA includes two provisions that further define the boundaries of the statute's eligible uses. Section 602(c)(2)(A) of the Act provides that States and territories may not “use the funds ... to either directly or indirectly offset a reduction in ... net tax revenue ... resulting from a change in law, regulation, or administrative interpretation during the covered period that reduces any tax ... or delays the imposition of any tax or tax increase.” In addition, sections 602(c)(2)(B) and 603(c)(2) prohibit any recipient, including cities, nonentitlement units of government, and counties, from using Fiscal Recovery Funds for deposit into any pension fund. These restrictions support the use of funds for the congressionally permitted purposes described in Section II of this Supplementary Information by providing a backstop against the use of funds for purposes outside of the eligible use categories.

These provisions give force to Congress's clear intent that Fiscal Recovery Funds be spent within the four eligible uses identified in the statute—(1) to respond to the public health

emergency and its negative economic impacts, (2) to provide premium pay to essential workers, (3) to provide government services to the extent of eligible governments' revenue losses, and (4) to make necessary water, sewer, and broadband infrastructure investments—and not otherwise. These four eligible uses reflect Congress's judgment that the Fiscal Recovery Funds should be expended in particular ways that support recovery from the COVID-19 public health emergency. The further restrictions reflect Congress's judgment that tax cuts and pension deposits do not fall within these eligible uses. The Interim Final Rule describes how Treasury will identify when such uses have occurred and how it will recoup funds put toward these impermissible uses and, as discussed in Section VIII of this Supplementary Information, establishes a reporting framework for monitoring the use of Fiscal Recovery Funds for eligible uses.

A. Deposit into Pension Funds

The statute provides that recipients may not use Fiscal Recovery Funds for “deposit into any pension fund.” For the reasons discussed below, Treasury interprets “deposit” in this context to refer to an extraordinary payment into a pension fund for the purpose of reducing an accrued, unfunded liability. More specifically, the Interim Final Rule does not permit this assistance to be used to make a payment into a pension fund if both:

1. the payment reduces a liability incurred prior to the start of the COVID-19 public health emergency, and
2. the payment occurs outside the recipient's regular timing for making such payments.

Under this interpretation, a “deposit” is distinct from a “payroll contribution,” which occurs when employers make payments into pension funds on regular intervals, with contribution amounts based on a pre-determined percentage of employees' wages and salaries.

As discussed above, eligible uses for premium pay and responding to the negative economic impacts of the COVID-19 public health emergency include hiring and compensating public sector employees. Interpreting the scope of “deposit” to exclude contributions that are part of payroll contributions is more consistent with these eligible uses and would reduce administrative burden for recipients. Accordingly, if an employee’s wages and salaries are an eligible use of Fiscal Recovery Funds, recipients may treat the employee’s covered benefits as an eligible use of Fiscal Recovery Funds. For purposes of the Fiscal Recovery Funds, covered benefits include costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (Federal and State), workers’ compensation insurance, and Federal Insurance Contributions Act taxes (which includes Social Security and Medicare taxes).

Treasury anticipates that this approach to employees’ covered benefits will be comprehensive and, for employees whose wage and salary costs are eligible expenses, will allow all covered benefits listed in the previous paragraph to be eligible under the Fiscal Recovery Funds. Treasury expects that this will minimize the administrative burden on recipients by treating all the specified covered benefit types as eligible expenses, for employees whose wage and salary costs are eligible expenses.

Question 27: Beyond a “deposit” and a “payroll contribution,” are there other types of payments into a pension fund that Treasury should consider?

B. Offset a Reduction in Net Tax Revenue

For States and territories (recipient governments¹⁶⁰), section 602(c)(2)(A)—the offset provision—prohibits the use of Fiscal Recovery Funds to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or administrative interpretation¹⁶¹ during the covered period. If a State or territory uses Fiscal Recovery Funds to offset a reduction in net tax revenue, the ARPA provides that the State or territory must repay to the Treasury an amount equal to the lesser of (i) the amount of the applicable reduction attributable to the impermissible offset and (ii) the amount received by the State or territory under the ARPA. *See* Section IV of this Supplementary Information. As discussed below Section IV of this Supplementary Information, a State or territory that chooses to use Fiscal Recovery Funds to offset a reduction in net tax revenue does not forfeit its entire allocation of Fiscal Recovery Funds (unless it misused the full allocation to offset a reduction in net tax revenue) or any non-ARPA funding received.

The Interim Final Rule implements these conditions by establishing a framework for States and territories to determine the cost of changes in law, regulation, or interpretation that reduce tax revenue and to identify and value the sources of funds that will offset—i.e., cover the cost of—any reduction in net tax revenue resulting from such changes. A recipient government would only be considered to have used Fiscal Recovery Funds to offset a reduction in net tax revenue resulting from changes in law, regulation, or interpretation if, and to the extent that, the

¹⁶⁰ In this sub-section, “recipient governments” refers only to States and territories. In other sections, “recipient governments” refers more broadly to eligible governments receiving funding from the Fiscal Recovery Funds.

¹⁶¹ For brevity, referred to as “changes in law, regulation, or interpretation” for the remainder of this preamble.

recipient government could not identify sufficient funds from sources other than the Fiscal Recovery Funds to offset the reduction in net tax revenue. If sufficient funds from other sources cannot be identified to cover the full cost of the reduction in net tax revenue resulting from changes in law, regulation, or interpretation, the remaining amount not covered by these sources will be considered to have been offset by Fiscal Recovery Funds, in contravention of the offset provision. The Interim Final Rule recognizes three sources of funds that may offset a reduction in net tax revenue other than Fiscal Recovery Funds—organic growth, increases in revenue (e.g., an increase in a tax rate), and certain cuts in spending.

In order to reduce burden, the Interim Final Rule’s approach also incorporates the types of information and modeling already used by States and territories in their own fiscal and budgeting processes. By incorporating existing budgeting processes and capabilities, States and territories will be able to assess and evaluate the relationship of tax and budget decisions to uses of the Fiscal Recovery Funds based on information they likely have or can obtain. This approach ensures that recipient governments have the information they need to understand the implications of their decisions regarding the use of the Fiscal Recovery Funds—and, in particular, whether they are using the funds to directly or indirectly offset a reduction in net tax revenue, making them potentially subject to recoupment.

Reporting on both the eligible uses and on a State’s or territory’s covered tax changes that would reduce tax revenue will enable identification of, and recoupment for, use of Fiscal Recovery Funds to directly offset reductions in tax revenue resulting from tax relief. Moreover, this approach recognizes that, because money is fungible, even if Fiscal Recovery Funds are not explicitly or directly used to cover the costs of changes that reduce net tax revenue, those funds may be used in a manner inconsistent with the statute by indirectly being used to substitute for

the State's or territory's funds that would otherwise have been needed to cover the costs of the reduction. By focusing on the cost of changes that reduce net tax revenue—and how a recipient government is offsetting those reductions in constructing its budget over the covered period—the framework prevents efforts to use Fiscal Recovery Funds to indirectly offset reductions in net tax revenue for which the recipient government has not identified other offsetting sources of funding.

As discussed in greater detail below in this preamble, the framework set forth in the Interim Final Rule establishes a step-by-step process for determining whether, and the extent to which, Fiscal Recovery Funds have been used to offset a reduction in net tax revenue. Based on information reported annually by the recipient government:

- First, each year, each recipient government will identify and value the changes in law, regulation, or interpretation that would result in a reduction in net tax revenue, as it would in the ordinary course of its budgeting process. The sum of these values in the year for which the government is reporting is the amount it needs to “pay for” with sources other than Fiscal Recovery Funds (total value of revenue reducing changes).
- Second, the Interim Final Rule recognizes that it may be difficult to predict how a change would affect net tax revenue in future years and, accordingly, provides that if the total value of the changes in the year for which the recipient government is reporting is below a de minimis level, as discussed below, the recipient government need not identify any sources of funding to pay for revenue reducing changes and will not be subject to recoupment.
- Third, a recipient government will consider the amount of actual tax revenue recorded in the year for which they are reporting. If the recipient government's actual tax revenue is

greater than the amount of tax revenue received by the recipient for the fiscal year ending 2019, adjusted annually for inflation, the recipient government will not be considered to have violated the offset provision because there will not have been a reduction in net tax revenue.

- Fourth, if the recipient government’s actual tax revenue is less than the amount of tax revenue received by the recipient government for the fiscal year ending 2019, adjusted annually for inflation, in the reporting year the recipient government will identify any sources of funds that have been used to permissibly offset the total value of covered tax changes other than Fiscal Recovery Funds. These are:
 - State or territory tax changes that would increase any source of general fund revenue, such as a change that would increase a tax rate; and
 - Spending cuts in areas not being replaced by Fiscal Recovery Funds.

The recipient government will calculate the value of revenue reduction remaining after applying these sources of offsetting funding to the total value of revenue reducing changes—that, is, how much of the tax change has not been paid for. The recipient government will then compare that value to the difference between the baseline and actual tax revenue. A recipient government will not be required to repay to the Treasury an amount that is greater than the recipient government’s actual tax revenue shortfall relative to the baseline (i.e., fiscal year 2019 tax revenue adjusted for inflation). This “revenue reduction cap,” together with Step 3, ensures that recipient governments can use organic revenue growth to offset the cost of revenue reductions.

- Finally, if there are any amounts that could be subject to recoupment, Treasury will provide notice to the recipient government of such amounts. This process is discussed in greater detail in Section IV of this Supplementary Information.

Together, these steps allow Treasury to identify the amount of reduction in net tax revenue that both is attributable to covered changes and has been directly or indirectly offset with Fiscal Recovery Funds. This process ensures Fiscal Recovery Funds are used in a manner consistent with the statute's defined eligible uses and the offset provision's limitation on these eligible uses, while avoiding undue interference with State and territory decisions regarding tax and spending policies.

The Interim Final Rule also implements a process for recouping Fiscal Recovery Funds that were used to offset reductions in net tax revenue, including the calculation of any amounts that may be subject to recoupment, a process for a recipient government to respond to a notice of recoupment, and clarification regarding amounts excluded from recoupment. *See* Section IV of this Supplementary Information.

The Interim Final Rule includes several definitions that are applicable to the implementation of the offset provision.

Covered change. The offset provision is triggered by a reduction in net tax revenue resulting from "a change in law, regulation, or administrative interpretation." A covered change includes any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule where the phase-in or taking effect was not prescribed prior to the start of the covered period. Changed administrative interpretations would not include corrections to replace prior inaccurate interpretations; such corrections would instead be treated as changes implementing legislation enacted or regulations issued prior to the covered

period; the operative change in those circumstances is the underlying legislation or regulation that occurred prior to the covered period. Moreover, only the changes within the control of the State or territory are considered covered changes. Covered changes do not include a change in rate that is triggered automatically and based on statutory or regulatory criteria in effect prior to the covered period. For example, a state law that sets its earned income tax credit (EITC) at a fixed percentage of the Federal EITC will see its EITC payments automatically increase—and thus its tax revenue reduced—because of the Federal government’s expansion of the EITC in the ARPA.¹⁶² This would not be considered a covered change. In addition, the offset provision applies only to actions for which the change in policy occurs during the covered period; it excludes regulations or other actions that implement a change or law substantively enacted prior to March 3, 2021. Finally, Treasury has determined and previously announced that income tax changes—even those made during the covered period—that simply conform with recent changes in Federal law (including those to conform to recent changes in Federal taxation of unemployment insurance benefits and taxation of loan forgiveness under the Paycheck Protection Program) are permissible under the offset provision.

Baseline. For purposes of measuring a reduction in net tax revenue, the Interim Final Rule measures actual changes in tax revenue relative to a revenue baseline (baseline). The baseline will be calculated as fiscal year 2019 (FY 2019) tax revenue indexed for inflation in

¹⁶² See, e.g., Tax Policy Center, How do state earned income tax credits work?, <https://www.taxpolicycenter.org/briefing-book/how-do-state-earned-income-tax-credits-work/> (last visited May 9, 2021).

each year of the covered period, with inflation calculated using the Bureau of Economic Analysis's Implicit Price Deflator.¹⁶³

FY 2019 was chosen as the starting year for the baseline because it is the last full fiscal year prior to the COVID-19 public health emergency.¹⁶⁴ This baseline year is consistent with the approach directed by the ARPA in sections 602(c)(1)(C) and 603(c)(1)(C), which identify the “most recent full fiscal year of the [State, territory, or Tribal government] prior to the emergency” as the comparator for measuring revenue loss. U.S. gross domestic product is projected to rebound to pre-pandemic levels in 2021,¹⁶⁵ suggesting that an FY 2019 pre-pandemic baseline is a reasonable comparator for future revenue levels. The FY 2019 baseline revenue will be adjusted annually for inflation to allow for direct comparison of actual tax revenue in each year (reported in nominal terms) to baseline revenue in common units of measurement; without inflation adjustment, each dollar of reported actual tax revenue would be worth less than each dollar of baseline revenue expressed in 2019 terms.

Reporting year. The Interim Final Rule defines “reporting year” as a single year within the covered period, aligned to the current fiscal year of the recipient government during the covered period, for which a recipient government reports the value of covered changes and any sources of offsetting revenue increases (“in-year” value), regardless of when those changes were enacted. For the fiscal years ending in 2021 or 2025 (partial years), the term “reporting year”

¹⁶³ U.S. Department of Commerce, Bureau of Economic Analysis, GDP Price Deflator, <https://www.bea.gov/data/prices-inflation/gdp-price-deflator> (last visited May 9, 2021).

¹⁶⁴ Using Fiscal Year 2019 is consistent with section 602 as Congress provided for using that baseline for determining the impact of revenue loss affecting the provision of government services. *See* section 602(c)(1)(C).

¹⁶⁵ Congressional Budget Office, An Overview of the Economic Outlook: 2021 to 2031 (February 1, 2021), *available at* <https://www.cbo.gov/publication/56965>.

refers to the portion of the year falling within the covered period. For example, the reporting year for a fiscal year beginning July 2020 and ending June 2021 would be from March 3, 2021 to July 2021.

Tax revenue. The Interim Final Rule’s definition of “tax revenue” is based on the Census Bureau’s definition of taxes, used for its Annual Survey of State Government Finances.¹⁶⁶ It provides a consistent, well-established definition with which States and territories will be familiar and is consistent with the approach taken in Section II.C of this Supplementary Information describing the implementation of sections 602(c)(1)(C) and 603(c)(1)(C) of the Act, regarding revenue loss. Consistent with the approach described in Section II.C of this Supplementary Information, tax revenue does not include revenue taxed and collected by a different unit of government (e.g., revenue from taxes levied by a local government and transferred to a recipient government).

Framework. The Interim Final Rule provides a step-by-step framework, to be used in each reporting year, to calculate whether the offset provision applies to a State’s or territory’s use of Fiscal Recovery Funds:

(1) *Covered changes that reduce tax revenue.* For each reporting year, a recipient government will identify and value covered changes that the recipient government predicts will have the effect of reducing tax revenue in a given reporting year, similar to the way it would in the ordinary course of its budgeting process. The value of these covered changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, that aligns with the recipient government’s existing approach for measuring the

¹⁶⁶ U.S. Census Bureau, Annual Survey of State and Local Government Finances Glossary, <https://www.census.gov/programs-surveys/state/about/glossary.html> (last visited Apr. 30, 2021).

effects of fiscal policies, and that measures relative to a current law baseline. The covered changes may also be reported based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s), relative to the current law baseline prior to the change(s). Further, estimation approaches should not use dynamic methodologies that incorporate the projected effects of macroeconomic growth because macroeconomic growth is accounted for separately in the framework. Relative to these dynamic scoring methodologies, scoring methodologies that do not incorporate projected effects of macroeconomic growth rely on fewer assumptions and thus provide greater consistency among States and territories. Dynamic scoring that incorporates macroeconomic growth may also increase the likelihood of underestimation of the cost of a reduction in tax revenue.

In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. This approach offers recipient governments the flexibility to determine their reporting methodology based on their existing budget scoring practices and capabilities. In addition, the approach of using the projected value of changes in law that enact fiscal policies to estimate the net effect of such policies is consistent with the way many States and territories already consider tax changes.¹⁶⁷

(2) *In excess of the de minimis*. The recipient government will next calculate the total value of all covered changes in the reporting year resulting in revenue reductions, identified in Step 1. If the total value of the revenue reductions resulting from these changes is below the de

¹⁶⁷ See, e.g., Megan Randall & Kim Rueben, Tax Policy Center, Sustainable Budgeting in the States: Evidence on State Budget Institutions and Practices (Nov. 2017), *available at* https://www.taxpolicycenter.org/sites/default/files/publication/149186/sustainable-budgeting-in-the-states_1.pdf.

de minimis level, the recipient government will be deemed not to have any revenue-reducing changes for the purpose of determining the recognized net reduction. If the total is above the de minimis level, the recipient government must identify sources of in-year revenue to cover the full costs of changes that reduce tax revenue.

The de minimis level is calculated as 1 percent of the reporting year's baseline. Treasury recognizes that, pursuant to their taxing authority, States and territories may make many small changes to alter the composition of their tax revenues or implement other policies with marginal effects on tax revenues. They may also make changes based on projected revenue effects that turn out to differ from actual effects, unintentionally resulting in minor revenue changes that are not fairly described as "resulting from" tax law changes. The de minimis level recognizes the inherent challenges and uncertainties that recipient governments face, and thus allows relatively small reductions in tax revenue without consequence. Treasury determined the 1 percent level by assessing the historical effects of state-level tax policy changes in state EITCs implemented to effect policy goals other than reducing net tax revenues.¹⁶⁸ The 1 percent de minimis level reflects the historical reductions in revenue due to minor changes in state fiscal policies.

(3) *Safe harbor*. The recipient government will then compare the reporting year's actual tax revenue to the baseline. If actual tax revenue is greater than the baseline, Treasury will deem the recipient government not to have any recognized net reduction for the reporting year, and therefore to be in a safe harbor and outside the ambit of the offset provision. This approach is consistent with the ARPA, which contemplates recoupment of Fiscal Recovery Funds only in the event that such funds are used to offset a reduction in net tax revenue. If net tax revenue has not

¹⁶⁸ Data provided by the Urban-Brookings Tax Policy Center for state-level EITC changes for 2004-2017.

been reduced, this provision does not apply. In the event that actual tax revenue is above the baseline, the organic revenue growth that has occurred, plus any other revenue-raising changes, by definition must have been enough to offset the in-year costs of the covered changes.

(4) *Consideration of other sources of funding.* Next, the recipient government will identify and calculate the total value of changes that could pay for revenue reduction due to covered changes and sum these items. This amount can be used to pay for up to the total value of revenue-reducing changes in the reporting year. These changes consist of two categories:

(a) *Tax and other increases in revenue.* The recipient government must identify and consider covered changes in policy that the recipient government predicts will have the effect of increasing general revenue in a given reporting year. As when identifying and valuing covered changes that reduce tax revenue, the value of revenue-raising changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, aligned with the recipient government's existing approach for measuring the effects of fiscal policies, and measured relative to a current law baseline, or based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s). Further, and as discussed above, estimation approaches should not use dynamic scoring methodologies that incorporate the effects of macroeconomic growth because growth is accounted for separately under the Interim Final Rule. In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. This approach offers recipient governments the flexibility to determine their reporting methodology based on their existing budget scoring practices and capabilities.

(b) *Covered spending cuts.* A recipient government also may cut spending in certain areas to pay for covered changes that reduce tax revenue, up to the amount of the recipient government's net reduction in total spending as described below. These changes must be reductions in government outlays not in an area where the recipient government has spent Fiscal Recovery Funds. To better align with existing reporting and accounting, the Interim Final Rule considers the department, agency, or authority from which spending has been cut and whether the recipient government has spent Fiscal Recovery Funds on that same department, agency, or authority. This approach was selected to allow recipient governments to report how Fiscal Recovery Funds have been spent using reporting units already incorporated into their budgeting process. If they have not spent Fiscal Recovery Funds in a department, agency, or authority, the full amount of the reduction in spending counts as a covered spending cut, up to the recipient government's net reduction in total spending. If they have, the Fiscal Recovery Funds generally would be deemed to have replaced the amount of spending cut and only reductions in spending above the amount of Fiscal Recovery Funds spent on the department, agency, or authority would count.

To calculate the amount of spending cuts that are available to offset a reduction in tax revenue, the recipient government must first consider whether there has been a reduction in total net spending, excluding Fiscal Recovery Funds (net reduction in total spending). This approach ensures that reported spending cuts actually create fiscal space, rather than simply offsetting other spending increases. A net reduction in total spending is measured as the difference between total spending in each reporting year, excluding Fiscal Recovery Funds spent, relative to total spending for the recipient's fiscal year ending in 2019, adjusted for inflation. Measuring reductions in spending relative to 2019 reflects the fact that the fiscal space created by a

spending cut persists so long as spending remains below its original level, even if it does not decline further, relative to the same amount of revenue. Measuring spending cuts from year to year would, by contrast, not recognize any available funds to offset revenue reductions unless spending continued to decline, failing to reflect the actual availability of funds created by a persistent change and limiting the discretion of States and territories. In general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. Treasury chose this approach because while many recipient governments may score budget legislation using projections, spending cuts are readily observable using actual values.

This approach—allowing only spending reductions in areas where the recipient government has not spent Fiscal Recovery Funds to be used as an offset for a reduction in net tax revenue—aims to prevent recipient governments from using Fiscal Recovery Funds to supplant State or territory funding in the eligible use areas, and then use those State or territory funds to offset tax cuts. Such an approach helps ensure that Fiscal Recovery Funds are not used to “indirectly” offset revenue reductions due to covered changes.

In order to help ensure recipient governments use Fiscal Recovery Funds in a manner consistent with the prescribed eligible uses and do not use Fiscal Recovery Funds to indirectly offset a reduction in net tax revenue resulting from a covered change, Treasury will monitor changes in spending throughout the covered period. If, over the course of the covered period, a spending cut is subsequently replaced with Fiscal Recovery Funds and used to indirectly offset a reduction in net tax revenue resulting from a covered change, Treasury may consider such change to be an evasion of the restrictions of the offset provision and seek recoupment of such amounts.

(5) *Identification of amounts subject to recoupment.* If a recipient government (i) reports covered changes that reduce tax revenue (Step 1); (ii) to a degree greater than the de minimis (Step 2); (iii) has experienced a reduction in net tax revenue (Step 3); and (iv) lacks sufficient revenue from other, permissible sources to pay for the entirety of the reduction (Step 4), then the recipient government will be considered to have used Fiscal Recovery Funds to offset a reduction in net tax revenue, up to the amount that revenue has actually declined. That is, the maximum value of reduction in revenue due to covered changes which a recipient government must cover is capped at the difference between the baseline and actual tax revenue.¹⁶⁹ In the event that the baseline is above actual tax revenue and the difference between them is less than the sum of revenue reducing changes that are not paid for with other, permissible sources, organic revenue growth has implicitly offset a portion of the reduction. For example, if a recipient government reduces tax revenue by \$1 billion, makes no other changes, and experiences revenue growth driven by organic economic growth worth \$500 million, it need only pay for the remaining \$500 million with sources other than Fiscal Recovery Funds. The revenue reduction cap implements this approach for permitting organic revenue growth to cover the cost of tax cuts.

Finally, as discussed further in Section IV of this Supplementary Information, a recipient government may request reconsideration of any amounts identified as subject to recoupment under this framework. This process ensures that all relevant facts and circumstances, including information regarding planned spending cuts and budgeting assumptions, are considered prior to a determination that an amount must be repaid. Amounts subject to recoupment are calculated

¹⁶⁹ This cap is applied in section 35.8(c) of the Interim Final Rule, calculating the amount of funds used in violation of the tax offset provision.

on an annual basis; amounts recouped in one year cannot be returned if the State or territory subsequently reports an increase in net tax revenue.

To facilitate the implementation of the framework above, and in addition to reporting required on eligible uses, in each year of the reporting period, each State and territory will report to Treasury the following items:

- Actual net tax revenue for the reporting year;
- Each revenue-reducing change made to date during the covered period and the in-year value of each change;
- Each revenue-raising change made to date during the covered period and the in-year value of each change;
- Each covered spending cut made to date during the covered period, the in-year value of each cut, and documentation demonstrating that each spending cut is covered as prescribed under the Interim Final Rule;

Treasury will provide additional guidance and instructions the reporting requirements at a later date.

Question 28: Does the Interim Final Rule's definition of tax revenue accord with existing State and territorial practice and, if not, are there other definitions or elements Treasury should consider? Discuss why or why not.

Question 29: The Interim Final Rule permits certain spending cuts to cover the costs of reductions in tax revenue, including cuts in a department, agency, or authority in which the recipient government is not using Fiscal Recovery Funds. How should Treasury and recipient governments consider the scope of a department, agency, or authority for the use of funds to

ensure spending cuts are not being substituted with Fiscal Recovery Funds while also avoiding an overbroad definition of that captures spending that is, in fact, distinct?

Question 30: Discuss the budget scoring methodologies currently used by States and territories. How should the Interim Final Rule take into consideration differences in approaches? Please discuss the use of practices including but not limited to macrodynamic scoring, microdynamic scoring, and length of budget windows.

Question 31: If a recipient government has a balanced budget requirement, how will that requirement impact its use of Fiscal Recovery Funds and ability to implement this framework?

Question 32: To implement the framework described above, the Interim Final Rule establishes certain reporting requirements. To what extent do recipient governments already produce this information and on what timeline? Discuss ways that Treasury and recipient governments may better rely on information already produced, while ensuring a consistent application of the framework.

Question 33: Discuss States' and territories' ability to produce the figures and numbers required for reporting under the Interim Final Rule. What additional reporting tools, such as a standardized template, would facilitate States' and territories' ability to complete the reporting required under the Interim Final Rule?

C. Other Restrictions on Use

Payments from the Fiscal Recovery Funds are also subject to pre-existing limitations provided in other Federal statutes and regulations and may not be used as non-Federal match for other Federal programs whose statute or regulations bar the use of Federal funds to meet

matching requirements. For example, payments from the Fiscal Recovery Funds may not be used to satisfy the State share of Medicaid.¹⁷⁰

As provided for in the award terms, payments from the Fiscal Recovery Funds as a general matter will be subject to the provisions of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR 200) (the Uniform Guidance), including the cost principles and restrictions on general provisions for selected items of cost.

D. Timeline for Use of Fiscal Recovery Funds

Section 602(c)(1) and section 603(c)(1) require that payments from the Fiscal Recovery Funds be used only to cover costs incurred by the State, territory, Tribal government, or local government by December 31, 2024. Similarly, the CARES Act provided that payments from the CRF be used to cover costs incurred by December 31, 2021.¹⁷¹ The definition of “incurred” does not have a clear meaning. With respect to the CARES Act, on the understanding that the CRF was intended to be used to meet relatively short-term needs, Treasury interpreted this requirement to mean that, for a cost to be considered to have been incurred, performance of the service or delivery of the goods acquired must occur by December 31, 2021. In contrast, the ARPA, passed at a different stage of the COVID-19 public health emergency, was intended to provide more general fiscal relief over a broader timeline. In addition, the ARPA expressly permits the use of Fiscal Recovery Funds for improvements to water, sewer, and broadband infrastructure, which entail a longer timeframe. In recognition of this, Treasury is interpreting

¹⁷⁰ See 42 CFR 433.51 and 45 CFR 75.306.

¹⁷¹ Section 1001 of Division N of the Consolidated Appropriations Act, 2021 amended section 601(d)(3) of the Act by extending the end of the covered period for CRF expenditures from December 30, 2020 to December 31, 2021.

the requirement in section 602 and section 603 that costs be incurred by December 31, 2024, to require only that recipients have obligated the Fiscal Recovery Funds by such date. The Interim Final Rule adopts a definition of “obligation” that is based on the definition used for purposes of the Uniform Guidance, which will allow for uniform administration of this requirement and is a definition with which most recipients will be familiar.

Payments from the Fiscal Recovery Funds are grants provided to recipients to mitigate the fiscal effects of the COVID-19 public health emergency and to respond to the public health emergency, consistent with the eligible uses enumerated in sections 602(c)(1) and 603(c)(1).¹⁷² As such, these funds are intended to provide economic stimulus in areas still recovering from the economic effects of the pandemic. In implementing and interpreting these provisions, including what it means to “respond to” the COVID-19 public health emergency, Treasury takes into consideration pre-pandemic facts and circumstances (e.g., average revenue growth prior to the pandemic) as well as impact of the pandemic that predate the enactment of the ARPA (e.g., replenishing Unemployment Trust balances drawn during the pandemic). While assessing the effects of the COVID-19 public health emergency necessarily takes into consideration the facts and circumstances that predate the ARPA, use of Fiscal Recovery Funds is forward looking.

As discussed above, recipients are permitted to use payments from the Fiscal Recovery Funds to respond to the public health emergency, to respond to workers performing essential work by providing premium pay or providing grants to eligible employers, and to make necessary investments in water, sewer, or broadband infrastructure, which all relate to prospective uses. In addition, sections 602(c)(1)(C) and 603(c)(1)(C) permit recipients to use

¹⁷² §§ 602(a), 603(a), 602(c)(1) and 603(c)(1) of the Act.

Fiscal Recovery Funds for the provision of government services. This clause provides that the amount of funds that may be used for this purpose is measured by reference to the reduction in revenue due to the public health emergency relative to revenues collected in the most recent full fiscal year, but this reference does not relate to the period during which recipients may use the funds, which instead refers to prospective uses, consistent with the other eligible uses.

Although as discussed above the eligible uses of payments from the Fiscal Recovery Funds are all prospective in nature, Treasury considers the beginning of the covered period for purposes of determining compliance with section 602(c)(2)(A) to be the relevant reference point for this purpose. The Interim Final Rule thus permits funds to be used to cover costs incurred beginning on March 3, 2021. This aligns the period for use of Fiscal Recovery Funds with the period during which these funds may not be used to offset reductions in net tax revenue. Permitting Fiscal Recovery Funds to be used to cover costs incurred beginning on this date will also mean that recipients that began incurring costs in the anticipation of enactment of the ARPA and in advance of the issuance of this rule and receipt of payment from the Fiscal Recovery Funds would be able to cover them using these payments.¹⁷³

As set forth in the award terms, the period of performance will run until December 31, 2026, which will provide recipients a reasonable amount of time to complete projects funded with payments from the Fiscal Recovery Funds.

¹⁷³ Given the nature of this program, recipients will not be permitted to use funds to cover pre-award costs, *i.e.*, those incurred prior to March 3, 2021.

IV. Recoupment Process

Under the ARPA, failure to comply with the restrictions on use contained in sections 602(c) and 603(c) of the Act may result in recoupment of funds.¹⁷⁴ The Interim Final Rule implements these provisions by establishing a process for recoupment.

Identification and Notice of Violations. Failure to comply with the restrictions on use will be identified based on reporting provided by the recipient. As discussed further in Sections III.B and VIII of this Supplementary Information, Treasury will collect information regarding eligible uses on a quarterly basis and on the tax offset provision on an annual basis. Treasury also may consider other information in identifying a violation, such as information provided by members of the public. If Treasury identifies a violation, it will provide written notice to the recipient along with an explanation of such amounts.

Request for Reconsideration. Under the Interim Final Rule, a recipient may submit a request for reconsideration of any amounts identified in the notice provided by Treasury. This reconsideration process provides a recipient the opportunity to submit additional information it believes supports its request in light of the notice of recoupment, including, for example, additional information regarding the recipient's use of Fiscal Recovery Funds or its tax revenues. The process also provides the Secretary with an opportunity to consider all information relevant to whether a violation has occurred, and if so, the appropriate amount for recoupment.

The Interim Final Rule also establishes requirements for the timing of a request for reconsideration. Specifically, if a recipient wishes to request reconsideration of any amounts identified in the notice, the recipient must submit a written request for reconsideration to the

¹⁷⁴ §§ 602(e) and 603(e) of the Act.

Secretary within 60 calendar days of receipt of such notice. The request must include an explanation of why the recipient believes that the finding of a violation or recoupable amount identified in the notice of recoupment should be reconsidered. To facilitate the Secretary's review of a recipient's request for reconsideration, the request should identify all supporting reasons for the request. Within 60 calendar days of receipt of the recipient's request for reconsideration, the recipient will be notified of the Secretary's decision to affirm, withdraw, or modify the notice of recoupment. Such notification will include an explanation of the decision, including responses to the recipient's supporting reasons and consideration of additional information provided.

The process and timeline established by the Interim Final Rule are intended to provide the recipient with an adequate opportunity to fully present any issues or arguments in response to the notice of recoupment.¹⁷⁵ This process will allow the Secretary to respond to the issues and considerations raised in the request for reconsideration taking into account the information and arguments presented by the recipient along with any other relevant information.

Repayment. Finally, the Interim Final Rule provides that any amounts subject to recoupment must be repaid within 120 calendar days of receipt of any final notice of recoupment or, if the recipient has not requested reconsideration, within 120 calendar days of the initial notice provided by the Secretary.

Question 34: Discuss the timeline for requesting reconsideration under the Interim Final Rule. What, if any, challenges does this timeline present?

¹⁷⁵ The Interim Final Rule also provides that Treasury may extend any deadlines.

V. Payments in Tranches to Local Governments and Certain States

Section 603 of the Act provides that the Secretary will make payments to local governments in two tranches, with the second tranche being paid twelve months after the first payment. In addition, section 602(b)(6)(A)(ii) provides that the Secretary may withhold payment of up to 50 percent of the amount allocated to each State and territory for a period of up to twelve months from the date on which the State or territory provides its certification to the Secretary. Any such withholding for a State or territory is required to be based on the unemployment rate in the State or territory as of the date of the certification.

The Secretary has determined to provide in this Interim Final Rule for withholding of 50 percent of the amount of Fiscal Recovery Funds allocated to all States (and the District of Columbia) other than those with an unemployment rate that is 2.0 percentage points or more above its pre-pandemic (i.e., February 2020) level. The Secretary will refer to the latest available monthly data from the Bureau of Labor Statistics as of the date the certification is provided. Based on data available at the time of public release of this Interim Final Rule, this threshold would result in a majority of States being paid in two tranches.

Splitting payments for the majority of States is consistent with the requirement in section 603 of the Act to make payments from the Coronavirus Local Fiscal Recovery Fund to local governments in two tranches.¹⁷⁶ Splitting payments to States into two tranches will help

¹⁷⁶ With respect to Federal financial assistance more generally, States are subject to the requirements of the Cash Management Improvement Act (CMIA), under which Federal funds are drawn upon only on an as needed basis and States are required to remit interest on unused balances to Treasury. Given the statutory requirement for Treasury to make payments to States within a certain period, these requirements of the CMIA and Treasury's implementing regulations at 31 CFR part 205 will not apply to payments from the Fiscal Recovery Funds. Providing funding in two tranches to the majority of States reflects, to the maximum extent permitted by section 602 of the Act, the general principles of Federal cash management and stewardship of federal funding, yet will be much less restrictive than the usual requirements to which States are subject.

encourage recipients to adapt, as necessary, to new developments that could arise over the coming twelve months, including potential changes to the nature of the public health emergency and its negative economic impacts. While the U.S. economy has been recovering and adding jobs in aggregate, there is still considerable uncertainty in the economic outlook and the interaction between the pandemic and the economy.¹⁷⁷ For these reasons, Treasury believes it will be appropriate for a majority of recipients to adapt their plans as the recovery evolves. For example, a faster-than-expected economic recovery in 2021 could lead a recipient to dedicate more Fiscal Recovery Funds to longer-term investments starting in 2022. In contrast, a slower-than-expected economic recovery in 2021 could lead a recipient to use additional funds for near-term stimulus in 2022.

At the same time, the statute contemplates the possibility that elevated unemployment in certain States could justify a single payment. Elevated unemployment is indicative of a greater need to assist unemployed workers and stimulate a faster economic recovery. For this reason, the Interim Final Rule provides that States and territories with an increase in their unemployment rate over a specified threshold may receive a single payment, with the expectation that a single tranche will better enable these States and territories to take additional immediate action to aid the unemployed and strengthen their economies.

Following the initial pandemic-related spike in unemployment in 2020, States' unemployment rates have been trending back towards pre-pandemic levels. However, some States' labor markets are healing more slowly than others. Moreover, States varied widely in

¹⁷⁷ The potential course of the virus, and its impact on the economy, has contributed to a heightened degree of uncertainty relative to prior periods. *See, e.g.,* Dave Altig et al., Economic uncertainty before and during the COVID-19 pandemic, *J. of Public Econ.* (Nov. 2020), *available at* <https://www.sciencedirect.com/science/article/abs/pii/S0047272720301389>

their pre-pandemic levels of unemployment, and some States remain substantially further from their pre-pandemic starting point. Consequently, Treasury is delineating States with significant remaining elevation in the unemployment rate, based on the net difference to pre-pandemic levels.

Treasury has established that significant remaining elevation in the unemployment rate is a net change in the unemployment rate of 2.0 percentage points or more relative to pre-pandemic levels. In the four previous recessions going back to the early 1980s, the national unemployment rate rose by 3.6, 2.3, 2.0, and 5.0 percentage points, as measured from the start of the recession to the eventual peak during or immediately following the recession.¹⁷⁸ Each of these increases can therefore represent a recession's impact on unemployment. To identify States with significant remaining elevation in unemployment, Treasury took the lowest of these four increases, 2.0 percentage points, to indicate states where, despite improvement in the unemployment rate, current labor market conditions are consistent still with a historical benchmark for a recession.

No U.S. territory will be subject to withholding of its payment from the Fiscal Recovery Funds. For Puerto Rico, the Secretary has determined that the current level of the unemployment rate (8.8 percent, as of March 2021¹⁷⁹) is sufficiently high such that Treasury should not withhold any portion of its payment from the Fiscal Recovery Funds regardless of its change in

¹⁷⁸ Includes the period during and immediately following recessions, as defined by the National Bureau of Economic Research. National Bureau of Economic Research, US Business Cycle Expansions and Contractions, <https://www.nber.org/research/data/us-business-cycle-expansions-and-contractions> (last visited Apr. 27, 2021). Based on data from U.S. Bureau of Labor Statistics, Unemployment Rate [UNRATE], retrieved from FRED, Federal Reserve Bank of St. Louis, <https://fred.stlouisfed.org/series/UNRATE> (last visited Apr. 27, 2021).

¹⁷⁹ U.S. Bureau of Labor Statistics, Economic News Release – Table 1. Civilian labor force and unemployment by state and selected area, seasonally adjusted, <https://www.bls.gov/news.release/laus.t01.htm> (last visited Apr. 30, 2021).

unemployment rate relative to its pre-pandemic level. For U.S. territories that are not included in the Bureau of Labor Statistics' monthly unemployment rate data, the Secretary will not exercise the authority to withhold amounts from the Fiscal Recovery Funds.

VI. Transfer

The statute authorizes State, territorial, and Tribal governments; counties; metropolitan cities; and nonentitlement units of local government (counties, metropolitan cities, and nonentitlement units of local government are collectively referred to as “local governments”) to transfer amounts paid from the Fiscal Recovery Funds to a number of specified entities. By permitting these transfers, Congress recognized the importance of providing flexibility to governments seeking to achieve the greatest impact with their funds, including by working with other levels or units of government or private entities to assist recipient governments in carrying out their programs. This includes special-purpose districts that perform specific functions in the community, such as fire, water, sewer, or mosquito abatement districts.

Specifically, under section 602(c)(3), a State, territory, or Tribal government may transfer funds to a “private nonprofit organization . . . a Tribal organization . . . a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of State or local government.”¹⁸⁰ Similarly, section 603(c)(3) authorizes a local government to transfer funds to the same entities (other than Tribal organizations).

The Interim Final Rule clarifies that the lists of transferees in Sections 602(c)(3) and 603(c)(3) are not exclusive. The Interim Final Rule permits State, territorial, and Tribal governments to transfer Fiscal Recovery Funds to other constituent units of government or

¹⁸⁰ § 602(c)(3) of the Act.

private entities beyond those specified in the statute. Similarly, local governments are authorized to transfer Fiscal Recovery Funds to other constituent units of government (e.g., a county is able to transfer Fiscal Recovery Funds to a city, town, or school district within it) or to private entities. This approach is intended to help provide funding to local governments with needs that may exceed the allocation provided under the statutory formula.

State, local, territorial, and Tribal governments that receive a Federal award directly from a Federal awarding agency, such as Treasury, are “recipients.” A transferee receiving a transfer from a recipient under sections 602(c)(3) and 603(c)(3) will be a subrecipient. Subrecipients are entities that receive a subaward from a recipient to carry out a program or project on behalf of the recipient with the recipient’s Federal award funding. The recipient remains responsible for monitoring and overseeing the subrecipient’s use of Fiscal Recovery Funds and other activities related to the award to ensure that the subrecipient complies with the statutory and regulatory requirements and the terms and conditions of the award. Recipients also remain responsible for reporting to Treasury on their subrecipients’ use of payments from the Fiscal Recovery Funds for the duration of the award.

Transfers under sections 602(c)(3) and 603(c)(3) must qualify as an eligible use of Fiscal Recovery Funds by the transferor. Once Fiscal Recovery Funds are received, the transferee must abide by the restrictions on use applicable to the transferor under the ARPA and other applicable law and program guidance. For example, if a county transferred Fiscal Recovery Funds to a town within its borders to respond to the COVID-19 public health emergency, the town would be bound by the eligible use requirements applicable to the county in carrying out the county’s goal. This also means that county A may not transfer Fiscal Recovery Funds to county B for use in

county B because such a transfer would not, from the perspective of the transferor (county A), be an eligible use in county A.

Section 603(c)(4) separately provides for transfers by a local government to its State or territory. A transfer under section 603(c)(4) will not make the State a subrecipient of the local government, and such Fiscal Recovery Funds may be used by the State for any purpose permitted under section 602(c). A transfer under section 603(c)(4) will result in a cancellation or termination of the award on the part of the transferor local government and a modification of the award to the transferee State or territory. The transferor must provide notice of the transfer to Treasury in a format specified by Treasury. If the local government does not provide such notice, it will remain legally obligated to Treasury under the award and remain responsible for ensuring that the awarded Fiscal Recovery Funds are being used in accordance with the statute and program guidance and for reporting on such uses to Treasury. A State that receives a transfer from a local government under section 603(c)(4) will be bound by all of the use restrictions set forth in section 602(c) with respect to the use of those Fiscal Recovery Funds, including the prohibitions on use of such Fiscal Recovery Funds to offset certain reductions in taxes or to make deposits into pension funds.

Question 35: What are the advantages and disadvantages of treating the list of transferees in sections 602(c)(3) and 603(c)(3) as nonexclusive, allowing States and localities to transfer funds to entities outside of the list?

Question 36: Are there alternative ways of defining “special-purpose unit of State or local government” and “public benefit corporation” that would better further the aims of the Funds?

VII. Nonentitlement Units of Government

The Fiscal Recovery Funds provides for \$19.53 billion in payments to be made to States and territories which will distribute the funds to nonentitlement units of local government (NEUs); local governments which generally have populations below 50,000. These local governments have not yet received direct fiscal relief from the Federal government during the COVID-19 public health emergency, making Fiscal Recovery Funds payments an important source of support for their public health and economic responses. Section 603 requires Treasury to allocate and pay Fiscal Recovery Funds to the States and territories and requires the States and territories to distribute Fiscal Recovery Funds to NEUs based on population within 30 days of receipt unless an extension is granted by the Secretary. The Interim Final Rule clarifies certain aspects regarding the distribution of Fiscal Recovery by States and territories to NEUs, as well as requirements around timely payments from the Fiscal Recovery Funds.

The ARPA requires that States and territories allocate funding to NEUs in an amount that bears the same proportion as the population of the NEU bears to the total population of all NEUs in the State or territory, subject to a cap (described below). Because the statute requires States and territories to make distributions based on population, States and territories may not place additional conditions or requirements on distributions to NEUs, beyond those required by the ARPA and Treasury's implementing regulations and guidance. For example, a State may not impose stricter limitations than permitted by statute or Treasury regulations or guidance on an NEU's use of Fiscal Recovery Funds based on the NEU's proposed spending plan or other policies. States and territories are also not permitted to offset any debt owed by the NEU against the NEU's distribution. Further, States and territories may not provide funding on a reimbursement basis—e.g., requiring NEUs to pay for project costs up front before being

reimbursed with Fiscal Recovery Funds payments—because this funding model would not comport with the statutory requirement that States and territories make distributions to NEUs within the statutory timeframe.

Similarly, States and territories distributing Fiscal Recovery Funds payments to NEUs are responsible for complying with the Fiscal Recovery Funds statutory requirement that distributions to NEUs not exceed 75 percent of the NEU's most recent budget. The most recent budget is defined as the NEU's most recent annual total operating budget, including its general fund and other funds, as of January 27, 2020. Amounts in excess of such cap and therefore not distributed to the NEU must be returned to Treasury by the State or territory. States and territories may rely for this determination on a certified top-line budget total from the NEU.

Under the Interim Final Rule, the total allocation and distribution to an NEU, including the sum of both the first and second tranches of funding, cannot exceed the 75 percent cap. States and territories must permit NEUs without formal budgets as of January 27, 2020 to self-certify their most recent annual expenditures as of January 27, 2020 for the purpose of calculating the cap. This approach will provide an administrable means to implement the cap for small local governments that do not adopt a formal budget.

Section 603(b)(3) of the Social Security Act provides for Treasury to make payments to counties but provides that, in the case of an amount to be paid to a county that is not a unit of general local government, the amount shall instead be paid to the State in which such county is located, and such State shall distribute such amount to each unit of general local government within such county in an amount that bears the same proportion to the amount to be paid to such county as the population of such units of general local government bears to the total population of such county. As with NEUs, States may not place additional conditions or requirements on

distributions to such units of general local government, beyond those required by the ARPA and Treasury's implementing regulations and guidance.

In the case of consolidated governments, section 603(b)(4) allows consolidated governments (e.g., a city-county consolidated government) to receive payments under each allocation based on the respective formulas. In the case of a consolidated government, Treasury interprets the budget cap to apply to the consolidated government's NEU allocation under section 603(b)(2) but not to the consolidated government's county allocation under section 603(b)(3).

If necessary, States and territories may use the Fiscal Recovery Funds under section 602(c)(1)(A) to fund expenses related to administering payments to NEUs and units of general local government, as disbursing these funds itself is a response to the public health emergency and its negative economic impacts. If a State or territory requires more time to disburse Fiscal Recovery Funds to NEUs than the allotted 30 days, Treasury will grant extensions of not more than 30 days for States and territories that submit a certification in writing in accordance with section 603(b)(2)(C)(ii)(I). Additional extensions may be granted at the discretion of the Secretary.

Question 37: What are alternative ways for States and territories to enforce the 75 percent cap while reducing the administrative burden on them?

Question 38: What criteria should Treasury consider in assessing requests for extensions for further time to distribute NEU payments?

VIII. Reporting

States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments will be required to submit one interim report and thereafter

quarterly Project and Expenditure reports through the end of the award period on December 31, 2026. The interim report will include a recipient's expenditures by category at the summary level from the date of award to July 31, 2021 and, for States and territories, information related to distributions to nonentitlement units. Recipients must submit their interim report to Treasury by August 31, 2021. Nonentitlement units of local government are not required to submit an interim report.

The quarterly Project and Expenditure reports will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient's utilization of the award funds. The reports will include the same general data (e.g., on obligations, expenditures, contracts, grants, and sub-awards) as those submitted by recipients of the CRF, with some modifications. Modifications will include updates to the expenditure categories and the addition of data elements related to specific eligible uses, including some of the reporting elements described in sections above. The initial quarterly Project and Expenditure report will cover two calendar quarters from the date of award to September 30, 2021, and must be submitted to Treasury by October 31, 2021. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury within 30 days after the end of each calendar quarter.

Nonentitlement units of local government will be required to submit annual Project and Expenditure reports until the end of the award period on December 31, 2026. The initial annual Project and Expenditure report for nonentitlement units of local government will cover activity from the date of award to September 30, 2021 and must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

States, territories, metropolitan cities, and counties with a population that exceeds 250,000 residents will also be required to submit an annual Recovery Plan Performance report to Treasury. The Recovery Plan Performance report will provide the public and Treasury information on the projects that recipients are undertaking with program funding and how they are planning to ensure project outcomes are achieved in an effective, efficient, and equitable manner. Each jurisdiction will have some flexibility in terms of the form and content of the Recovery Plan Performance report, as long as it includes the minimum information required by Treasury. The Recovery Plan Performance report will include key performance indicators identified by the recipient and some mandatory indicators identified by Treasury, as well as programmatic data in specific eligible use categories and the specific reporting requirements described in the sections above. The initial Recovery Plan Performance report will cover the period from the date of award to July 31, 2021 and must be submitted to Treasury by August 31, 2021. Thereafter, Recovery Plan Performance reports will cover a 12-month period, and recipients will be required to submit the report to Treasury within 30 days after the end of the 12-month period. The second Recovery Plan Performance report will cover the period from July 1, 2021 to June 30, 2022, and must be submitted to Treasury by July 31, 2022. Each annual Recovery Plan Performance report must be posted on the public-facing website of the recipient. Local governments with fewer than 250,000 residents, Tribal governments, and nonentitlement units of local government are not required to develop a Recovery Plan Performance report.

Treasury will provide additional guidance and instructions on the reporting requirements outlined above for the Fiscal Recovery Funds at a later date.

IX. Comments and Effective Date

This Interim Final Rule is being issued without advance notice and public comment to allow for immediate implementation of this program. As discussed below, the requirements of advance notice and public comment do not apply “to the extent that there is involved . . . a matter relating to agency . . . grants.”¹⁸¹ The Interim Final Rule implements statutory conditions on the eligible uses of the Fiscal Recovery Funds grants, and addresses the payment of those funds, the reporting on uses of funds, and potential consequences of ineligible uses. In addition and as discussed below, the Administrative Procedure Act also provides an exception to ordinary notice-and-comment procedures “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.”¹⁸² This good cause justification also supports waiver of the 60-day delayed effective date for major rules under the Congressional Review Act at 5 U.S.C. 808(2). Although this Interim Final Rule is effective immediately, comments are solicited from interested members of the public and from recipient governments on all aspects of the Interim Final Rule.

These comments must be submitted on or before [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

¹⁸¹ 5 U.S.C. 553(a)(2).

¹⁸² 5 U.S.C. 553(b)(3)(B); *see also* 5 U.S.C. 553(d)(3) (creating an exception to the requirement of a 30-day delay before the effective date of a rule “for good cause found and published with the rule”).

X. Regulatory Analyses

Executive Orders 12866 and 13563

This Interim Final Rule is economically significant for the purposes of Executive Orders 12866 and 13563. Treasury, however, is proceeding under the emergency provision at Executive Order 12866 section 6(a)(3)(D) based on the need to act expeditiously to mitigate the current economic conditions arising from the COVID-19 public health emergency. The rule has been reviewed by the Office of Management and Budget (OMB) in accordance with Executive Order 12866. This rule is necessary to implement the ARPA in order to provide economic relief to State, local, and Tribal governments adversely impacted by the COVID-19 public health emergency.

Under Executive Order 12866, OMB must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive Order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a significant regulatory action as an action likely to result in a rule that may:

- (1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or Tribal governments or communities in a material way (also referred to as “economically significant” regulations);
- (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
- (3) Materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

- (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive Order.

This regulatory action is an economically significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866. Treasury has also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, section 1(b) of Executive Order 13563 requires that an agency:

- (1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);
- (2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives taking into account, among other things, and to the extent practicable, the costs of cumulative regulations;
- (3) Select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);
- (4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and
- (5) Identify and assess available alternatives to direct regulation, including providing economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or providing information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” OMB's Office of Information and Regulatory Affairs (OIRA) has emphasized that these techniques may

include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

Treasury has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action, and is issuing this Interim Final Rule only on a reasoned determination that the benefits exceed the costs. In choosing among alternative regulatory approaches, Treasury selected those approaches that would maximize net benefits. Based on the analysis that follows and the reasons stated elsewhere in this document, Treasury believes that this Interim Final Rule is consistent with the principles set forth in Executive Order 13563.

Treasury also has determined that this regulatory action does not unduly interfere with States, territories, Tribal governments, and localities in the exercise of their governmental functions.

This Regulatory Impact Analysis discusses the need for regulatory action, the potential benefits, and the potential costs.

Need for Regulatory Action. This Interim Final Rule implements the \$350 billion Fiscal Recovery Funds of the ARPA, which Congress passed to help States, territories, Tribal governments, and localities respond to the ongoing COVID-19 public health emergency and its economic impacts. As the agency charged with execution of these programs, Treasury has concluded that this Interim Final Rule is needed to ensure that recipients of Fiscal Recovery Funds fully understand the requirements and parameters of the program as set forth in the statute and deploy funds in a manner that best reflects Congress’ mandate for targeted fiscal relief. This Interim Final Rule is primarily a transfer rule: it transfers \$350 billion in aid from the Federal government to states, territories, Tribal governments, and localities, generating a significant macroeconomic effect on the U.S. economy. In making this transfer, Treasury has sought to implement the program in ways that maximize its potential benefits while minimizing

its costs. It has done so by aiming to target relief in key areas according to the congressional mandate; offering clarity to States, territories, Tribal governments, and localities while maintaining their flexibility to respond to local needs; and limiting administrative burdens.

Analysis of Benefits. Relative to a pre-statutory baseline, the Fiscal Recovery Funds provide a combined \$350 billion to State, local, and Tribal governments for fiscal relief and support for costs incurred responding to the COVID-19 pandemic. Treasury believes that this transfer will generate substantial additional economic activity, although given the flexibility accorded to recipients in the use of funds, it is not possible to precisely estimate the extent to which this will occur and the timing with which it will occur. Economic research has demonstrated that state fiscal relief is an efficient and effective way to mitigate declines in jobs and output during an economic downturn.¹⁸³ Absent such fiscal relief, fiscal austerity among State, local, and Tribal governments could exert a prolonged drag on the overall economic recovery, as occurred following the 2007-09 recession.¹⁸⁴

This Interim Final Rule provides benefits across several areas by implementing the four eligible funding uses, as defined in statute: strengthening the response to the COVID-19 public health emergency and its economic impacts; easing fiscal pressure on State, local, and Tribal governments that might otherwise lead to harmful cutbacks in employment or government

¹⁸³ Gabriel Chodorow-Reich et al., Does State Fiscal Relief during Recessions Increase Employment? Evidence from the American Recovery and Reinvestment Act, *American Econ. J.: Econ. Policy*, 4:3 118-45 (Aug. 2012), *available at* <https://www.aeaweb.org/articles?id=10.1257/pol.4.3.118>

¹⁸⁴ *See, e.g.*, Fitzpatrick, Haughwout & Setren, Fiscal Drag from the State and Local Sector?, Liberty Street Economics Blog, Federal Reserve Bank of New York (June 27, 2012), <https://www.libertystreeteconomics.newyorkfed.org/2012/06/fiscal-drag-from-the-state-and-local-sector.html>; Jiri Jonas, Great Recession and Fiscal Squeeze at U.S. Subnational Government Level, IMF Working Paper 12/184, (July 2012), *available at* <https://www.imf.org/external/pubs/ft/wp/2012/wp12184.pdf>; Gordon, *supra* note 9.

services; providing premium pay to essential workers; and making necessary investments in certain types of infrastructure. In implementing the ARPA, Treasury also sought to support disadvantaged communities that have been disproportionately impacted by the pandemic. The Fiscal Recovery Funds as implemented by the Interim Final Rule can be expected to channel resources toward these uses in order to achieve substantial near-term economic and public health benefits, as well as longer-term benefits arising from the allowable investments in water, sewer, and broadband infrastructure and aid to families.

These benefits are achieved in the Interim Final Rule through a broadly flexible approach that sets clear guidelines on eligible uses of Fiscal Recovery Funds and provides State, local, and Tribal government officials discretion within those eligible uses to direct Fiscal Recovery Funds to areas of greatest need within their jurisdiction. While preserving recipients' overall flexibility, the Interim Final Rule includes several provisions that implement statutory requirements and will help support use of Fiscal Recovery Funds to achieve the intended benefits. The remainder of this section clarifies how Treasury's approach to key provisions in the Interim Final Rule will contribute to greater realization of benefits from the program.

- Revenue Loss: Recipients will compute the extent of reduction in revenue by comparing actual revenue to a counterfactual trend representing what could have plausibly been expected to occur in the absence of the pandemic. The counterfactual trend begins with the last full fiscal year prior to the public health emergency (as required by statute) and projects forward with an annualized growth adjustment. Treasury's decision to incorporate a growth adjustment into the calculation of revenue loss ensures that the formula more fully captures revenue shortfalls relative to recipients' pre-pandemic expectations. Moreover, recipients will have the opportunity to re-calculate revenue loss

at several points throughout the program, recognizing that some recipients may experience revenue effects with a lag. This option to re-calculate revenue loss on an ongoing basis should result in more support for recipients to avoid harmful cutbacks in future years. In calculating revenue loss, recipients will look at general revenue in the aggregate, rather than on a source-by-source basis. Given that recipients may have experienced offsetting changes in revenues across sources, Treasury's approach provides a more accurate representation of the effect of the pandemic on overall revenues.

- Premium Pay: Per the statute, recipients have broad latitude to designate critical infrastructure sectors and make grants to third-party employers for the purpose of providing premium pay or otherwise respond to essential workers. While the Interim Final Rule generally preserves the flexibility in the statute, it does add a requirement that recipients give written justification in the case that premium pay would increase a worker's annual pay above a certain threshold. To set this threshold, Treasury analyzed data from the Bureau of Labor Statistics to determine a level that would not require further justification for premium pay to the vast majority of essential workers, while requiring higher scrutiny for provision of premium pay to higher-earners who, even without premium pay, would likely have greater personal financial resources to cope with the effects of the pandemic. Treasury believes the threshold in the Interim Final Rule strikes the appropriate balance between preserving flexibility and helping encourage use of these resources to help those in greatest need. The Interim Final Rule also requires that eligible workers have regular in-person interactions or regular physical handling of items that were also handled by others. This requirement will also help encourage use of

financial resources for those who have endured the heightened risk of performing essential work.

- Withholding of Payments to Recipients: Treasury believes that for the vast majority of recipient entities, it will be appropriate to receive funds in two separate payments. As discussed above, withholding of payments ensures that recipients can adapt spending plans to evolving economic conditions and that at least some of the economic benefits will be realized in 2022 or later. However, consistent with authorities granted to Treasury in the statute, Treasury recognizes that a subset of States with significant remaining elevation in the unemployment rate could face heightened additional near-term needs to aid unemployed workers and stimulate the recovery. Therefore, for a subset of State governments, Treasury will not withhold any funds from the first payment. Treasury believes that this approach strikes the appropriate balance between the general reasons to provide funds in two payments and the heightened additional near-term needs in specific States. As discussed above, Treasury set a threshold based on historical analysis of unemployment rates in recessions.
- Hiring Public Sector Employees: The Interim Final Rule states explicitly that recipients may use funds to restore their workforces up to pre-pandemic levels. Treasury believes that this statement is beneficial because it eliminates any uncertainty that could cause delays or otherwise negatively impact restoring public sector workforces (which, at time of publication, remain significantly below pre-pandemic levels).

Finally, the Interim Final Rule aims to promote and streamline the provision of assistance to individuals and communities in greatest need, particularly communities that have been historically disadvantaged and have experienced disproportionate impacts of the COVID-19

crisis. Targeting relief is in line with Executive Order 13985 On Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, which laid out an Administration-wide priority to support “equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality.”¹⁸⁵ To this end, the Interim Final Rule enumerates a list of services that may be provided using Fiscal Recovery Funds in low-income areas to address the disproportionate impacts of the pandemic in these communities; establishes the characteristics of essential workers eligible for premium pay and encouragement to serve workers based on financial need; provides that recipients may use Fiscal Recovery Funds to restore (to pre-pandemic levels) state and local workforces, where women and people of color are disproportionately represented;¹⁸⁶ and targets investments in broadband infrastructure to unserved and underserved areas. Collectively, these provisions will promote use of resources to facilitate the provision of assistance to individuals and communities with the greatest need.

Analysis of Costs. This regulatory action will generate administrative costs relative to a pre-statutory baseline. This includes, chiefly, costs required to administer Fiscal Recovery Funds, oversee subrecipients and beneficiaries, and file periodic reports with Treasury. It also requires States to allocate Fiscal Recovery Funds to nonentitlement units, which are smaller units of local government that are statutorily required to receive their funds through States.

¹⁸⁵ Executive Order on Advancing Racial Equity and Support for Underserved Communities through the Federal Government (Jan. 20, 2021), <https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/executive-order-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/> (last visited May 9, 2021).

¹⁸⁶ David Cooper, Mary Gable & Algernon Austin, Economic Policy Institute Briefing Paper, The Public-Sector Jobs Crisis: Women and African Americans hit hardest by job losses in state and local governments, <https://www.epi.org/publication/bp339-public-sector-jobs-crisis> (last visited May 9, 2021).

Treasury expects that the administrative burden associated with this program will be moderate for a grant program of its size. Treasury expects that most recipients receive direct or indirect funding from Federal government programs and that many have familiarity with how to administer and report on Federal funds or grant funding provided by other entities. In particular, States, territories, and large localities will have received funds from the CRF and Treasury expects them to rely heavily on established processes developed last year or through prior grant funding, mitigating burden on these governments.

Treasury expects to provide technical assistance to defray the costs of administration of Fiscal Recovery Funds to further mitigate burden. In making implementation choices, Treasury has hosted numerous consultations with a diverse range of direct recipients—States, small cities, counties, and Tribal governments —along with various communities across the United States, including those that are underserved. Treasury lacks data to estimate the precise extent to which this Interim Final Rule generates administrative burden for State, local, and Tribal governments, but seeks comment to better estimate and account for these costs, as well as on ways to lessen administrative burdens.

Executive Order 13132

Executive Order 13132 (entitled Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State, local, and Tribal governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This Interim Final Rule does not have federalism implications within the meaning of the Executive Order and does not impose substantial, direct compliance costs on State, local, and Tribal governments or preempt state law within the meaning of the Executive Order. The

compliance costs are imposed on State, local, and Tribal governments by sections 602 and 603 of the Social Security Act, as enacted by the ARPA. Notwithstanding the above, Treasury has engaged in efforts to consult and work cooperatively with affected State, local, and Tribal government officials and associations in the process of developing the Interim Final Rule. Pursuant to the requirements set forth in section 8(a) of Executive Order 13132, Treasury certifies that it has complied with the requirements of Executive Order 13132.

Administrative Procedure Act

The Administrative Procedure Act (APA), 5 U.S.C. 551 et seq., generally requires public notice and an opportunity for comment before a rule becomes effective. However, the APA provides that the requirements of 5 U.S.C. 553 do not apply “to the extent that there is involved . . . a matter relating to agency . . . grants.” The Interim Final Rule implements statutory conditions on the eligible uses of the Fiscal Recovery Funds grants, and addresses the payment of those funds, the reporting on uses of funds, and potential consequences of ineligible uses. The rule is thus “both clearly and directly related to a federal grant program.” *National Wildlife Federation v. Snow*, 561 F.2d 227, 232 (D.C. Cir. 1976). The rule sets forth the “process necessary to maintain state . . . eligibility for federal funds,” *id.*, as well as the “method[s] by which states can . . . qualify for federal aid,” and other “integral part[s] of the grant program,” *Center for Auto Safety v. Tiemann*, 414 F. Supp. 215, 222 (D.D.C. 1976). As a result, the requirements of 5 U.S.C. 553 do not apply.

The APA also provides an exception to ordinary notice-and-comment procedures “when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.” 5 U.S.C. 553(b)(3)(B); *see also* 5 U.S.C.

553(d)(3) (creating an exception to the requirement of a 30-day delay before the effective date of a rule “for good cause found and published with the rule”). Assuming 5 U.S.C. 553 applied, Treasury would still have good cause under sections 553(b)(3)(B) and 553(d)(3) for not undertaking section 553’s requirements. The ARPA is a law responding to a historic economic and public health emergency; it is “extraordinary” legislation about which “both Congress and the President articulated a profound sense of ‘urgency.’” *Petry v. Block*, 737 F.2d 1193, 1200 (D.C. Cir. 1984). Indeed, several provisions implemented by this Interim Final Rule (sections 602(c)(1)(A) and 603(c)(1)(A)) explicitly provide funds to “respond to the public health emergency,” and the urgency is further exemplified by Congress’s command (in sections 602(b)(6)(B) and 603(b)(7)(A)) that, “[t]o the extent practicable,” funds must be provided to Tribes and cities “not later than 60 days after the date of enactment.” See *Philadelphia Citizens in Action v. Schweiker*, 669 F.2d 877, 884 (3d Cir. 1982) (finding good cause under circumstances, including statutory time limits, where APA procedures would have been “virtually impossible”). Finally, there is an urgent need for States to undertake the planning necessary for sound fiscal policymaking, which requires an understanding of how funds provided under the ARPA will augment and interact with existing budgetary resources and tax policies. Treasury understands that many states require immediate rules on which they can rely, especially in light of the fact that the ARPA “covered period” began on March 3, 2021. The statutory urgency and practical necessity are good cause to forego the ordinary requirements of notice-and-comment rulemaking.

Congressional Review Act

The Administrator of OIRA has determined that this is a major rule for purposes of Subtitle E of the Small Business Regulatory Enforcement and Fairness Act of 1996 (also known as the

Congressional Review Act or CRA) (5 U.S.C. 804(2) et seq.). Under the CRA, a major rule takes effect 60 days after the rule is published in the Federal Register. 5 U.S.C. 801(a)(3). Notwithstanding this requirement, the CRA allows agencies to dispense with the requirements of section 801 when the agency for good cause finds that such procedure would be impracticable, unnecessary, or contrary to the public interest and the rule shall take effect at such time as the agency promulgating the rule determines. 5 U.S.C. 808(2). Pursuant to section 808(2), for the reasons discussed above, Treasury for good cause finds that a 60-day delay to provide public notice is impracticable and contrary to the public interest.

Paperwork Reduction Act

The information collections associated with State, territory, local, and Tribal government applications materials necessary to receive Fiscal Recovery Funds (e.g., payment information collection and acceptance of award terms) have been reviewed and approved by OMB pursuant to the Paperwork Reduction Act (44 U.S.C. Chapter 35) (PRA) emergency processing procedures and assigned control number 1505-0271. The information collections related to ongoing reporting requirements, as discussed in this Interim Final Rule, will be submitted to OMB for emergency processing in the near future. Under the PRA, an agency may not conduct or sponsor and a respondent is not required to respond to, an information collection unless it displays a valid OMB control number.

Estimates of hourly burden under this program are set forth in the table below. Burden estimates below are preliminary.

Reporting	# Respondents (Estimated)	# Responses Per Respondent	Total Responses	Hours per response	Total Burden in Hours	Cost to Respondent (\$48.80 per hour*)
Recipient Payment Form	5,050	1	5,050	.25 (15 minutes)	1,262.5	\$61,610
Acceptance of Award Terms	5,050	1	5,050	.25 (15 minutes)	1,262.5	\$61,610
Title VI Assurances	5,050	1	5,050	.50 (30 minutes)	2,525	\$123,220
Quarterly Project and Expenditure Report	5,050	4 per year after first year	20,200	25	505,000	\$24,644,000
Annual Project and Expenditure Report from NEUs	TBD	1 per year	20,000-40,000 (Estimate only)	15	300,000 – 600,000	\$14,640,000 - \$29,280,000
Annual Recovery Plan Performance report	418	1 per year	418	100	41,800	\$2,039,840
Total	5,050 – TBD	N/A	55,768 - 75,768	141	851,850 - 1,151,850	\$41,570,280 - \$56,210,280

* Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Accountants and Auditors, on the Internet at <https://www.bls.gov/ooh/business-and-financial/accountants-and-auditors.htm> (visited March 28, 2020). Base wage of \$33.89/hour increased by 44 percent to account for fully loaded employer cost of employee compensation (benefits, etc.) for a fully loaded wage rate of \$48.80.

Periodic reporting is required by section 602(c) of Section VI of the Social Security Act and under the Interim Final Rule.

As discussed in Section VIII of this Supplementary Information, recipients of Fiscal Recovery Funds will be required to submit one interim report and thereafter quarterly Project and Expenditure reports until the end of the award period. Recipients must submit interim reports to Treasury by August 31, 2021. The quarterly Project and Expenditure reports will include financial data, information on contracts and subawards over \$50,000, types of projects funded, and other information regarding a recipient's utilization of the award funds.

Nonentitlement unit recipients will be required to submit annual Project and Expenditure reports until the end of the award period. The initial annual Project and Expenditure report for Nonentitlement unit recipients must be submitted to Treasury by October 31, 2021. The subsequent annual reports must be submitted to Treasury by October 31 each year.

States, territories, metropolitan cities, and counties with a population that exceeds 250,000 residents will also be required to submit an annual Recovery Plan Performance report to Treasury. The Recovery Plan Performance report will include descriptions of the projects funded and information on the performance indicators and objectives of the award. Each annual Recovery Plan Performance report must be posted on the public-facing website of the recipient. Treasury will provide additional guidance and instructions on all the reporting requirements outlined above for the Fiscal Recovery Funds program at a later date.

These and related periodic reporting requirements are under consideration and will be submitted to OMB for approval under the PRA emergency provisions in the near future.

Treasury invites comments on all aspects of the reporting and recordkeeping requirements including: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the estimate of the burden of the collection of information; (c) ways to enhance the

quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Comments should be sent by the comment deadline to the www.regulations.gov docket with a copy to the Office of Information and Regulatory Affairs, U.S. Office of Management and Budget, 725 17th Street NW, Washington, DC 20503; or email to oira_submission@omb.eop.gov.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) generally requires that when an agency issues a proposed rule, or a final rule pursuant to section 553(b) of the Administrative Procedure Act or another law, the agency must prepare a regulatory flexibility analysis that meets the requirements of the RFA and publish such analysis in the Federal Register. 5 U.S.C. 603, 604.

Rules that are exempt from notice and comment under the APA are also exempt from the RFA requirements, including the requirement to conduct a regulatory flexibility analysis, when among other things the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. Since this rule is exempt from the notice and comment requirements of the APA, Treasury is not required to conduct a regulatory flexibility analysis.

RULE TEXT

List of Subjects in 31 CFR Part 35

Executive compensation, State and Local Governments, Tribal Governments, Public health emergency.

Title 31—Money and Finance: Treasury

Part 35 - PANDEMIC RELIEF PROGRAMS

1. The authority citation for Part 35 is revised to read as follows:

Authority: 42 U.S.C. 802(f); 42 U.S.C. 803(f); 31 U.S.C. 321; Consolidated Appropriations Act, 2021 (Pub. L. 116-260), Division N, Title V, Subtitle B; Community Development Banking and Financial Institutions Act of 1994 (enacted as part of the Riegle Community and Regulatory Improvement Act of 1994 (Pub. L. 103-325)), as amended (12 U.S.C. 4701 et seq.), Section 104A; Pub. L. 117-2.

2. Revise the part heading as shown above.

3. Add Subpart A to read as follows:

Subpart A— CORONAVIRUS STATE AND LOCAL FISCAL RECOVERY FUNDS

Sec.

35.1 Purpose.

35.2 Applicability.

35.3 Definitions.

35.4 Reservation of Authority, Reporting.

35.5 Use of Funds.

35.6 Eligible Uses.

35.7 Pensions.

35.8 Tax.

35.9. Compliance with Applicable Laws.

35.10. Recoupment.

35.11 Payments to States.

35.12. Distributions to Nonentitlement Units of Local Government and Units of General Local Government.

Authority: 42 U.S.C. 802(f); 42 U.S.C. 803(f)

§ 35.1 Purpose.

This part implements section 9901 of the American Rescue Plan Act (Subtitle M of Title IX of Public Law 117-2), which amends Title VI of the Social Security Act (42 U.S.C. 801 et seq.) by adding sections 602 and 603 to establish the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund.

§ 35.2 Applicability.

This part applies to States, territories, Tribal governments, metropolitan cities, nonentitlement units of local government, counties, and units of general local government that accept a payment or transfer of funds made under section 602 or 603 of the Social Security Act.

§ 35.3 Definitions.

Baseline means tax revenue of the recipient for its fiscal year ending in 2019, adjusted for inflation in each reporting year using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States.

County means a county, parish, or other equivalent county division (as defined by the Census Bureau).

Covered benefits include, but are not limited to, the costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (Federal and State), workers' compensation insurance, and Federal Insurance Contributions Act taxes (which includes Social Security and Medicare taxes).

Covered change means a change in law, regulation, or administrative interpretation. A change in law includes any final legislative or regulatory action, a new or changed administrative

interpretation, and the phase-in or taking effect of any statute or rule if the phase-in or taking effect was not prescribed prior to the start of the covered period.

Covered period means, with respect to a State, Territory, or Tribal government, the period that:

(1) Begins on March 3, 2021; and

(2) Ends on the last day of the fiscal year of such State, Territory, or Tribal government in which all funds received by the State, Territory, or Tribal government from a payment made under section 602 or 603 of the Social Security Act have been expended or returned to, or recovered by, the Secretary.

COVID-19 means the Coronavirus Disease 2019.

COVID-19 public health emergency means the period beginning on January 27, 2020 and until the termination of the national emergency concerning the COVID-19 outbreak declared pursuant to the National Emergencies Act (50 U.S.C. 1601 et. seq.).

Deposit means an extraordinary payment of an accrued, unfunded liability. The term deposit does not refer to routine contributions made by an employer to pension funds as part of the employer's obligations related to payroll, such as either a pension contribution consisting of a normal cost component related to current employees or a component addressing the amortization of unfunded liabilities calculated by reference to the employer's payroll costs.

Eligible employer means an employer of an eligible worker who performs essential work.

Eligible workers means workers needed to maintain continuity of operations of essential critical infrastructure sectors, including health care; emergency response; sanitation, disinfection, and cleaning work; maintenance work; grocery stores, restaurants, food production, and food delivery; pharmacy; biomedical research; behavioral health work; medical testing and

diagnostics; home- and community-based health care or assistance with activities of daily living; family or child care; social services work; public health work; vital services to Tribes; any work performed by an employee of a State, local, or Tribal government; educational work, school nutrition work, and other work required to operate a school facility; laundry work; elections work; solid waste or hazardous materials management, response, and cleanup work; work requiring physical interaction with patients; dental care work; transportation and warehousing; work at hotel and commercial lodging facilities that are used for COVID-19 mitigation and containment; work in a mortuary; work in critical clinical research, development, and testing necessary for COVID-19 response.

(1) With respect to a recipient that is a metropolitan city, nonentitlement unit of local government, or county, workers in any additional sectors as each chief executive officer of such recipient may designate as critical to protect the health and well-being of the residents of their metropolitan city, nonentitlement unit of local government, or county; or

(2) With respect to a State, Territory, or Tribal government, workers in any additional sectors as each Governor of a State or Territory, or each Tribal government, may designate as critical to protect the health and well-being of the residents of their State, Territory, or Tribal government.

Essential work means work that:

(1) Is not performed while teleworking from a residence; and

(2) Involves:

(i) Regular in-person interactions with patients, the public, or coworkers of the individual that is performing the work; or

(ii) Regular physical handling of items that were handled by, or are to be handled by patients, the public, or coworkers of the individual that is performing the work.

Funds means, with respect to a recipient, amounts provided to the recipient pursuant to a payment made under section 602(b) or 603(b) of the Social Security Act or transferred to the recipient pursuant to section 603(c)(4) of the Social Security Act.

General revenue means money that is received from tax revenue, current charges, and miscellaneous general revenue, excluding refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and intergovernmental transfers from the Federal government, including transfers made pursuant to section 9901 of the American Rescue Plan Act. General revenue does not include revenues from utilities. Revenue from Tribal business enterprises must be included in general revenue.

Intergovernmental transfers means money received from other governments, including grants and shared taxes.

Metropolitan city has the meaning given that term in section 102(a)(4) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(4)) and includes cities that relinquish or defer their status as a metropolitan city for purposes of receiving allocations under section 106 of such Act (42 U.S.C. 5306) for fiscal year 2021.

Net reduction in total spending is measured as the State or Territory's total spending for a given reporting year excluding its spending of funds, subtracted from its total spending for its fiscal year ending in 2019, adjusted for inflation using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States.

Nonentitlement unit of local government means a “city,” as that term is defined in section 102(a)(5) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(5)), that is not a metropolitan city.

Nonprofit means a nonprofit organization that is exempt from Federal income taxation and that is described in section 501(c)(3) of the Internal Revenue Code.

Obligation means an order placed for property and services and entering into contracts, subawards, and similar transactions that require payment.

Pension fund means a defined benefit plan and does not include a defined contribution plan.

Premium pay means an amount of up to \$13 per hour that is paid to an eligible worker, in addition to wages or remuneration the eligible worker otherwise receives, for all work performed by the eligible worker during the COVID-19 public health emergency. Such amount may not exceed \$25,000 with respect to any single eligible worker. Premium pay will be considered to be in addition to wages or remuneration the eligible worker otherwise receives if, as measured on an hourly rate, the premium pay is:

(1) With regard to work that the eligible worker previously performed, pay and remuneration equal to the sum of all wages and remuneration previously received plus up to \$13 per hour with no reduction, substitution, offset, or other diminishment of the eligible worker’s previous, current, or prospective wages or remuneration; or

(2) With regard to work that the eligible worker continues to perform, pay of up to \$13 that is in addition to the eligible worker’s regular rate of wages or remuneration, with no reduction, substitution, offset, or other diminishment of the workers’ current and prospective wages or remuneration.

Qualified census tract has the same meaning given in 26 U.S.C. 42(d)(5)(B)(ii)(I).

Recipient means a State, Territory, Tribal government, metropolitan city, nonentitlement unit of local government, county, or unit of general local government that receives a payment made under section 602(b) or 603(b) of the Social Security Act or transfer pursuant to section 603(c)(4) of the Social Security Act.

Reporting year means a single year or partial year within the covered period, aligned to the current fiscal year of the State or Territory during the covered period.

Secretary means the Secretary of the Treasury.

State means each of the 50 States and the District of Columbia

Small business means a business concern or other organization that:

(1) Has no more than 500 employees, or if applicable, the size standard in number of employees established by the Administrator of the Small Business Administration for the industry in which the business concern or organization operates, and

(2) Is a small business concern as defined in section 3 of the Small Business Act (15 U.S.C. 632).

Tax Revenue means revenue received from a compulsory contribution that is exacted by a government for public purposes excluding refunds and corrections and, for purposes of § 35.8, intergovernmental transfers. Tax revenue does not include payments for a special privilege granted or service rendered, employee or employer assessments and contributions to finance retirement and social insurance trust systems, or special assessments to pay for capital improvements.

Territory means the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, or American Samoa.

Tribal enterprise means a business concern:

(1) That is wholly owned by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments; or

(2) That is owned in part by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments, if all other owners are either United States citizens or small business concerns, as these terms are used and consistent with the definitions in 15 U.S.C. 657a(b)(2)(D).

Tribal government means the recognized governing body of any Indian or Alaska Native tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list published on January 29, 2021, pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5131).

Unemployment rate means the U-3 unemployment rate provided by the Bureau of Labor Statistics as part of the Local Area Unemployment Statistics program, measured as total unemployment as a percentage of the civilian labor force.

Unemployment trust fund means an unemployment trust fund established under section 904 of the Social Security Act (42 U.S.C. 1104).

Unit of general local government has the meaning given to that term in section 102(a)(1) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(1)).

Unserved and underserved households or businesses means one or more households or businesses that are not currently served by a wireline connection that reliably delivers at least 25 Mbps download speed and 3 Mbps of upload speed.

§ 35.4 Reservation of Authority, Reporting.

(a) *Reservation of authority.* Nothing in this part shall limit the authority of the Secretary to take action to enforce conditions or violations of law, including actions necessary to prevent evasions of this subpart.

(b) *Extensions or accelerations of timing.* The Secretary may extend or accelerate any deadline or compliance date of this part, including reporting requirements that implement this subpart, if the Secretary determines that such extension or acceleration is appropriate. In determining whether an extension or acceleration is appropriate, the Secretary will consider the period of time that would be extended or accelerated and how the modified timeline would facilitate compliance with this subpart.

(c) *Reporting and requests for other information.* During the covered period, recipients shall provide to the Secretary periodic reports providing detailed accounting of the uses of funds, all modifications to a State or Territory's tax revenue sources, and such other information as the Secretary may require for the administration of this section. In addition to regular reporting requirements, the Secretary may request other additional information as may be necessary or appropriate, including as may be necessary to prevent evasions of the requirements of this subpart. False statements or claims made to the Secretary may result in criminal, civil, or administrative sanctions, including fines, imprisonment, civil damages and penalties, debarment from participating in Federal awards or contracts, and/or any other remedy available by law.

§ 35.5 Use of funds.

(a) *In General.* A recipient may only use funds to cover costs incurred during the period beginning March 3, 2021, and ending December 31, 2024, for one or more of the purposes enumerated in sections 602(c)(1) and 603(c)(1) of the Social Security Act, as applicable,

including those enumerated in section § 35.6 of this subpart, subject to the restrictions set forth in sections 602(c)(2) and 603(c)(2) of the Social Security Act, as applicable.

(b) *Costs incurred.* A cost shall be considered to have been incurred for purposes of paragraph (a) of this section if the recipient has incurred an obligation with respect to such cost by December 31, 2024.

(c) *Return of funds.* A recipient must return any funds not obligated by December 31, 2024, and any funds not expended to cover such obligations by December 31, 2026.

§ 35.6 Eligible uses.

(a) *In General.* Subject to §§ 35.7 and 35.8 of this subpart, a recipient may use funds for one or more of the purposes described in paragraphs (b)-(e) of this section

(b) *Responding to the public health emergency or its negative economic impacts.* A recipient may use funds to respond to the public health emergency or its negative economic impacts, including for one or more of the following purposes:

(1) *COVID-19 response and prevention.* Expenditures for the mitigation and prevention of COVID-19, including:

(i) Expenses related to COVID-19 vaccination programs and sites, including staffing, acquisition of equipment or supplies, facilities costs, and information technology or other administrative expenses;

(ii) COVID-19-related expenses of public hospitals, clinics, and similar facilities;

(iii) COVID-19 related expenses in congregate living facilities, including skilled nursing facilities, long-term care facilities, incarceration settings, homeless shelters, residential foster care facilities, residential behavioral health treatment, and other group living facilities;

(iv) Expenses of establishing temporary public medical facilities and other measures to increase COVID-19 treatment capacity, including related construction costs and other capital investments in public facilities to meet COVID-19-related operational needs;

(v) Expenses of establishing temporary public medical facilities and other measures to increase COVID-19 treatment capacity, including related construction costs and other capital investments in public facilities to meet COVID-19-related operational needs;

(vi) Costs of providing COVID-19 testing and monitoring, contact tracing, and monitoring of case trends and genomic sequencing for variants;

(vii) Emergency medical response expenses, including emergency medical transportation, related to COVID-19;

(viii) Expenses for establishing and operating public telemedicine capabilities for COVID-19-related treatment;

(ix) Expenses for communication related to COVID-19 vaccination programs and communication or enforcement by recipients of public health orders related to COVID-19;

(x) Expenses for acquisition and distribution of medical and protective supplies, including sanitizing products and personal protective equipment;

(xi) Expenses for disinfection of public areas and other facilities in response to the COVID-19 public health emergency;

(xii) Expenses for technical assistance to local authorities or other entities on mitigation of COVID-19-related threats to public health and safety;

(xiii) Expenses for quarantining or isolation of individuals;

(xiv) Expenses of providing paid sick and paid family and medical leave to public employees to enable compliance with COVID-19 public health precautions;

(xv) Expenses for treatment of the long-term symptoms or effects of COVID-19, including post-intensive care syndrome;

(xvi) Expenses for the improvement of ventilation systems in congregate settings, public health facilities, or other public facilities;

(xvii) Expenses related to establishing or enhancing public health data systems; and

(xviii) Mental health treatment, substance misuse treatment, and other behavioral health services.

(2) *Public Health and Safety Staff.* Payroll and covered benefit expenses for public safety, public health, health care, human services, and similar employees to the extent that the employee's time is spent mitigating or responding to the COVID-19 public health emergency.

(3) *Hiring State and Local Government Staff.* Payroll, covered benefit, and other costs associated with the recipient increasing the number of its employees up to the number of employees that it employed on January 27, 2020.

(4) *Assistance to Unemployed Workers.* Assistance, including job training, for individuals who want and are available for work, including those who have looked for work sometime in the past 12 months or who are employed part time but who want and are available for full-time work;

(5) *Contributions to State Unemployment Insurance Trust Funds.* Contributions to an Unemployment Trust Fund up to the level required to restore the Unemployment Trust Fund to its balance on January 27, 2020 or to pay back advances received under Title XII of the Social Security Act (42 U.S.C. 1321) for the payment of benefits between January 27, 2020 and [INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER];

(6) *Small Businesses*. Assistance to small businesses, including loans, grants, in-kind assistance, technical assistance or other services, that responds to the negative economic impacts of the COVID-19 public health emergency;

(7) *Nonprofits*. Assistance to nonprofit organizations, including loans, grants, in-kind assistance, technical assistance or other services, that responds to the negative economic impacts of the COVID-19 public health emergency;

(8) *Assistance to Households*. Assistance programs, including cash assistance programs, that respond to the COVID-19 public health emergency;

(9) *Aid to Impacted Industries*. Aid to tourism, travel, hospitality, and other impacted industries that responds to the negative economic impacts of the COVID-19 public health emergency;

(10) *Expenses to Improve Efficacy of Public Health or Economic Relief Programs*. Administrative costs associated with the recipient's COVID-19 public health emergency assistance programs, including services responding to the COVID-19 public health emergency or its negative economic impacts, that are not federally funded.

(11) *Survivor's Benefits*. Benefits for the surviving family members of individuals who have died from COVID-19, including cash assistance to widows, widowers, or dependents of individuals who died of COVID-19;

(12) *Disproportionately Impacted Populations and Communities*. A program, service, or other assistance that is provided in a Qualified Census Tract, that is provided to households and populations living in a Qualified Census Tract, that is provided by a Tribal government, or that is provided to other households, businesses, or populations disproportionately impacted by the COVID-19 public health emergency, such as:

- (i) Programs or services that facilitate access to health and social services, including:
 - (A) Assistance accessing or applying for public benefits or services;
 - (B) Remediation of lead paint or other lead hazards; and
 - (C) Community violence intervention programs;
- (ii) Programs or services that address housing insecurity, lack of affordable housing, or homelessness, including:
 - (A) Supportive housing or other programs or services to improve access to stable, affordable housing among individuals who are homeless;
 - (B) Development of affordable housing to increase supply of affordable and high-quality living units; and
 - (C) Housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity and to reduce concentrated areas of low economic opportunity;
- (iii) Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on education, including:
 - (A) New or expanded early learning services;
 - (B) Assistance to high-poverty school districts to advance equitable funding across districts and geographies; and
 - (C) Educational and evidence-based services to address the academic, social, emotional, and mental health needs of students;
- (iv) Programs or services that address or mitigate the impacts of the COVID-19 public health emergency on childhood health or welfare, including:
 - (A) New or expanded childcare;

(B) Programs to provide home visits by health professionals, parent educators, and social service professionals to individuals with young children to provide education and assistance for economic support, health needs, or child development; and

(C) Services for child welfare-involved families and foster youth to provide support and education on child development, positive parenting, coping skills, or recovery for mental health and substance use.

(c) *Providing Premium Pay to Eligible Workers.* A recipient may use funds to provide premium pay to eligible workers of the recipient who perform essential work or to provide grants to eligible employers, provided that any premium pay or grants provided under this paragraph (c) must respond to eligible workers performing essential work during the COVID-19 public health emergency. A recipient uses premium pay or grants provided under this paragraph (c) to respond to eligible workers performing essential work during the COVID-19 public health emergency if it prioritizes low- and moderate-income persons. The recipient must provide, whether for themselves or on behalf of a grantee, a written justification to the Secretary of how the premium pay or grant provided under this paragraph (c) responds to eligible workers performing essential work if the premium pay or grant would increase an eligible worker's total wages and remuneration above 150 percent of such eligible worker's residing State's average annual wage for all occupations or their residing county's average annual wage, whichever is higher.

(d) *Providing Government Services.* For the provision of government services to the extent of a reduction in the recipient's general revenue, calculated according to paragraphs (d)(1) and (d)(2).

(1) *Frequency.* A recipient must calculate the reduction in its general revenue using information as-of December 31, 2020, December 31, 2021, December 31, 2022, and December 31, 2023 (each, a calculation date) and following each calculation date.

(2) *Calculation.* A reduction in a recipient's general revenue equals:

$$\text{Max} \{ [\text{Base Year Revenue} * (1 + \text{Growth Adjustment})^{\left(\frac{n_t}{12}\right)}] - \text{Actual General Revenue}_t; 0 \}$$

Where:

(i) Base Year Revenue is the recipient's general revenue for the most recent full fiscal year prior to the COVID-19 public health emergency;

(ii) Growth Adjustment is equal to the greater of 4.1 percent (or 0.041) and the recipient's average annual revenue growth over the three full fiscal years prior to the COVID-19 public health emergency.

(iii) n equals the number of months elapsed from the end of the base year to the calculation date.

(iv) Actual General Revenue is a recipient's actual general revenue collected during 12-month period ending on each calculation date;

(v) Subscript t denotes the specific calculation date.

(e) *To Make Necessary Investments in Infrastructure.* A recipient may use funds to make investments in:

(1) *Clean Water State Revolving Fund and Drinking Water State Revolving Fund investments.* Projects or activities of the type that would be eligible under section 603(c) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c)) or section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j-12); or,

(2) *Broadband.* Broadband infrastructure that is designed to provide service to unserved or underserved households and businesses and that is designed to, upon completion:

(A) Reliably meet or exceed symmetrical 100 Mbps download speed and upload speeds;
or

(B) In cases where it is not practicable, because of the excessive cost of the project or geography or topography of the area to be served by the project, to provide service meeting the standards set forth in paragraph (e)(2)(A) of this section:

(i) Reliably meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed; and

(ii) Be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.

§ 35.7 Pensions.

A recipient may not use funds for deposit into any pension fund.

§ 35.8 Tax.

(a) *Restriction.* A State or Territory shall not use funds to either directly or indirectly offset a reduction in the net tax revenue of the State or Territory resulting from a covered change during the covered period.

(b) *Violation.* Treasury will consider a State or Territory to have used funds to offset a reduction in net tax revenue if, during a reporting year:

(1) *Covered Change.* The State or Territory has made a covered change that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered

change, the State or Territory assesses has had or predicts to have the effect of reducing tax revenue relative to current law;

(2) *Exceeds the De Minimis Threshold.* The aggregate amount of the measured or predicted reductions in tax revenue caused by covered changes identified under paragraph (b)(1) of this section, in the aggregate, exceeds 1 percent of the State's or Territory's baseline;

(3) *Reduction in Net Tax Revenue.* The State or Territory reports a reduction in net tax revenue, measured as the difference between actual tax revenue and the State's or Territory's baseline, each measured as of the end of the reporting year; and

(4) *Consideration of Other Changes.* The aggregate amount of measured or predicted reductions in tax revenue caused by covered changes is greater than the sum of the following, in each case, as calculated for the reporting year:

(i) The aggregate amount of the expected increases in tax revenue caused by one or more covered changes that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered change, the State or Territory assesses has had or predicts to have the effect of increasing tax revenue; and

(ii) Reductions in spending, up to the amount of the State's or Territory's net reduction in total spending, that are in:

(A) Departments, agencies, or authorities in which the State or Territory is not using funds; and

(B) Departments, agencies, or authorities in which the State or Territory is using funds, in an amount equal to the value of the spending cuts in those departments, agencies, or authorities, minus funds used.

(c) *Amount and Revenue Reduction Cap.* If a State or Territory is considered to be in violation pursuant to paragraph (b) of this section, the amount used in violation of paragraph (a) of this section is equal to the lesser of:

(1) The reduction in net tax revenue of the State or Territory for the reporting year, measured as the difference between the State's or Territory's baseline and its actual tax revenue, each measured as of the end of the reporting year; and,

(2) The aggregate amount of the reductions in tax revenues caused by covered changes identified in paragraph (b)(1) of this section, minus the sum of the amounts in identified in paragraphs (b)(4)(i)-(ii).

§ 35.9. Compliance with Applicable Laws.

A recipient must comply with all other applicable Federal statutes, regulations, and executive orders, and a recipient shall provide for compliance with the American Rescue Plan Act, this Subpart, and any interpretive guidance by other parties in any agreements it enters into with other parties relating to these funds.

§ 35.10. Recoupment.

(a) *Identification of Violations – (1) In general.* Any amount used in violation of §§ 35.6 or 35.7 of this subpart may be identified at any time prior to December 31, 2026.

(2) *Annual Reporting of Amounts of Violations.* On an annual basis, a recipient that is a State or Territory must calculate and report any amounts used in violation of § 35.8 of this subpart.

(b) *Calculation of Amounts Subject to Recoupment* – (1) *In general.* Except as provided in paragraph (b)(2), Treasury will calculate any amounts subject to recoupment resulting from a violation of §§ 35.6 or 35.7 of this subpart as the amounts used in violation of such restrictions.

(2) *Violations of Section 35.8.* Treasury will calculate any amounts subject to recoupment resulting from a violation of § 35.8 of this subpart, equal to the lesser of:

- (i) The amount set forth in § 35.8(c) of this subpart; and,
- (ii) The amount of funds received by such recipient.

(c) *Notice.* If Treasury calculates an amount subject to recoupment under paragraph (b) of this section, Treasury will provide the recipient a written notice of the amount subject to recoupment along with an explanation of such amounts.

(d) *Request for Reconsideration.* Unless Treasury extends the time period, within 60 calendar days of receipt of a notice of recoupment provided under paragraph (c) of this section, a recipient may submit a written request to Treasury requesting reconsideration of any amounts subject to recoupment under paragraph (b) of this section. To request reconsideration of any amounts subject to recoupment, a recipient must submit to Treasury a written request that includes:

- (i) An explanation of why the recipient believes all or some of the amount should not be subject to recoupment; and
- (ii) A discussion of supporting reasons, along with any additional information.

(e) *Final Amount Subject to Recoupment.* Unless Treasury extends the time period, within 60 calendar days of receipt of the recipient's request for reconsideration provided pursuant to paragraph (d) of this section, the recipient will be notified of the Secretary's decision to affirm, withdraw, or modify the notice of recoupment. Such notification will include an

explanation of the decision, including responses to the recipient's supporting reasons and consideration of additional information provided.

(f) *Repayment of Funds.* Unless Treasury extends the time period, a recipient shall repay to the Secretary any amounts subject to recoupment in accordance with instructions provided by Treasury:

(i) Within 120 calendar days of receipt of the notice of recoupment provided under paragraph (c) of this section, in the case of a recipient that does not submit a request for reconsideration in accordance with the requirements of paragraph (d) of this section, or

(ii) Within 120 calendar days of receipt of the Secretary's decision under paragraph (e) of this section, in the case of a recipient that submits a request for reconsideration in accordance with the requirements of paragraph (d) of this section.

§ 35.11 Payments to States.

(a) *In General.* With respect to any State or Territory that has an unemployment rate as of the date that it submits an initial certification for payment of funds pursuant to section 602(d)(1) of the Social Security Act that is less than two percentage points above its unemployment rate in February 2020, the Secretary will withhold 50 percent of the amount of funds allocated under section 602(b) of the Social Security Act to such State or territory until the date that is twelve months from the date such initial certification is provided to the Secretary.

(b) *Payment of Withheld Amount.* In order to receive the amount withheld under paragraph (a) of this section, the State or Territory must submit to the Secretary at least 30 days prior to the date referenced in paragraph (a) the following information:

(i) A certification, in the form provided by the Secretary, that such State or Territory requires the payment to carry out the activities specified in section 602(c) of the Social Security Act and will use the payment in compliance with section 602(c) of the Social Security Act; and,

(ii) Any reports required to be filed by that date pursuant to this part that have not yet been filed.

§ 35.12. Distributions to Nonentitlement Units of Local Government and Units of General Local Government.

(a) *Nonentitlement Units of Local Government.* Each State or Territory that receives a payment from Treasury pursuant to section 603(b)(2)(B) of the Social Security Act shall distribute the amount of the payment to nonentitlement units of government in such State or Territory in accordance with the requirements set forth in section 603(b)(2)(C) of the Social Security Act and without offsetting any debt owed by such nonentitlement units of local governments against such payments.

(b) *Budget Cap.* A State or Territory may not make a payment to a nonentitlement unit of local government pursuant to section 603(b)(2)(C) of the Social Security Act and paragraph (a) of this section in excess of the amount equal to 75 percent of the most recent budget for the nonentitlement unit of local government as of January 27, 2020. A State or Territory shall permit a nonentitlement unit of local government without a formal budget as of January 27, 2020, to provide a certification from an authorized officer of the nonentitlement unit of local government of its most recent annual expenditures as of January 27, 2020, and a State or Territory may rely on such certification for purposes of complying with this subsection.

(c) *Units of General Local Government.* Each State or Territory that receives a payment from Treasury pursuant to section 603(b)(3)(B)(ii) of the Social Security Act, in the case of an

(d) *Additional Conditions.* A State or Territory may not place additional conditions or requirements on distributions to nonentitlement units of local government or units of general local government beyond those required by section 603 of the Social Security Act or this subpart.
