I am asking for a hearing. four years ago I met with the wastewater director and we were going to have a hearing. On the 17th of november I had a Stroke. I was hospitalized for 12 weeks. After I forgot about the hearing. The bills for sewer use were sent to the wrong person. also my usage was incorrect. I was billed for more than 1200 units and I only used 675 to 687 units. I feel because of these errors I should get an adjustment on m bill. see attch bill from Maine Water. I had my stroke November 17th 2014. Thank You.

Average daily cost is: \$0.59

A late payment charge of 0.911% will be applied at the end of each month on any over due unpaid balance.

Message Center

You will notice a new line item on your bill, "Repair Tax Credit". Maine Water Company is applying a temporary rate reduction to each of your bills. This is a result of a recent change in the Federal Internal Revenue Service's tax code that allows utilities to take an immediate deduction for qualified capital spending that otherwise would have been deducted over many years and has allowed us to receive a tax refund. This refund has been issued to you since June of 2015 and will be ending after the first quarter 2018.

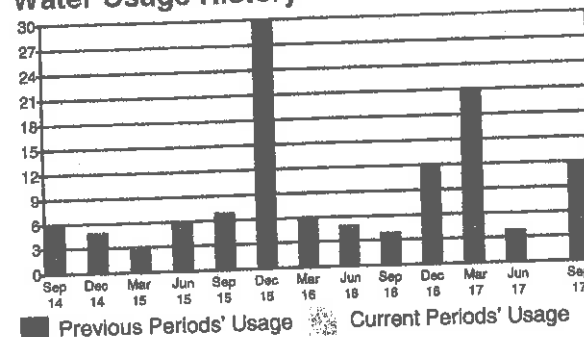

The Maine P.U.C. has recently implemented new rules for water utilities to encourage a more timely and systematic replacement of aging infrastructure. The new rules are explained in a letter you should have recently received. The water infrastructure charge is reflected on this billing. Please call customer service at 1.800.287.1643 with any questions you may have.

E-Billing and Bill Pay Service

Sign up for paperless E-billing - it's fast, easy and free. Just go to our Web site, mainewater.com, click on the green button labeled "Pay your bill" and register. Once registered, you'll get an e-mail when your bill is ready and if desired pay your bill or sign up for automatic payment.

Subject: Sewer Bill
Attachments: biddeford sewer letter.docx

Dear Richard,

We spoke on the phone a few days ago and you recommended that I submit a letter stating what had happened and about my sewer bill. Attached you will find my letter for the committee to review.

Thank you for your time and your consideration.

12/6/17
Act# 3959

To the Waste Water Division of Biddeford,

My name is Seth Glidden and I am writing to you concerning my current sewer bill. My wife and I have been residents of Biddeford for the last five years and have recently become interested in gardening to provide ourselves with fresh fruits and vegetables. Even though it is hard work, we have thoroughly enjoyed gardening, but we were utterly shocked at the amount of our sewer bill. Both my wife and I each work multiple jobs between us to get by and an almost \$1000 sewer bill is an extremely tough pill to swallow. We are asking for help in lowering this balance as clearly our past bills do not reflect this kind of sewer usage. With a small house of only one bathroom it would be almost impossible to create such sewer usage indicating an outside facet/hose. When considering our plight please take into consideration that we strictly use our outside facet for garden usage as well as beginning to collect rainwater to create our own home irrigation system. We'd like to continue to garden and we understand now that a submeter will be needed but we are asking for help with this quarter's balance. Thank you for your time and consideration

Sincerely,

Seth Glidden

Subject: Account No. 33860 Airport Industrial Prop. LLC : Excessive Sewer Charges 2017

* Dear Mr. Dutremble,

Precision Manufacturing Solutions' facility located at 419 Hill Street, Biddeford has received a very large sewer use invoice. I would like to request a refund for 2017 and future consideration of the non-sewer system gallons used.

In the summer months, large amounts of water are not exiting through the sewer system. The buildings air conditioning condenser units, due to age and design, need to be cooled with water sprinkler systems. We have designed two exit points for water exiting to the outside of the building for the sprinklers. The sprinklers are used to cool the coils on the air conditioner condenser units to improve the units performance and operation. Without this set up the buildings air conditioners will not operate properly.

Please have the engineering department contact me for a site visit and discussion on monitoring options.
